

# Report H124

**Dear Reader,**

We are delighted to introduce BFA's Interim Financial Report for the first half year 2024 ('H1 2024').

Driven by the ambitious vision to make BFA more agile, efficient, and focused on the ongoing enhancement of its customers' and team members' experiences, we have started a new strategic business cycle for 2024-2026. The key areas of focus and top strategic priorities in this new business cycle are encapsulated within the acronym "**EASE**": **E**mpathy, **A**gility, **S**implicity, and **E**fficiency.

Against this backdrop, we draw our inspiration from top-level sportsmen and women's performance, particularly highlighting the human spirit to overcome odds and difficult challenges, as well as the ongoing pursuit of achieving high performance levels. Such an approach aims to strengthen our corporate communications and statements as well as to signal the start of BFA's new strategic business cycle.

Hence, just as in high-performance sports, where preparation, discipline and technological innovation are key to achieving success, EASE 2024-2026 is underpinned by organisational transformation and the Bank's drive to maximise sustainable results. We have selected imagery that conveys agility, empathy, efficiency, and teamwork, symbolising the transformative power of the new business cycle (EASE 2024-2026).

This visual concept conveys a safe and collaborative environment, where the synergy between the different teams promotes effective and responsive action in the face of opportunities for improvement, with a focus on simplicity and efficiency. The aim is to maximise results through training, preparation, and ongoing organisational support.

With this steadfast and unwavering purpose in mind, we aim to redraw standards, overcome challenges, and develop innovative solutions that will shape the future of our organisation, further consolidating our leading position in the market.

# 2024-2026 Strategic Plan +EASE

With a view to setting out our purpose and ambition to continue being the best bank to work for—more agile, simpler, and geared towards improving both BFA’s Customer base and Team Members’ experience—we have chosen 6 Strategic Pillars that will guide our operational activity during the 2024-2026 Strategic Business Cycle.

Each of these corporate strategic pillars represents our unwavering commitment over the next few years to enhance our ability to be of service to our customer base, as well as our capacity to attract, develop, retain, and acknowledge our top human capital talents.

6 strategic pillars

16 initiatives prioritised

9 strategic goals

2.5 yearsof implementation

38 initiatives identified

# Strategic Pillars and Initiatives

## Sustainability

- To implement the initiatives of the short-term Strategic Sustainability Plan.

## Increase BFA's Personnel efficiency and professional performance

- Performance and compensation assessment - Central Services + Commercial Areas;
- Development of the career management model;
- Organisational model and functions;
- Management of the Organisational Transformation (i.e. adjustments/ changes) and Organisational Culture cross-cutting the Strategic Plan.

## Business growth

- Planning, coordination, and management of BFA's teams' commercial activities aimed at high-value customer segments.

## Increase corporate/business processes efficiency

- Back-office automation programme;
- Basic Offering Journey for Retail Customers;
- Develop, enhance/streamline and put in place the processes set out in the ERP implementation.

## Technological infrastructure enhancement/streamlining and data management

- Governance model & data quality;
- Development of the EDW platform;
- Development of the Application Architecture;
- Cyber Security and Resilience.

## Digitalisation / enhancement of the service model

- Expansion of the Banking Representatives Network (Footprint and Services);
- Operational workload and business opportunities of the DPN Branches;
- Expansion of self-service channels (new or with a wider scope).

+EASE

# Strategic Goals

## 1. Personnel Efficiency and Professional Performance

+ TEAM MEMBERS' SATISFACTION

+ PROFESSIONAL PERFORMANCE PER TEAM MEMBER

## 2. Corporate & Business Processes Efficiency

+ SLAs FOR CRITICAL PROCESSES

+ CUSTOMER SATISFACTION

## 3. Digitalisation / Enhancement of the Service Model

+ CUSTOMERS USING SELF-SERVICE CHANNELS

+ TRANSACTIONS CARRIED OUT AT BRANCHES

## 4. Optimization of Technological Infrastructure and Data Management

## 5. Business Growth

+ REVENUE PER CUSTOMER

+ BUSINESS OPPORTUNITIES ON ALTERNATIVE CHANNELS

## 6. Sustainability

+ INITIATIVES IMPLEMENTED WITH AN IMPACT ON EXTERNAL STAKEHOLDERS

## Executive Board Expertise Committees

In a complementary role and in accordance with international standards and best corporate practices, the Executive Committee of the Board of Directors (EXCO) also has eleven expertise committees:

|  |                                      |  |                     |
|--|--------------------------------------|--|---------------------|
| Asset & Liability<br>Committee<br>(ALCO) | Human Capital<br>Committee           | Costs & Productivity<br>Committee        | Financial Committee |
| FX Committee                             | Innovation &<br>CX Committee         | Governance and<br>Data Quality Committee | Business Committee  |
| Services & Products<br>Committee         | Internal Control &<br>Risk Committee | Information & Security<br>Committee      | EASE Committee      |

## Overview of the Executive Board Expertise Committees

### ALCO Committee

- To advise the Executive Committee of the Board of Directors ('EXCO') with regard to the Assets and Liabilities management strategy;
- To submit a proposal to the Executive Committee of the Board of Directors on Assets and Liabilities management policies, with regard to liquidity, interest rate, exchange rate and market risk management, and to follow up and monitor these policies;
- To monitor key performance indicators and metrics and their alignment with the corporate goals and strategic targets established in the Strategic Planning with regard to the balance sheet's financial management;
- To monitor the national and international macroeconomic framework, particularly in terms of analysing market interest and exchange rate trends and identifying potential impacts.

### Human Capital Committee

- Analyse and provide inputs on personnel management policies and regulations, whenever requested by HCD or by the EXCO;
- Analyse and issue an opinion for review and assessment by the EXCO:
  - With regard to proposals to appoint staff to management or leading positions in the commercial departments (managers or equivalent).
  - With regard to internal mobility proposals for management positions in the commercial departments.
- Monitor the development and implementation of the onboarding and training plans, with a particular focus on those aimed at the sales teams, and to propose to the EXCO changes or adjustments, whenever deemed appropriate;
- Review and provide inputs on the Succession Plans for key positions, for subsequent submission to the EXCO;
- Analyse labour-related incidents referred by the Audit Committee or any other corporate or governing body that may constitute relevant potential irregularities, substantiating the violation of the code of conduct or other labour duties, and propose to the EXCO the application of measures deemed appropriate to prevent similar events from happening in the future.

### Productivity & Costs Committee

- To monitor the control of the budget execution and the progress levels made towards achieving the goals established;
- To analyse the corresponding deviations in conjunction with the relevant department heads/managers and to propose the adoption of mitigation and corrective measures to the EXCO.

### Financial Committee

- To propose efficient methodologies for the control of the Bank's financial activity;
- To monitor the legislation and prudential regulations in force;
- Pricing policy;
- To draw up the commercial and business strategy for the launch of new products;
- Management of balance sheet risks, namely: exchange rate risk, interest rate risk and liquidity risk.

### Forex Committee

- To ensure compliance with BNA regulations regarding the foreign exchange market;
- To approve the criteria for the allocation and distribution of currency;
- To monitor the performance of the foreign exchange operations carried out by the Bank, both at auction and from other sources;
- To monitor the management policy of all issues related to the sale of foreign currency, namely by requesting the drawing up of proposals to be submitted to the EXCO with a view to solving key obstacles/problems to the business activity.

### Innovation & CX Committee

- To foster the enhancement of the customer experience (CX), increase operational efficiency, and support the Bank's growth strategy;
- To establish and monitor key performance indicators for customer service levels related to the main customer journeys;
- To identify, analyse and prioritise a set of initiatives aimed at improving BFA's efficiency and the customer experience, in particular those that fall under the strategic pillars - Service Model Digitalisation, Process Efficiency and Technological Infrastructure Development;
- To analyse and approve the proposals for implementing the initiatives referred to in the previous subsection, taking into account their priority, the resources required and the proposed implementation plan;
- To monitor the implementation and development of these initiatives, by analysing deviations and their impact and identifying any potential mitigation measures to be implemented.

### Governance & Data Quality Committee

- To develop and submit the data management operational model and strategy to the EXCO for approval;
- To assess and submit for approval to the EXCO, the regulations supporting Data Governance (DG), the implementation of the necessary organisational structures and the initiatives aimed at implementing the appropriate technological and data infrastructure;
- To determine the inclusion criteria applicable to data owners and administrators based on the business areas/data domains relevant to Data Governance (DG);
- To monitor the development of the Data Management ecosystem, troubleshoot shortcomings, constraints and capacity bottlenecks as well as ensure the active involvement of the relevant stakeholders;
- To assess the risks associated with Data Governance and ensure appropriate reporting;
- To identify and recognise, assess and prioritise the resolution of the main data-related problems;
- To approve mitigation/troubleshooting measures and corrective actions within the scope of data quality;
- To approve concept meanings, indicators and metrics including calculation rules;
- To determine, when appropriate, the setting up of Working Groups focused on particular frameworks or functional areas, with the aim of prioritising and/or troubleshooting critical topics related to the data quality, integrity, accuracy, or completeness.

### Business Committee

- To monitor the business development and commercial performance of the different networks;
- To monitor the competitive landscape and comprehensive business outlook.
- To set out the business policy, namely through the identification of priorities, opportunities and constraints to the business activity;
- To request the drawing up of proposals to be submitted to the EXCO for the resolution of constraints relevant to business activity;
- To monitor the implementation of the established priorities, namely by analysing deviations and their impacts;
- To develop and drive the implementation of new products to be launched on the market, as well as monitoring their business performance;
- To monitor and boost the business activity by identifying new opportunities to implement processes and/or new methods as well as to ensure their subsequent analysis and assessment by the EXCO.

### Products & Services Committee

- To monitor the business progress and commercial performance of the different networks;
- To monitor the regulatory framework that applies to and shapes the Bank's products and services offer, in its different dimensions/aspects, namely product features, pricing and sales processes;
- To monitor the competitive landscape and the outlook for developments (new trends) in the supply of financial products and services in the internal market;
- To submit a proposal for the EXCO decision, the priorities for the development of new financial products and services, considering the evolving regulatory and competitive environment as well as the potential impact on the Bank's business;
- To monitor the implementation of the priorities established for the development of new products and services, namely by analysing deviations and assessing their corresponding impacts;
- To monitor the implementation of pricing policies, namely at committee's level, requesting the drafting of proposals to be submitted to the EXCO with a view to adjusting them to the regulations in force or to the competitive landscape.

### Internal Control & Risk Committee

- To monitor the Compliance and Risk Management functions' effectiveness, as well as the processes and procedures in place for managing materially relevant risks;
- To monitor the implementation of the strategy for managing all risks related to the Bank's business activities, namely: liquidity risk, interest rate risk, exchange rate risk, market risk, credit risk, operational risk, compliance strategy risk and reputational risk;
- Periodically monitoring and analysing all open recommendations for improving risk management carried out by the second line of defence (issued by regulators or auditors), taking into account the cases identified and the corresponding level of risk associated with them, in order to ensure that the necessary corrective measures are implemented in a timely manner;
- To analyse/assess and adopt a decision on the Risk Appetite Statement Tier 2 metrics proposal, as well as their monitoring and appraisal of possible action plans to mitigate risks;
- To analyse/assess and adopt a decision on the key operational risk indicators (KRI) proposal, as well as their monitoring and appraisal of possible action plans to mitigate risks;
- To analyse the development of materially relevant risks, monitored through reports (summarised, with an emphasis on the main issues, containing the appropriate risk metrics and submitted in a timely manner), which properly enable an informed decision-making process on the risks being monitored and managed.
- To issue opinions on initiatives in accordance with BFA Group's strategic plan, with regard to risks and impacts in relation to the approved Risk Appetite Statement (RAS) limits, in order to keep both the business strategy and the risk strategy aligned;
- To assess and issue an opinion on risk management regulations, limits, and practices for BFA Group's entities, taking into account the risk thresholds established by the Board of Directors;
- To monitor the comprehensive standards of compliance risk management in their full scale and scope;
- To oversee the development, implementation and ongoing maintenance of a comprehensive Compliance programme at the Bank;
- To monitor the implementation of the Compliance function's activity plan, identifying points for improvement and subsequent actions.

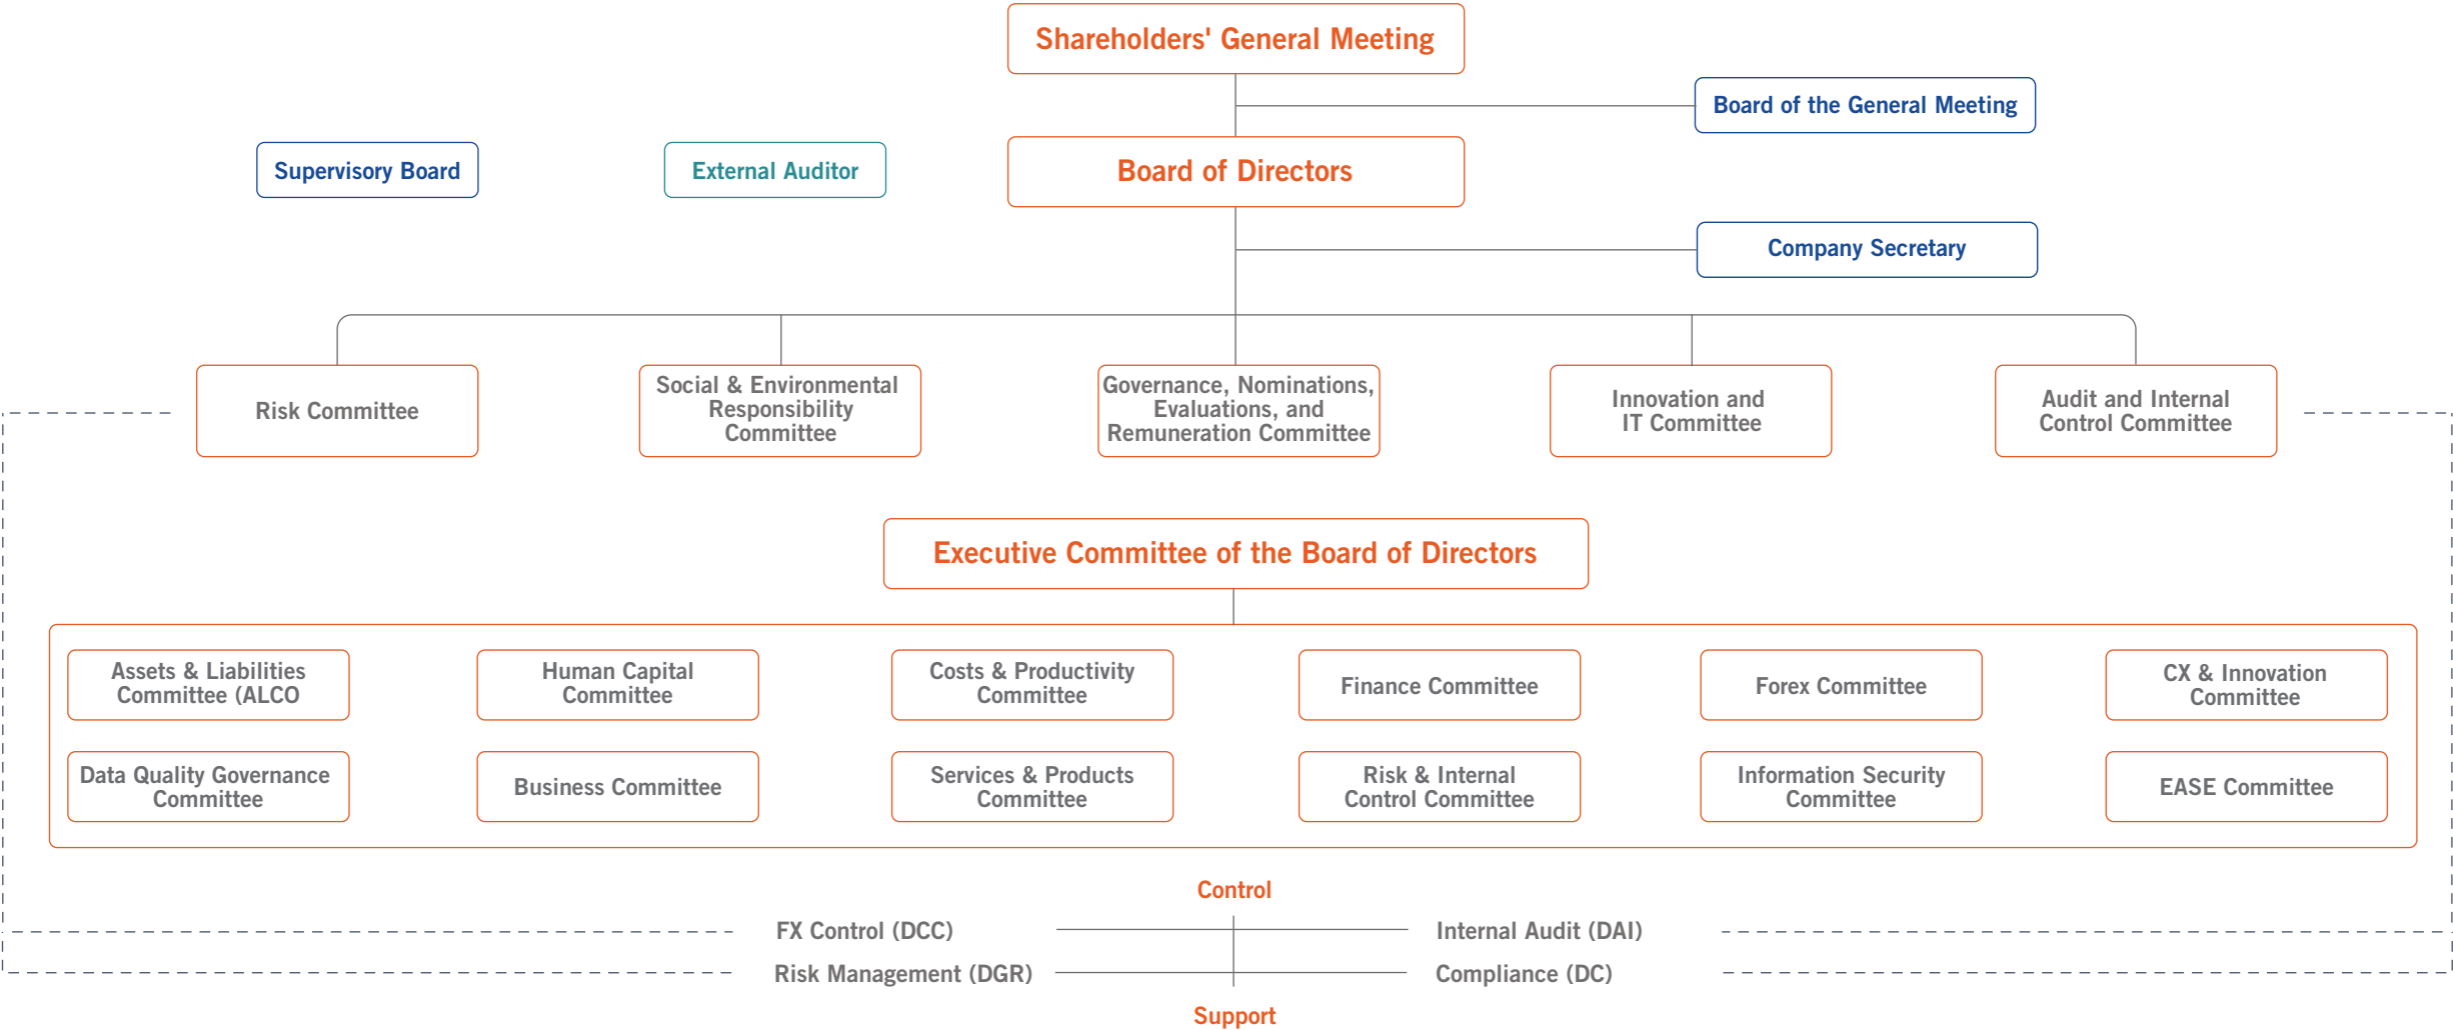

### Security & Information Committee

- Advise the EXCO with regard to the Information Security strategy;
- Advise the EXCO with regard to the Information Security policies;
- Monitor, analyse and report on the "SGS" risk and performance metrics;
- Develop corrective plans, monitor their implementation and assign the appropriate functions and duties;
- Monitor and report on the information internal and external security framework, and promote the periodic review of the related regulations.

### EASE COMMITTEE

- It is incumbent upon the EASE Committee to manage the comprehensive areas of focus and top priorities ('EASE 360° Vision') of each strategic pillar as well as to monitor and report on the development of the Strategic Plan's implementation, in particular the degree to which the Plan's goals have been attained, the level of progress/development of the initiatives underway, and their related KPIs;
- To unlock operational management situations, such as investments and implementation schedules;
- Take charge of decision-making on resource allocation in the event of conflicts/unavailability of resources;
- To expedite the potential processes for identifying external consultancy needs and analysing procurement processes.

Organisational Chart of the Governing Bodies and External Auditor Firm

# Executive Committee of the Board of Directors – Organisational Chart

The Bank’s Organisational Chart is underpinned by a functional organisational framework, which allows for a clear separation of each Institutional Department’s business areas and functions, under the aegis and authority of each individual Executive Director.

## Executive Committee of the Board of Directors

### Luís Gonçalves

CEO

Nationality: Angolan

Date of Birth:

6th June 1972

Mr. Luís Gonçalves holds a degree in advanced management accounting from the Lusíada University of Angola and completed Postgraduate Studies in Monetary and Financial Economics at the Évora University, Portugal. His academic background includes training in Anti-Money Laundering and Counter Terrorist Financing and Sanctions from PricewaterhouseCoopers (PWC), as well as an Effective Leadership Programme provided by the Nova School of Business & Economics and an Interbank Markets programme taught by InterMoney, Financial Services Volunteer Corps (FSVC).

Mr. Luís Roberto Gonçalves began his banking career at BFA in 1996 and held numerous high-profile and executive management positions within the Bank over several years. In 2016, Mr. Luís Gonçalves was entrusted with the core remit of establishing the BFA Asset Management Company ('BFA AM'), where he served as Chairman of its Executive Committee.

Until early 2020, Mr. Gonçalves served as Executive Director of Banco Crédito do Sul. He also held senior management positions at KEVE Bank. Since July 2020, he has been co-opted as Chairman of the Executive Committee of BFA's Board of Directors (CEO).

## Executive Committee of the Board of Directors

### Sebastião Massango

Executive Director

Nationality: Angolan

Date of Birth:

10th September 1976

Mr. Sebastião Machado Francisco Massango holds a degree in business management from the Agostinho Neto University School of Economics. In addition, Mr. Sebastião Massango also holds in its academic curriculum a Postgraduate Degree in Business Management from the Portuguese Catholic University.

Mr. Sebastião Machado Francisco Massango has a 22 years' professional track record at BFA, having held several high-profile positions in Corporate Banking, Risk Management and Agribusiness Management Departments. During his preceding three-year term of office (2020-2022), he served as Executive Director with the Retail and Business Network (Northern and Southern Regions) portfolio, the Agribusiness Department, the Investment Centres Department and the Private Banking Department.

He currently serves as BFA's Executive Director, overseeing the Risk Management Departments portfolio.

## Executive Committee of the Board of Directors

### Natacha Barradas

Executive Director

Nationality: Angolan

Date of Birth:

25th September 1978

Degree of Laws (LL.B.) from the Catholic University of Angola, Luanda. Completed two postgraduate studies: Corporate Law and International Trade Law from the Lisbon University and Agostinho Neto University. Holds a Master's Degree in Business and Law from the Portuguese Catholic University.

Ms. Barradas held the positions of Head of the Legal Department, Company Secretary and Chair of the Shareholders' General Meeting Board at Standard Bank Angola. In addition, she was a voting member of the Angola's Sovereign Wealth Fund's supervisory board for two years. Since 2017, Ms. has been a partner at LEAD Attorneys in Law and has worked at a variety of Law firms, including MLGTS - Morais Leitão, Galvão Teles, Soares da Silva and FBL - Faria De Bastos e Lopes Attorneys in Law. In 2013, she joined the Angolan Ministry of Finance as Head of the Legal Office and later as Director of the Minister of Finance's Office. She also held the position of Legal Counsel at Banco BPI in 2008 and at New Insurance Company of Angola (Nossa Insurance Company) in 2005. In 2005, she took up the role as a lecturer at Angola's Catholic University Law School.

Since June 2020, she has been co-opted as BFA's Executive Director.

## Executive Committee of the Board of Directors

### Paulo Alves

Executive Director

Nationality: Angolan

Date of Birth:

24th November 1978

Degree in Linguistics/English from the Higher Institute of Educational Sciences in Lubango, and a Master's degree in Business Management from the Open University in Lisbon.

Mr. Paulo Freitas Alves possesses an extensive background in the commercial area and in leading multi-disciplinary teams. Within another financial institution, he held the positions of Counter Clerk, Credit Technician, Counter Manager, Deputy Branch Manager and Branch Manager. In 2005 he was invited to join the BFA team as a Branch Manager, and until 2017 he held numerous high-profile positions in the Retail and Business Department - Manager, Business Area Manager, Deputy Manager and Head of the Commercial Department. Afterwards, he was challenged to join the Transformation Team as Head of one of the work groups and, in 2019, he joined the Corporate Department team.

Since June 2020 he has been co-opted as BFA's Executive Director.

## Executive Committee of the Board of Directors

### José Nascimento

Executive Director

Nationality: Angolan

Date of Birth:

22nd May 1970

Degree in business management and control from the University of Salford, Manchester, United Kingdom and master's degree in Investment Management from London City University, London, United Kingdom.

Mr. José Alves do Nascimento served as Executive Director and CFO of Banco Económico, SA from January 2019 to November 2022. Mr. Nascimento also held several high-profile positions at the Bank for Savings and Housing Promotion ("BPPH"), where he served as Shareholder Representative and Voting Member of the Executive Committee of the Bank for Promotion and Development ("BPD"). At the beginning of his career, Mr. Nascimento worked as a Financial Consultant at QSL - Logistics Centres and Oil Installations during a five-year period.

## Executive Committee of the Board of Directors

### Francisca Costa

Executive Director

Nationality: Portuguese

Date of Birth:

14th December 1986

Degree in Corporate Finance from ISCTE - University Institute of Lisbon; completed technical certifications in ICAAP/ILAAP from the Banking Training Institute in Lisbon; Expert training in IFRS/IAS and Tax Codes and Regulations taught by the Auditing Firms KPMG, Deloitte, PWC and EY (Lisbon and Luanda).

Ms. Francisca Ferrão Costa has over 19 years' professional experience in the financial/accounting fields. On her career path, Ms. Francisca Costa held several high-profile positions, including Head of BFA's Accounting and Planning Department from 2017 to 2023. From 2007 to 2017, Ms. Costa worked at KPMG & Associates SROC, S.A. and KPMG Angola S.A., Lisbon and Luanda, where she took on the role of Audit Manager. In 2005, she held the position of Contact Supervisor at Espírito Santo Contact Centre Lisbon.

## Executive Committee of the Board of Directors

### Paulo Silva

Executive Director

Nationality: Angolan

Date of Birth:

19th April 1975

Degree in Financial Management from the AIEC College - Brasília University, Brazil. Completed Postgraduate Studies in Business Management from ISCTE, Portugal. Holds a Master's Degree in Marketing by the London School of Design and Marketing, United Kingdom.

Paulo Valódia de Carvalho Moreira da Silva has over 20 years' experience in banking, starting in 2003 at BFA, in the Commercial area, where he held the positions of Commercial Assistant, Credit Technician, Account Manager, Deputy Manager and Manager. From 2011 to 2018, Mr. Paulo Carvalho Silva held the position of BFA's Commercial Director, and also worked in the Transformation Department (Strategic Plan), acting as the 2nd Head of the Department. In 2019, Mr. Paulo Silva took over as head of the Retail and Business Department, and in the following year he became head of the Large Companies Department.

## Global Economy

According to the IMF’s World Economic Outlook Report, the global economy grew by +3.3% in FY2023, down from the +3.5% recorded in the preceding year (-0.2% YoY).

The global slowdown was primarily driven by central banks raising interest rates to counter inflation. However, employment and income growth remained stable, and inflation reversed the upward trend witnessed since the COVID-19 pandemic, dropping by 1.9 pp (from 8.7% in FY2022 to 6.8% in FY2023).

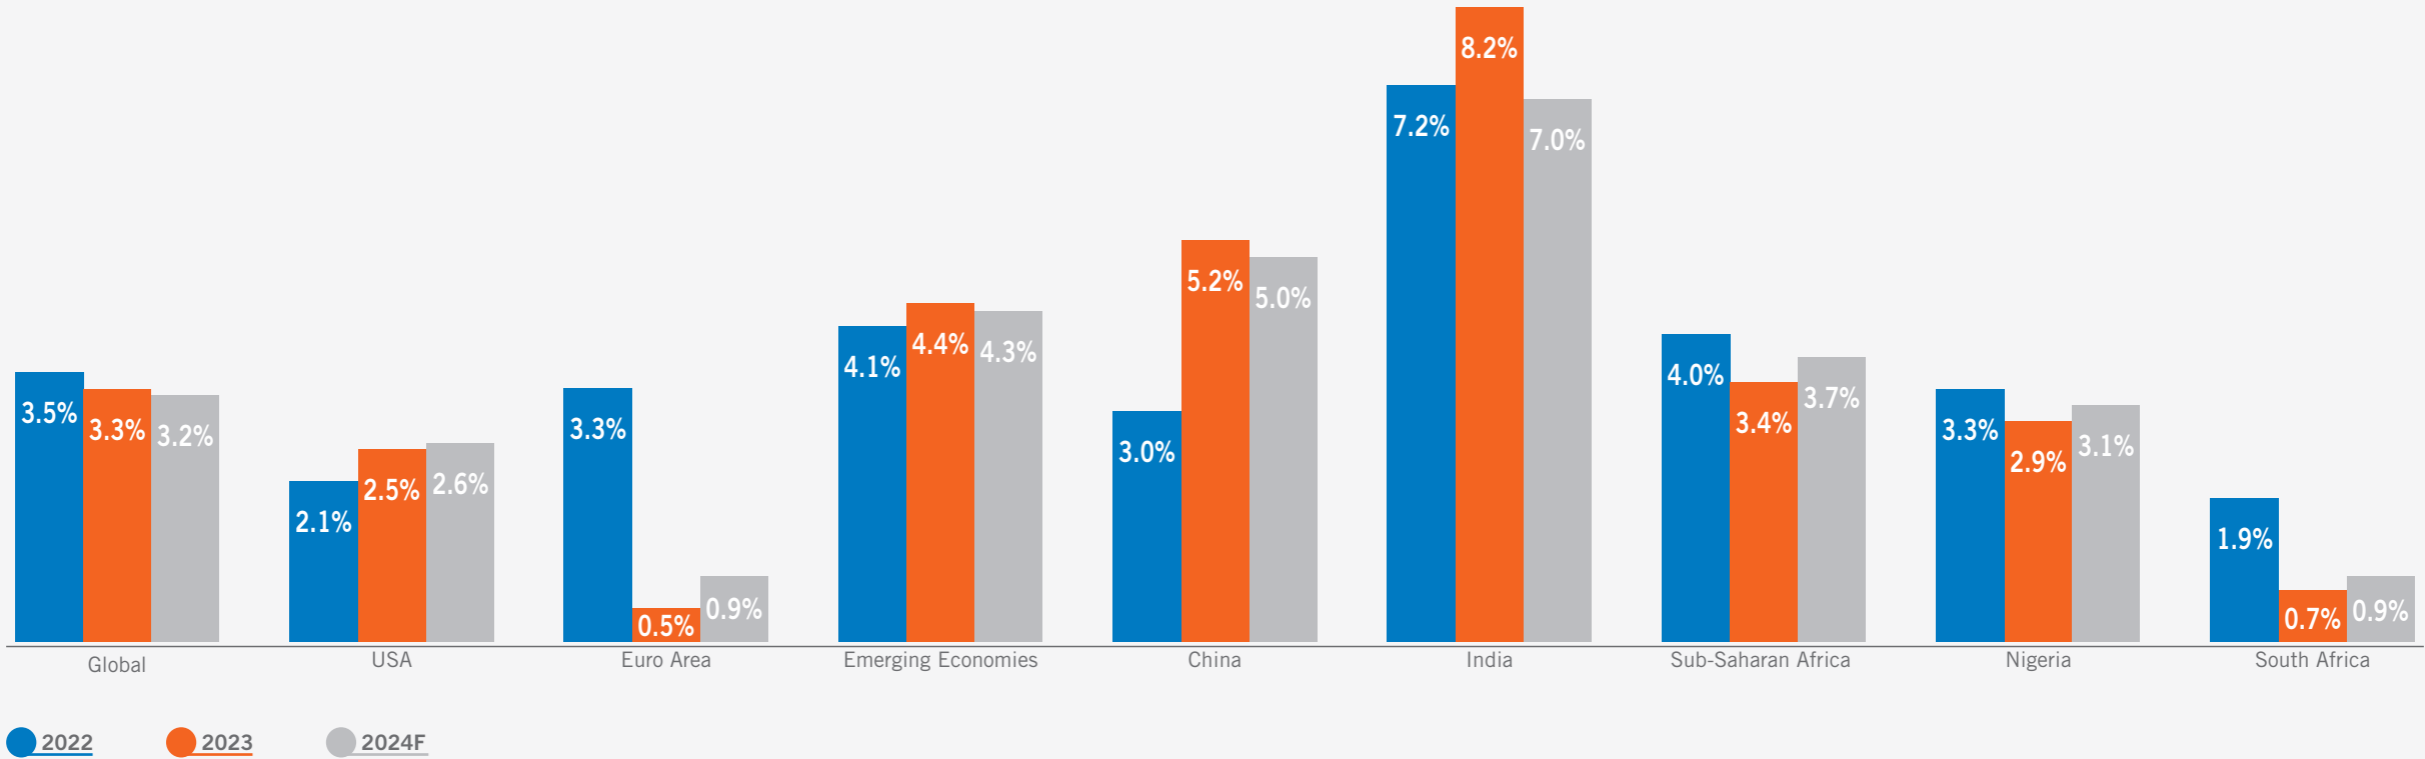

In FY2024, the global economy has remained resilient, despite significant increases in central bank interest rates aimed at restoring price stability. The world economy is forecast to grow by +3.2% during 2024, a slightly slower pace than that recorded in 2023. A sharp slowdown for advanced economies- where growth is expected to decline from +2.6% in FY2023 to +1.7% in FY2024- will be followed by a moderate slowdown in emerging markets and developing economies (from +4.4% in FY2023 to 4.3% in FY2024).

Regarding interest rates in advanced economies, despite the beginning of a downward trend, these are expected to remain well above the average levels witnessed during the 2015-19 economic period, leading to a significant slowdown in global economic growth.

Overall, the global economic outlook, while generally positive, remains subdued compared to historical standards: both advanced and emerging economies are expected to grow at a slower pace than in the decade before the COVID-19 pandemic. Unfolding geopolitical events remain the main risk to global economic growth prospects. Uncertainty about economic policies is also likely to remain high. Likewise, the risks to inflation have increased, making it more difficult to standardise monetary policy.

Global inflation is expected to drop from an annual average of 6.8% in FY2023 to 5.9% in FY2024.

Global Real GDP Growth

Source: IMF

2023

**Developed Economies**

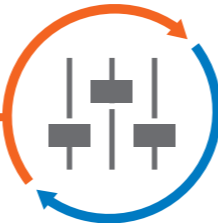

- Economic growth forecasted at +1.7%;
- Geopolitical tensions with considerable impact, particularly on logistical networks;
- Developed Economies hit by high inflation and rising interest rates.

**Emerging Economies**

- Economic growth forecasted at +4.4%;
- Sub-Saharan Africa recorded a growth of +3.4%;
- China's economic growth accelerated to +5.2%, below India's 8.2%.

**Global Economy:  
+3.3% Growth**

2024

**Developed Economies**

- Economic growth forecasted at +1.7%;
- Economic growth flatlined due to the long-term effects of COVID-19 and Russia's military invasion of Ukraine;
- Interest rates may start to fall in the 2nd half of the year, bolstering economic growth.

**Emerging Economies**

- Economic growth forecasted at +4.3%;
- Sub-Saharan Africa is expected to record a growth of +3.7%;
- Asian economies with a forecast growth of +5.4%, highlighting India's economy which is expected to grow by +7.0%.

**Global Economy:  
+3.2% Growth**

## Money and Bond Markets

The financial year 2023 ('FY 2023') was notably characterised and shaped by the significant impact of interest rate rises, particularly in the advanced economies, alongside a reversal in the inflation trend, while concern persist over the Chinese economy's transition to a slower pace of growth.

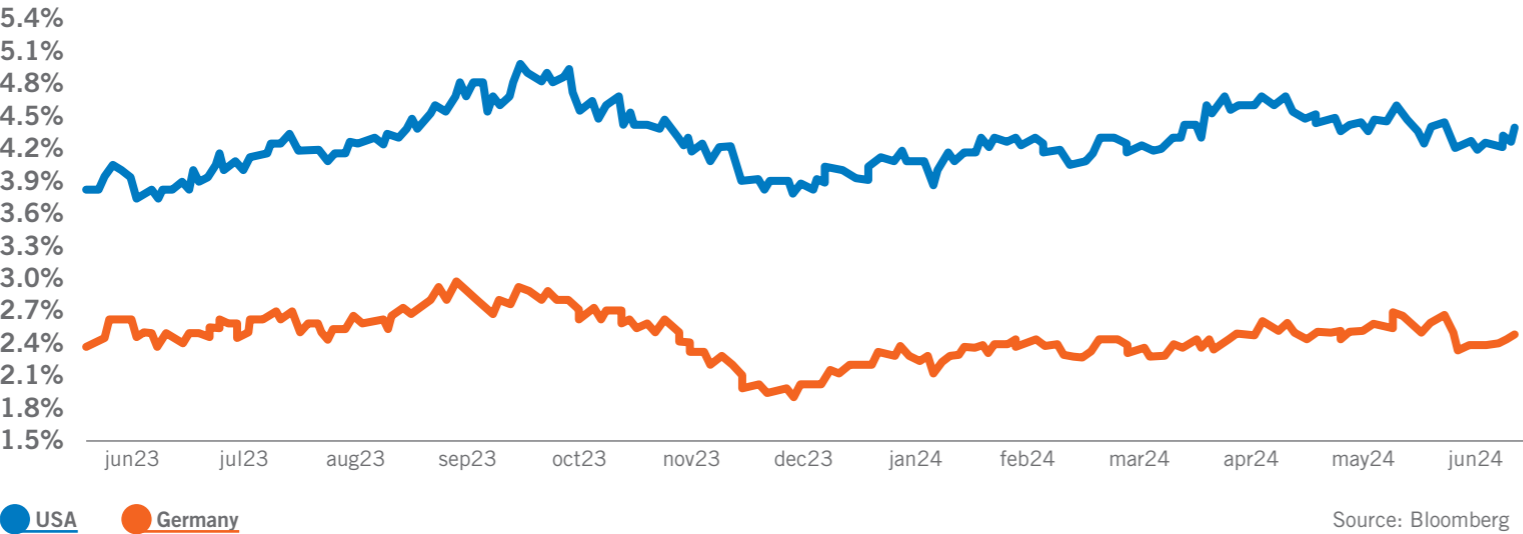

In FY2024, the central banks of the world's leading economies remain cautious about the impact of interest rates on inflation but have chosen to pursue and adopt different monetary policy strategies. As far as the US economy is concerned, the Federal Reserve has kept the course of monetary policy unchanged, since there have been no relevant changes in interest rates since July 2023. While there is a lot of speculation about a rate cut, the Fed says it's still too early to lower rates, as inflation targets have not yet been reached (US inflation in May was 3.3% YoY).

As for the Euro Area, monetary policy moved in the opposite direction, with the ECB deciding to cut interest rates after 18 months, despite concerns about inflation rates in the European economies. The European Central Bank cut the three main key interest rates by 25 basis points (bps): the main refinancing rate to 4.25%, the marginal lending facility rate to 4.50%, and the deposit rate to 3.75%.

The 10-year German public debt closed H12024 with a yield of 2.50%, while US 10-year public debt closed with a yield of 4.39% over the same period.

# Angolan Economy

## Economic Activity

Angola's Real GDP Growth

Source: FMI

As far as the Angolan economy is concerned, the economic recovery was almost halted in FY2023 due to a double shock: firstly, the weakening of oil output and lower crude oil prices, and secondly, the impact of higher debt repayments following the end of agreements and moratoriums from previous years. At the same time, cyclical measures were taken by the Angolan State that included cuts to fuel subsidies and tightening of monetary policy, leading to economic growth being constrained to +0.9% in FY2023.

IMF's World Economic Outlook Report forecasts economic growth for Angola in FY24 of approximately +2.6%, a figure driven to a large extent by the non-oil economy's performance at an estimated growth of +3.0%, followed by the oil economy's rise of +1.2%. According to the IMF, inflation will stand at 22.0% in FY24, with a succession of repeated increases taking place in H12024, followed by decreases in the following half-year.

The Angolan government foresees a slightly more favourable outlook, forecasting an economic growth rate of +2.8%, mainly underpinned by an estimated +4.6% growth in the non-oil economy, while assuming a possible decline of -2.6% in the oil sector. However, Angolan authorities are slightly more pessimistic about the inflation rate, expecting it to reach 23.4% by the end of the year.

According to economic data provided by the National Statistics Institute (INE), the Angolan economy grew by +4.6 in Q1 2024, the highest figure since Q1 2015. This result was mainly driven by the growth recorded in the oil economy of 6.9% YoY, in alignment with the positive performance of oil output, which averaged approximately 1.10mbd compared to 1.04mbd in Q1 2023 (up by +5% YoY), alongside with a +3.9% rise recorded in the non-oil economy.

In Q1 2024, the oil economy grew by 5% YoY, making a positive contribution of as much as +1.6pp to the overall change in Gross Domestic Product (GDP). A total crude oil output of 1.10 million barrels per day (mbd) were exported during that period, up from the 1.04 mbd recorded YoY. These figures are consistent with the rise of +48.9% witnessed in export revenues. However, it's important to highlight that this growth rate is largely due to the poor crude oil output at the start of last year as a result of the “Dália” oil field stoppage.

In Q1 2024, Angola’s oil exports increased by 2.1% year-over-year. Crude oil prices on the international markets also contributed to the increase in exports, taking into account the fact that geopolitical tensions in the Middle East escalated, prompting the average export barrel price to rise to USD 82.3 against the USD 78.7 traded over the same period in the preceding year, up by +4.5% YoY.

As far as the monetary landscape is concerned, BNA’s Monetary Policy Committee (MPC) has held three meetings so far until June 2024, aiming to achieve macroeconomic stability and counter rising prices. During these meetings, BNA’s MPC consolidated the tight-handed monetary policy approach which began in 2023, raising the rates of the primary monetary policy instruments, as follows: the basic interest rate and the marginal lending facility rate to 20.5% and 19.5%, respectively, as well as the coefficient of compulsory reserves in national currency to 21.0%. Only the foreign currency reserve ratio remains unchanged at 22%.

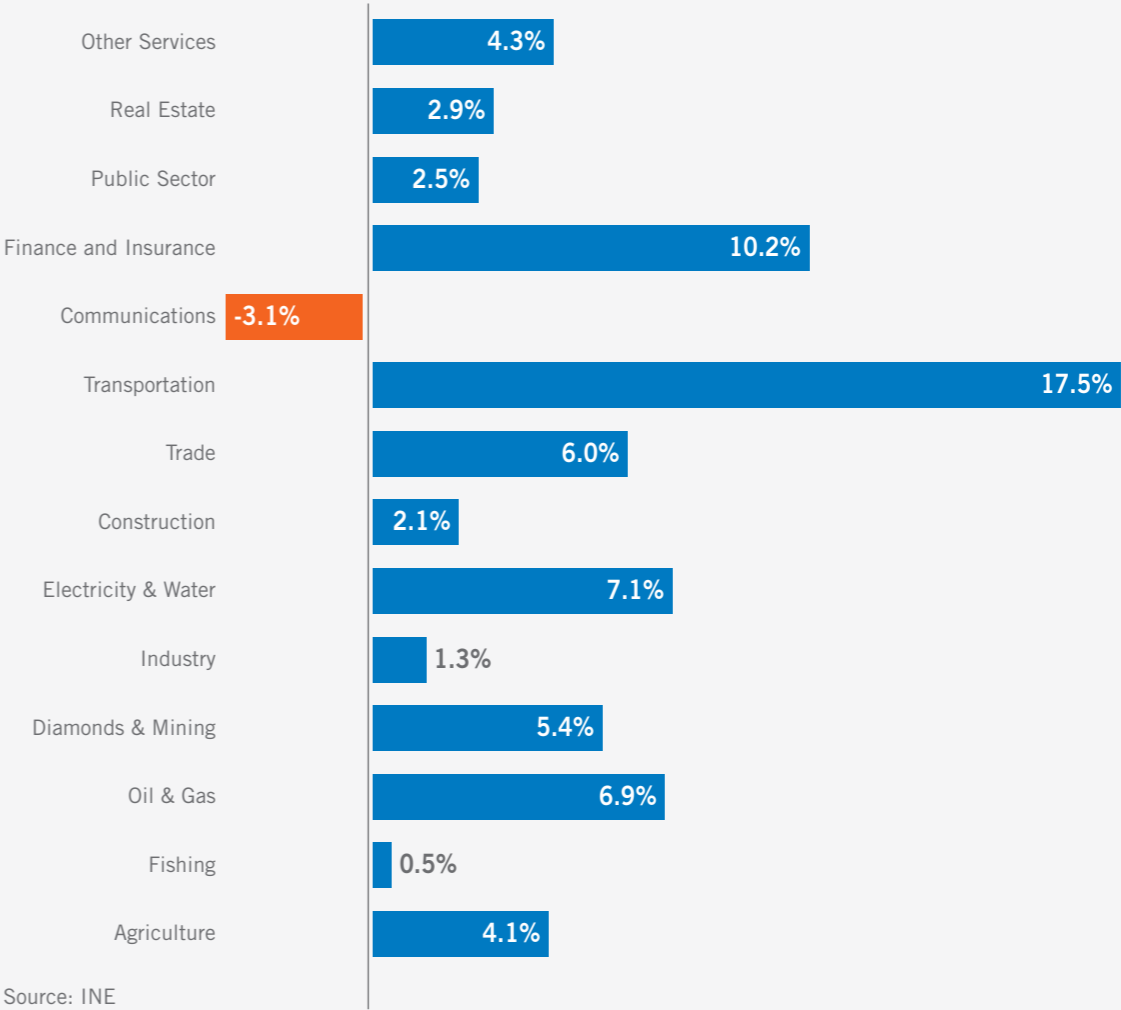

The Transportation sector was the growth engine in Q124.

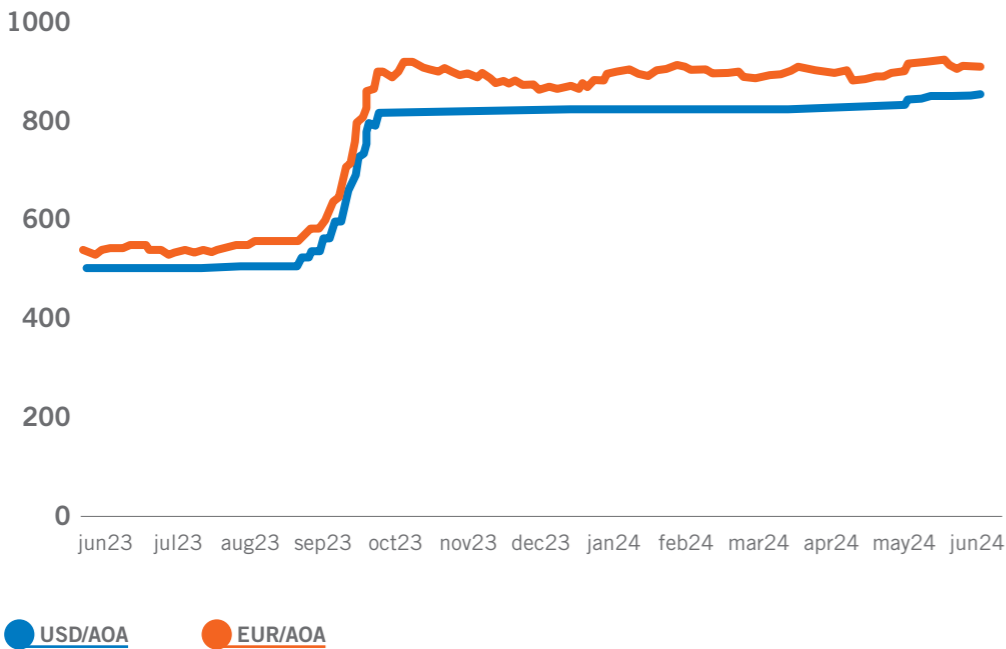

The communications sector experienced a downturn relative to the same period last year (YoY).

Angola’s GDP by Economic Activity Sector, Q1 2024

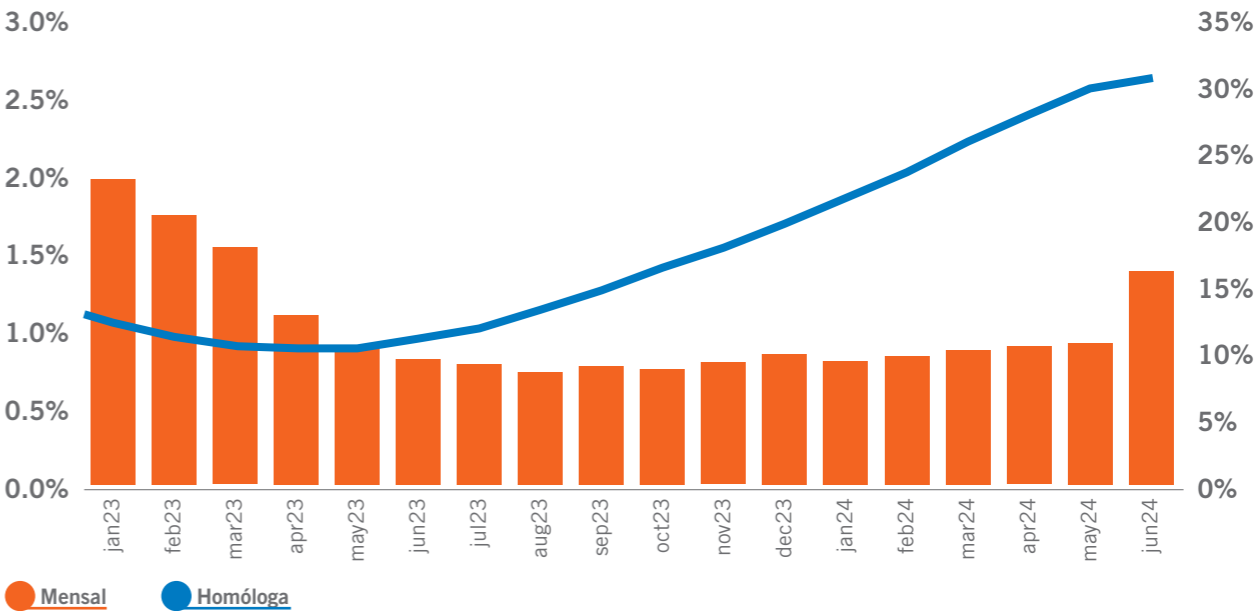

USD/AOA and EUR/AO Foreign Exchange Rates

Foreign Exchange Market

As for the foreign exchange market, after the sharp depreciation that the national currency underwent in FY2023 - 39% against the US Dollar and 40% against the Euro - the Angolan Kwanza experienced limited fluctuations during the first few months of 2024. Up until the end of June 2024, the Kwanza recorded mixed movements, having depreciated by 2.9% against the US Dollar and strengthened by 0.25% against the Euro, closing the month trading at USD/AOA 871.2 and EUR/AOA 943.1, respectively.

Angola 's Monthly and Year-on-Year Inflation

Source: INE

Inflation

With regard to inflation, the upward trend in prices that began in 2023 has remained unchanged throughout H1 2024, but now with stronger inflationary factors: the partial removal of petrol subsidies, the entry into force of the new customs tariff, combined with existing factors such as weak domestic production, lower availability of foreign currency and greater monetary expansion, have exerted upward pressure on the overall rise in prices across the overall country's economy. In the first 5 months of FY2024, year-on-year inflation averaged 26.1%, i.e. +14.9 p.p. when compared to the same period in FY2023. National inflation slowed down in May to 2.42% (-0.07 percentage points when compared to April 2024), but year-on-year inflation rose to 30.1%, the highest inflation level recorded since June 2017. In the upcoming months, inflation is anticipated to maintain its upward trend, as aforementioned, due to increasingly negative factors impacting price levels.

| Total Liabilities and Equity  | 3 360 999.1 | 3 658 283.8 | 8.8%   |

Total Assets

Despite the highly challenging macroeconomic landscape and current BNA’s monetary policy, the Bank’s balance sheet continued to grow steadily in H12024, which reveals and confirms BFA’s ongoing financial stronghold, soundness, and resilience.

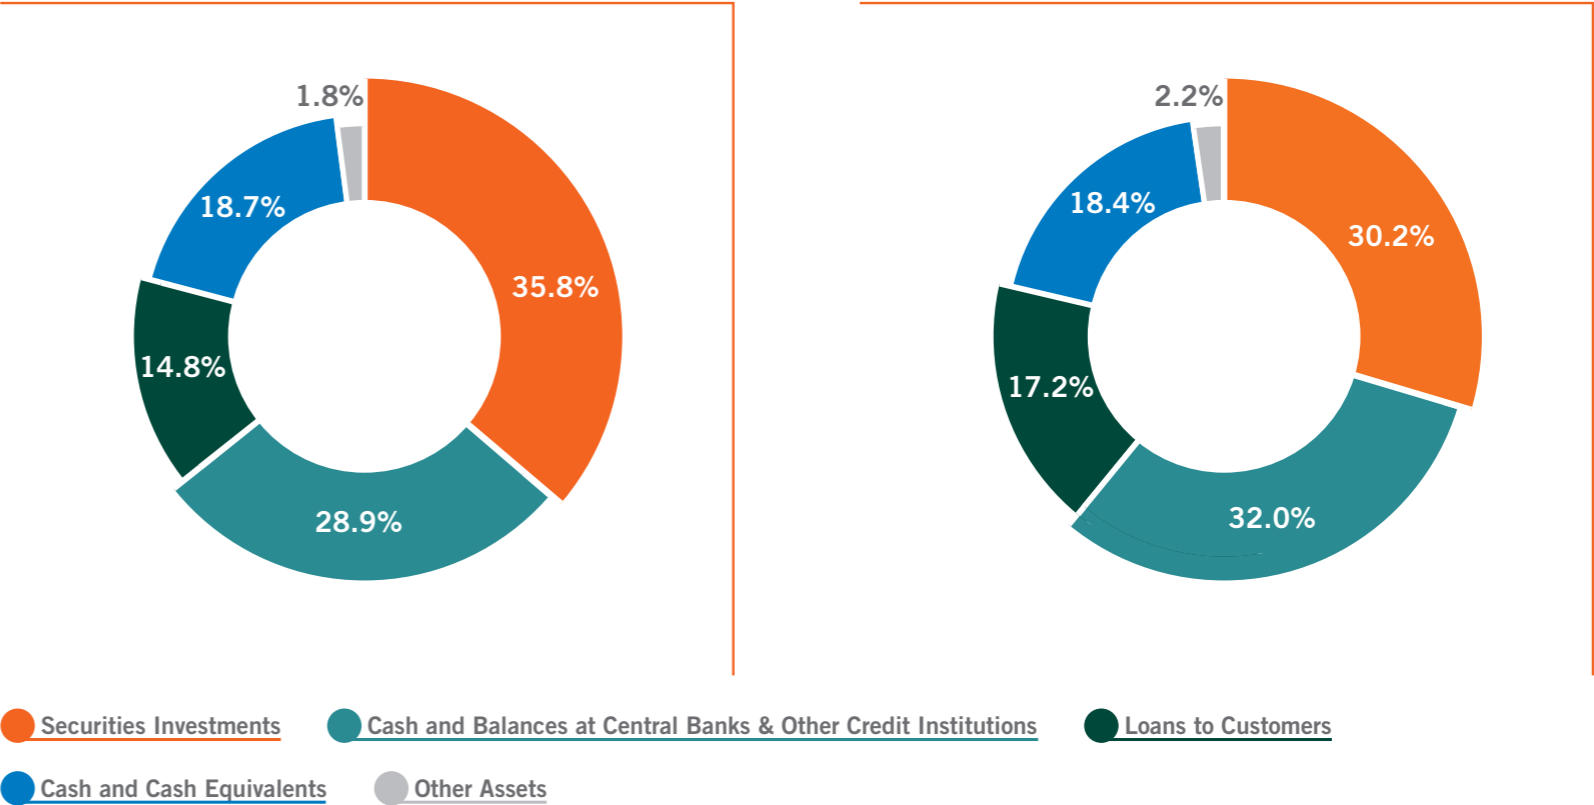

As at 30th June 2024, BFA’s Total Assets recorded an increase of 8.8% YoY, amounting to +AOA 3,658,283.8 million. This development was primarily driven by a +20.5% surge registered in Cash and Balances at Central Banks and Other Credit Institutions (+AOA 198,740.0 million), a +26.6% increase in Loans to Customers (+AOA 132,335.6 million) and a +6.9% increase in Cash and Cash Equivalents at Central Banks (+AOA 43,347.0 million) headings.

The development of these headings led to a change in the composition of BFA’s Total Assets portfolio, with Cash and Balances at Central Banks and Other Credit Institutions becoming the most relevant heading, with a comprehensive weight of 32%, followed by the Securities Portfolio with a weight of 30.2%, which is mainly composed of Treasury Bonds in domestic currency. This development in the Bank’s Total Assets portfolio composition stems primarily from BFA’s endeavour and pursuit towards balance sheet diversification, coupled with a combination of risk, profitability and liquidity factors.

In H12024, Angola’s economy witnessed the national currency Kwanza to continue its downward trend and devaluation, albeit at a slower rate YoY. In any case, BFA’s balance sheet composition displays a larger variation in headings which results

in a higher counter-value in AOA (kwanzas) of foreign currency-denominated exposures with a positive impact in the Total Assets portfolio growth due to the exchange rate effect in the amount of approximately +AOA 51,764.7 million.

Breakdown of BFA’s Total Assets Portfolio in H1 2023

Cash and Cash Equivalents

Cash and Cash Equivalents heading stood at +AOA 673,420.6 million, up +6.9% year-on-year (+AOA 43,347.0 million). A portion of this positive financial performance and growth was due to the change in the coefficient for Required Reserves in domestic currency from 17% in 2023 to 20% in 2024, as well as from the rise in the Customer Deposits portfolio, predominantly in domestic currency.

Applications in Central Banks and Other Credit Institutions

A key component of BFA’s Total Assets portfolio is made up of the ‘Cash and Balances at Central Banks and Other Credit Institutions’ heading, which recorded a growth of +20.5% (up +AOA 198,740.0 million) YoY, amounting to +AOA 1,169,150.0 million in June 2024. Cross-Border investments totalled +AOA 709,609.7 million (+6%), up by +AOA 40,034.3 million. Domestic investments grew by +AOA 158,792.5 million (+52.7%) YoY, amounting to +AOA 460,047.7 million.

Total Loan Portfolio Development

| Amounts expressed in AOA millions        |           |           |             |
|--|-----------|-----------|-------------|
|  | H1 23     | H1 24     | Δ%          |
| 1. Total Credit                          | 710 062.7 | 837 909.8 | 18.0%       |
| 1.1 Loans to Customers                   | 534 859.6 | 671 139.0 | 25.5%       |
| Loan in Domestic Currency                | 498 593.2 | 598 812.3 | 20.1%       |
| Loan in Foreign Currency                 | 36 266.5  | 72 326.7  | 99.4%       |
| 1.2 Credit and Accrued Interest          | 19 254.3  | 12 720.1  | -33.9%      |
| 1.3 Guarantees (Corporate Banking)       | 117 603.9 | 120 420.4 | 2.4%        |
| 1.4 Undrawn Credit Limits                | 38 344.9  | 33 630.3  | -12.3%      |
| 2. Total Loan Loss Provisions            | 57 999.3  | 55 203.3  | -4.8%       |
| 2.1 Specific Provisions                  | 57 340.9  | 54 750.3  | -4.5%       |
| For Credit and Accrued Interest          | 23 884.3  | 17 575.5  | -26.4%      |
| 2.2 For General Credit Risks             | 658.4     | 453.0     | -31.2%      |
| 3. Total Credit Net of Impairments       | 496 773.1 | 629 108.7 | 26.6%       |
| Of which Credit and accrued interest     | 19 254.3  | 12 720.1  | -33.9%      |
| 4. Loan Portfolio Asset Quality          |           |           |             |
| Past-Due Loans (% Total Loan Portfolio)  | 3.5%      | 1.9%      | -1.6 p.p.   |
| Past-Due Loans Provisions Coverage Ratio | 301.2%    | 434.0%    | -132.8 p.p. |

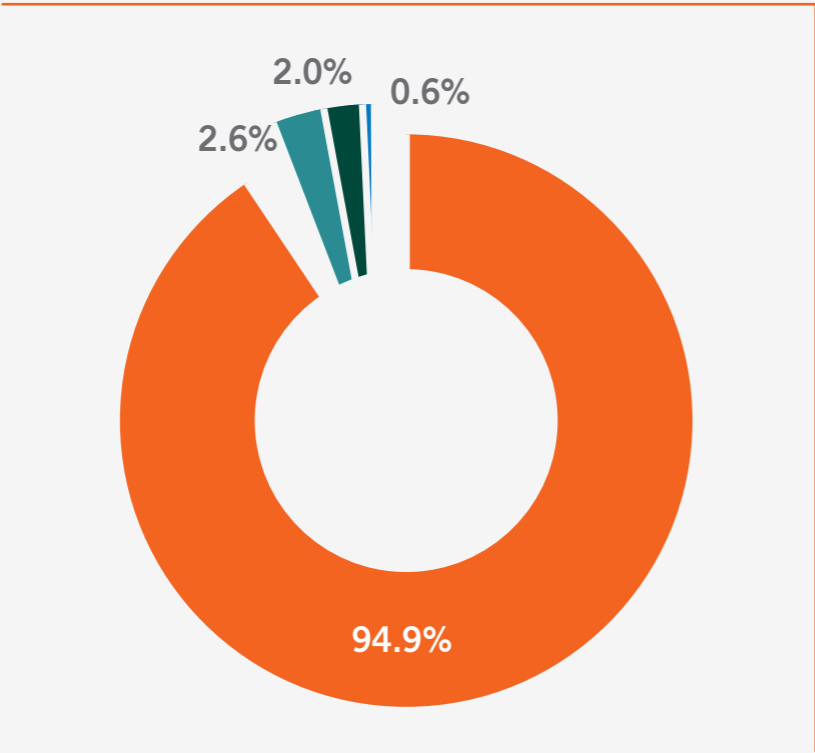

The Total Loan Portfolio rose by +AOA 127.847 million (+18.0%) YoY, amounting to +AOA 837.909,8 million. This growth is largely due to the +20.1% increase in loans granted and new disbursements in local currency, which stood at +AOA 598.812,3 million.

As for off-balance sheet exposures, made up of Guarantees (Corporate Banking) and Undrawn Credit Limits, it is worth highlighting the +AOA 2.816.6 million (+2.4%) increase recorded in the ‘Guarantees (Corporate Banking)’ heading year-on-year.

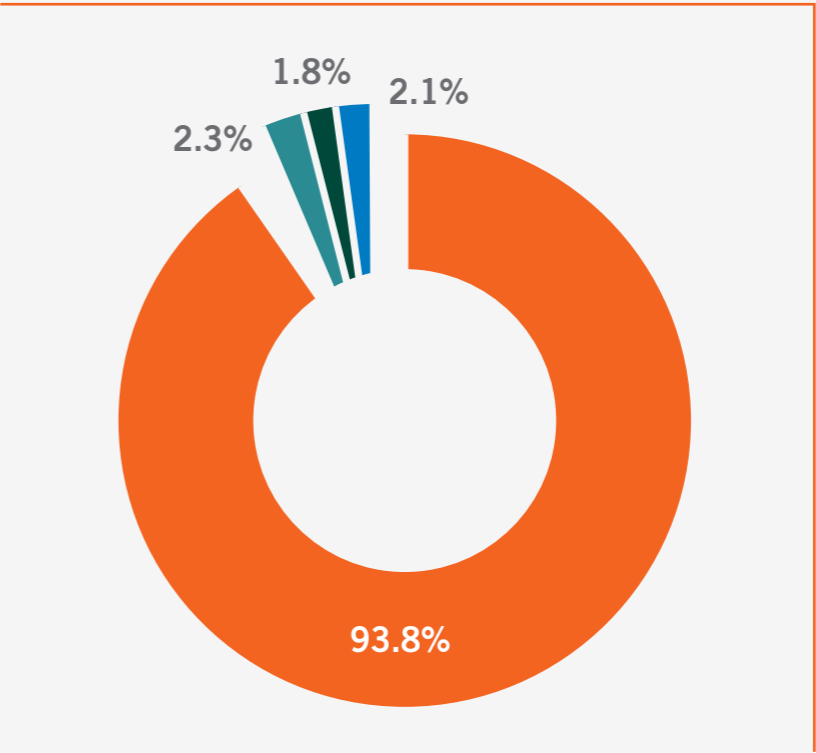

Liabilities

Liabilities rose by +7.2% (+AOA 207,034.8 million) YoY, standing at +AOA 3,084,966.8 million in H12024. BFA's total liabilities portfolio growth is mainly attributable to the +6% rise recorded in the 'Customer Deposits' heading, which accounts for 79% of the Total Liabilities Portfolio.

## Equity and Equivalent Capital

### Breakdown of BFA's Equity and Equivalent Capital

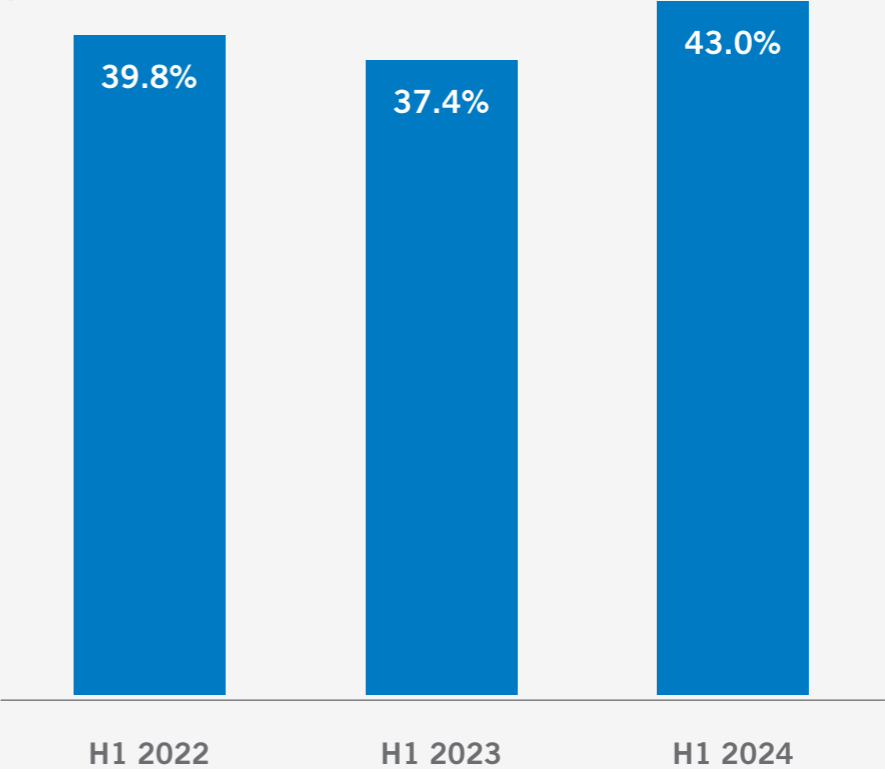

|  | Amounts expressed in AOA millions |           |        |
|--|-----------------------------------|-----------|--------|
|  | H1 23                             | H1 24     | Δ%     |
| Equity   |                                   |           |        |
| Share Capital                                    | 15 000.0                          | 45 000.0  | 200.0% |
| Other Reserves and Retained Earnings             | 385 016.4                         | 438 771.2 | 14.0%  |
| Net Profit for the Period on an individual basis | 83 050.6                          | 89 545.7  | 7.8%   |
| Total Equity                                     | 483 067.0                         | 573 316.9 | 18.7%  |

Equity and Equivalent Capital recorded a positive change in H1 2024, up by 18.7% year-on-year, totalling +AOA 573,316.9 million. This strong financial performance and positive change was mainly driven by a 14.0% increase in the ‘Other Reserves and Retained Earnings’ heading, totalling +AOA 53,754.8 million and, lastly, from a +7.8% growth in the ‘Net Profit’ heading, totalling +AOA 6,495.1 million.

### Total Capital Ratio

Total Capital Ratio stood at 43.0%, which represents an increase of 5.5 p.p. YoY and, a figure that remains comfortably higher than the regulatory threshold required by the National Bank of Angola, thereby attesting to the Bank’s financial autonomy, stability and capital adequacy levels. Overall, BFA’s balance sheet structure in June 2024 clearly reveals and demonstrates the pursuit of an ongoing liquidity strategy which, in line with the Bank’s corporate policy, enables the financial institution to finance 94.8% of its Total Assets Portfolio through a combination of ‘Customer Deposits’ and Shareholders’ Equity.

### Total Capital Ratio

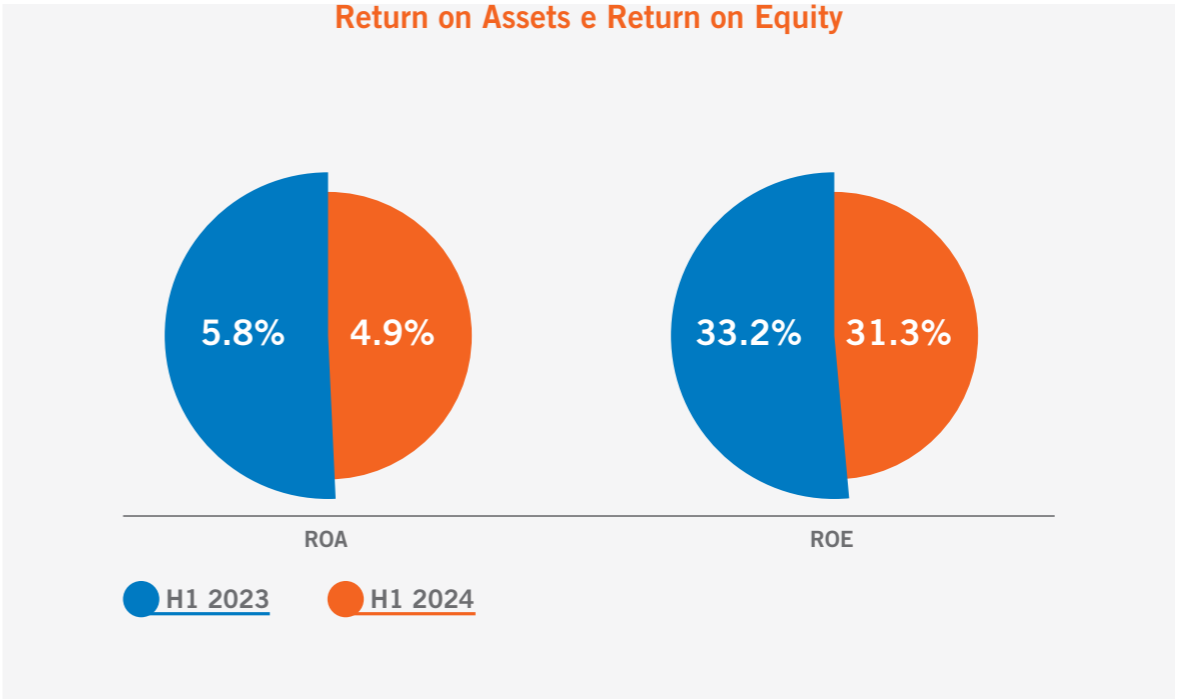

## Income Statement

Over the course of H1 2024, BFA's Net Profit amounted to +AOA 89,545.7 million, which corresponds to a year-on-year increase of +7.8% (+AOA 6,495.1 million).

The financial result is fundamentally the result of the significant growth in Banking Income of around AOA 21,278.9 million (+14.9%), which was driven by the increase in Net Interest Income, which rose by 17.0% to AOA 136.294,8 million

| Profit Before Taxes                          | 89 872.3                          | 97 286.3  | 8.2%    |
| Income Taxes                                 | -6 821.7                          | -7 740.5  | 13.5%   |
| Net Profit                                   | 83 050.6                          | 89 545.7  | 7.8%    |

Overall, up until H1 2024, BFA continued to be able to return and provide value to its Customers, Shareholders, Team Members, and other stakeholders, recording a Return-on-Equity (ROE) ratio of +31.3% and a Return-on-Assets (ROA) ratio of +4.9%.

Net Financial Income Development

Net Financial Income amounted to +AOA 136,294.8 million, up by +AOA 19,815.0 million year-on-year and representing a growth of +17.0%.

| Amounts expressed in AOA millions           |           |           |        |
|---|-----------|-----------|--------|
|   | H1 23     | H1 24     | Δ%     |
| Interest and similar income                 | 146 618.3 | 174 695.8 | 19.2%  |
| Income from Short-term Investments          | 23 671.5  | 40 629.5  | 71.6%  |
| Income from Securities Investments          | 89 303.1  | 87 659.9  | -1.8%  |
| Income from Loans and Advances to Customers | 33 643.7  | 46 406.3  | 37.9%  |
| Interest and similar charges                | 30 138.5  | 38 401.0  | 27.4%  |
| Deposit Costs                               | 29 441.8  | 36 587.4  | 24.3%  |
| Other Costs                                 | 696.8     | 1 813.5   | 160.3% |
| Net Financial Income                        | 116 479.8 | 136 294.8 | 17.0%  |

The Net Financial Income growth was primarily driven by the increase in income from short-term investments, highlighting short-term investments at Central Bank & other Credit Institutions and income from loans, which rose by +71.6% and +37.9%, respectively. As far as Interest and charges of the Net Financial Income are concerned, this figure rose by +27.4%.

In H1 2024, BFA's Non-Interest Income accounted for +83.1% of BFA's Operating Income, representing an increase of +1.5 p.p. in its contribution to the Bank's revenue YoY.

Non-Interest Income Development

| Amounts expressed in AOA millions  |          |          |         |
|--|----------|----------|---------|
|  | H1 23    | H1 24    | Δ%      |
| Income and Charges from Banking Services Fees and Commissions                              | 8 010.4  | 11 270.2 | 40.7%   |
| Income from financial assets and liabilities measured at fair value through profit or loss | -935.1   | 4 119.4  | 540.5%  |
| Foreign Exchange gains/(losses)  | 11 382.1 | 15 399.1 | 35.3%   |
| Disposal of other assets gains/(losses)  | 45.7     | 81.2     | 77.5%   |
| Other Operating Income   | 7 658.7  | -3 244.2 | -142.4% |
| Non-Interest Income  | 26 161.9 | 27 625.8 | 5.6%    |

Non-Interest Income stood at +AOA 27,625.8 million, up by +5.6% YoY. This positive financial performance was mainly driven by an increase of +AOA 5,054.5 million (+540.5%) in Income from Financial Assets and Liabilities Measured at Fair Value through Profit or Loss totalling +AOA 4,119.4 million. This positive performance was mainly driven by gains resulting from the Revaluation of available-for-sale financial assets (i.e. Trading Portfolio Fair Value Revaluation) and, additionally, due to the +35.3% increase in Foreign Exchange Income (+AOA 4,017.0 million, YoY), as a result of the Bank's financial ability to provide foreign currency to its customer base for foreign exchange transactions.

The above-mentioned increases in earnings offset the decrease recorded in the 'Other Operating Income' heading, which was due to the recovery of administrative costs incurred during the course of H1 2023.

## Overheads Development

| Amounts expressed in AOA millions         |              |              |              |
|---|--------------|--------------|--------------|
|   | H1 23        | H1 24        | Δ%           |
| Staff Costs (I)                           | 31 477.3     | 34 272.2     | 8.9%         |
| Third-Party Supplies and Services (II)    | 17 496.8     | 20 360.9     | 16.4%        |
| Depreciation and Amortisation Costs (III) | 6 368.3      | 7 865.7      | 23.5%        |
| Overheads (I + II + III)                  | 55 342.4     | 62 498.8     | 12.9%        |
| <b>Cost-to-Income Ratio</b>               | <b>38.8%</b> | <b>38.1%</b> | <b>-0.7%</b> |

Overheads rose by +AOA 7,156.3 million (+12.9%) YoY. The headings with the highest contribution to this development were as follows: Third-party Supplies and Services, up by +AOA 2,864.2 million (+16.4%) and Staff Costs, up by +AOA 2,794.8 million (+8.9%), resulting from the fact that the Bank increased the remuneration of its Team Members with a view to improving their purchasing power.

BFA also experienced a slight improvement in the Cost-to-Income ratio, going from 38.8% to 38.1%, mainly driven by the sharp increase recorded in the ‘Operating Income’ heading.

## Provisions and Impairment

| Amounts expressed in AOA millions                                     |                 |                |                |
|---|-----------------|----------------|----------------|
|   | H1 23           | H1 24          | Δ%             |
| Provisions net of impairment losses reversals                         | -2 649.3        | -104.9         | -96.0%         |
| Impairment on loans to customers net of reversals and write-backs     | -185.9          | 4 457.7        | -2 498.3%      |
| Impairment on other financial assets net of reversals and write-backs | 268.1           | -368.6         | -237.5%        |
| Impairment on other assets net of reversals and write-backs           | -6.0            | 151.3          | -2 640.0%      |
| <b>Total Provisions and Impairment</b>                                | <b>-2 573.1</b> | <b>4 135.5</b> | <b>-260.7%</b> |

Provisions and impairments net of reversals and recoveries, amounted to +AOA 4 135.5 million in H1 2024, corresponding to an increase of +AOA 6 708.6 million YoY.

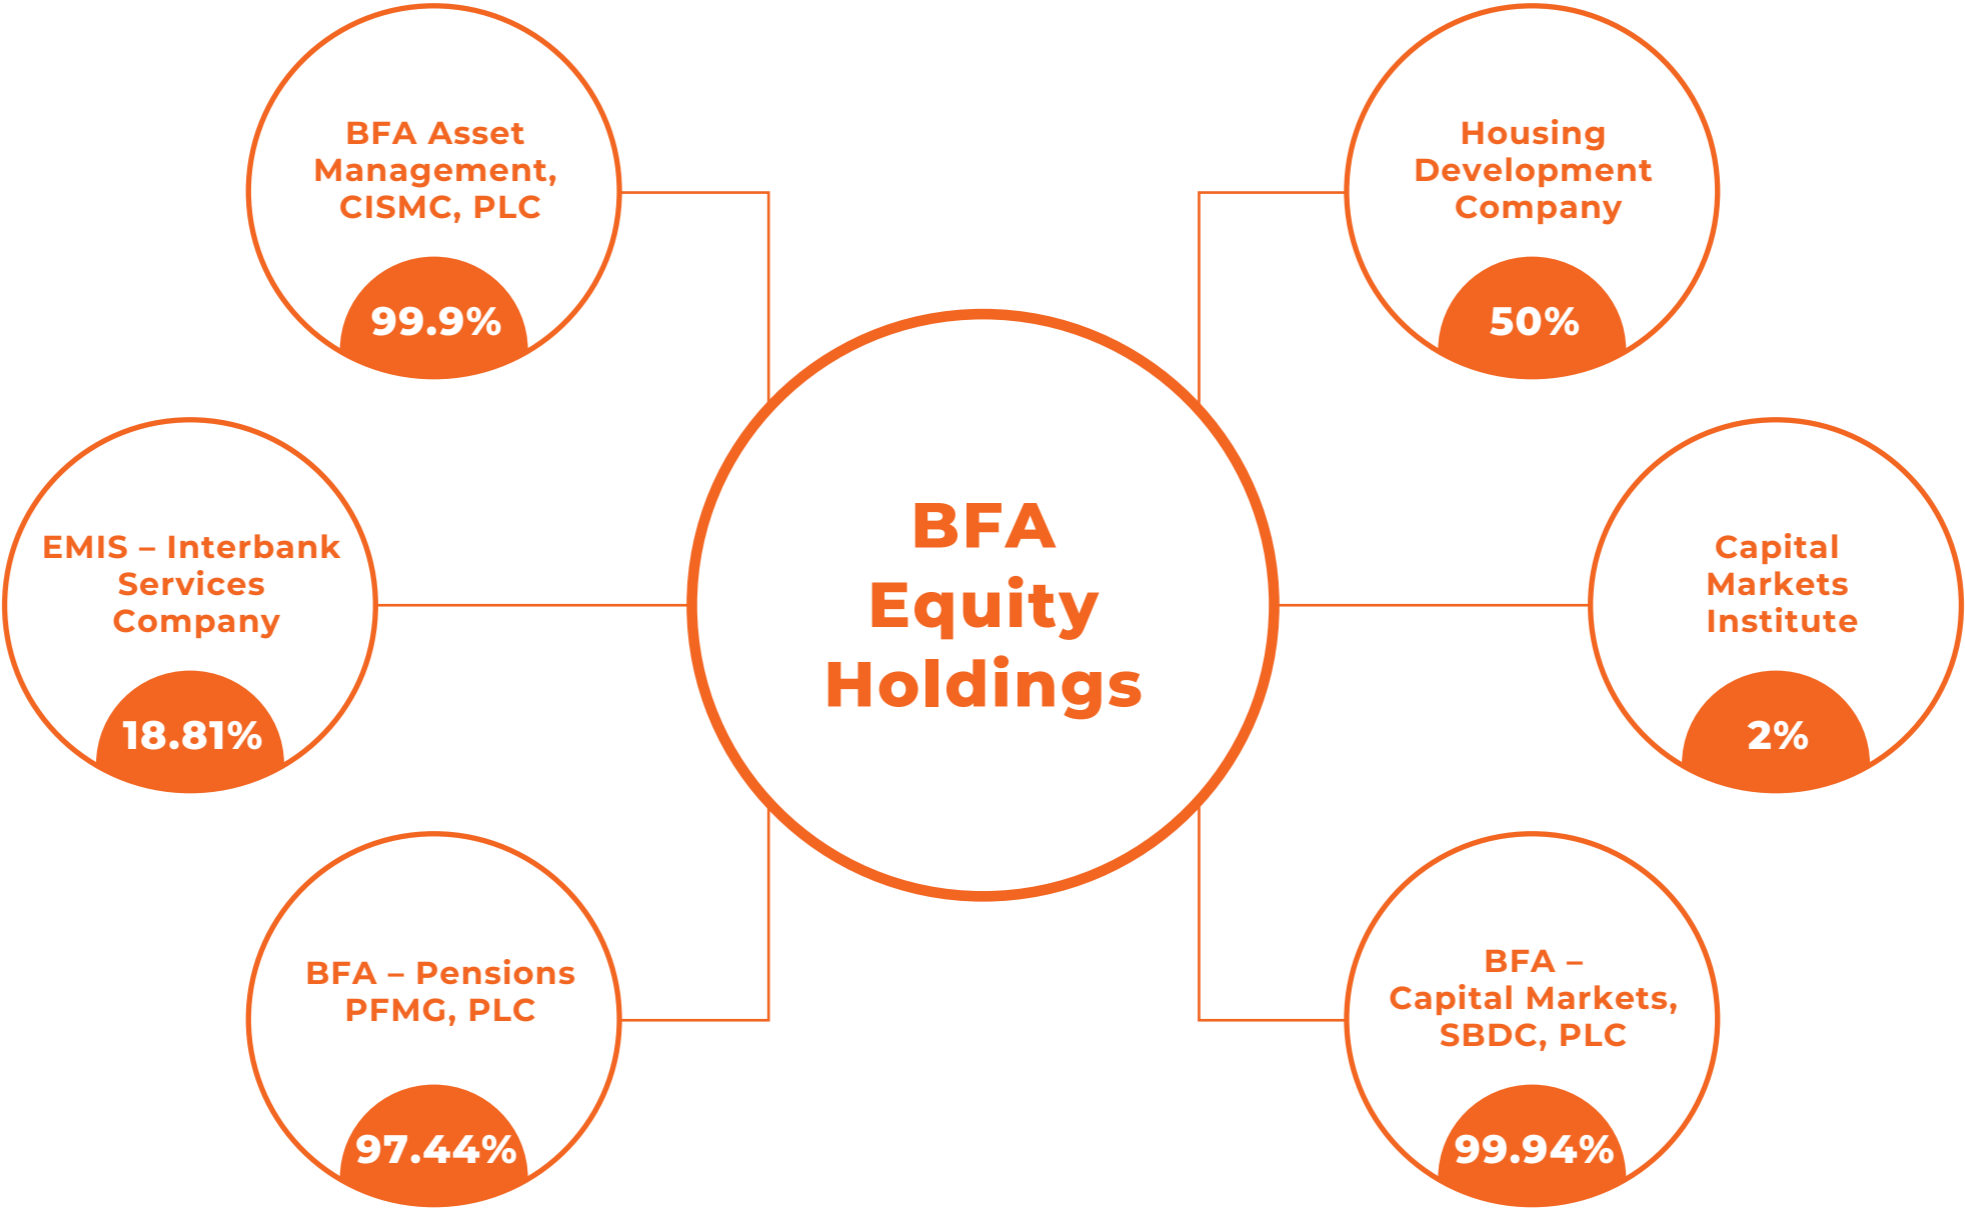

This growth was mainly driven by the surge recorded in impairments for loans and advances to customers net of reversals and recoveries (amounting to +AOA 4,643.5 million), as a result of the increased exposure of the loan portfolio that took place during 2024, totalling +AOA 4,457.7 million.

| Total Liabilities + Total Equity  | 648.3  | 3 961.4 | 511.0%   |
| Net Profit/ (Loss)                |        |         |          |
| Operating Income                  | 4.8    | 1 515.3 | 31620.0% |
| Overheads                         | 122.8  | 817.2   | 565.7%   |
| Net Profit                        | -118.0 | 534.9   | 553.4%   |

BFA Capital Markets’ Net Assets portfolio amounted to +AOA 3 961.4 million in H1 2024, which represents an increase of +AOA 3 313.0 million (+511%) year-on-year. This financial performance was mainly driven by a growth of +AOA 3 081.5 million (+100%) recorded in the High-Liquidity Short-term Investments heading, corresponding to Term Deposits placed with Domestic Banks.

BFA Capital Markets’ liabilities amounted to +AOA 2,816.0 million, while Shareholders’ Equity totalled +AOA 1,145.4 million.

BFA Capital Markets ended the year with a Net Profit of +AOA 534.9 million, which represents an increase of +AOA 652.9 million compared to the negative -AOA 118.0 million recorded in FY2023. This positive performance is mainly attributable to the fact that BFA Capital Markets began operations in the second half of FY2023, recording a much lower turnover during the period under review. Additionally, the growth recorded in Income from Financial Intermediation Services, particularly in the securities commissions heading, outpaced the rise experienced in Overheads.

| Net Profit                        | 0.0     | 184.8   | 100.0%   |

BFA Pension Fund Management Company (‘BFA PFMC’) Net Assets amounted to +AOA 2,080.6 million in H12024, up by +105.2% year-on-year. This positive financial change was mainly driven by the increase recorded in the ‘Other Assets’ heading, as a result of investments made in software during H1 2024, as well as accrued income to be recognised from the provision of services rendered.

BFA PFMC’s Equity and Liabilities recorded a positive change of +AOA 1,066.4 million (+105.2%) year-on-year. This positive financial growth was primarily driven by a substantial increase recorded in the ‘Other Liabilities’ heading, up by approximately +1,199.0% (+AOA 1 368.9 million) YoY, stemming from amounts to be paid to BFA parent company under a re-debit agreement.

BFA PFMC’s Net Profit stood at +AOA 184.8 million, primarily due to the ‘Income from Management Fees’ heading. It’s worth highlighting that in June 2023, this BFA’s subsidiary had no business activity.

| Overheads                         | 525.6   | 758.7   | 44.4%  |
| Net Profit                        | 92.8    | 113.8   | 22.6%  |

As of June 2024, BFA Asset Management (‘BFA AM’) recorded a Net Assets growth of +AOA 360.9 million, up by +AOA 13.3% YoY, mainly as a result of new securities purchases from the company’s proprietary portfolio.

Total Equity and Liabilities recorded a positive change of +13.3% YoY, amounting to +AOA 3.075.7 million in June 2024. Other Liabilities experienced a decrease of -9.0%, corresponding to an amount of -AOA 78.4 million, stemming primarily from the recognition of tax contingencies from FY2023.

BFA Asset Management’s Net Profit amounted to +AOA 113.8 million in H1 2024, up by +22.6% YoY. As far as the ‘Income’ heading is concerned, BFA AM recorded a strong increase in the ‘Interest and Other Income’ item, highlighting management fees & commissions which amounted to +AOA 134.0 million, driven by the addition of one more Investment Fund compared to June 2023.

# Notes to the Financial Statements as at 30 June 2024

## 1. INTRODUCTION

Banco de Fomento Angola, S.A. (hereinafter also referred to as Bank or BFA), was incorporated by Public Deed on 26 August 2002, following the transformation of the Angolan Branch of Banco BPI, S.A. into a bank under local law, and is fully owned by BPI.

In 2008, BPI sold 49.9% of its stake in the Bank to Unitel, S.A..

As indicated in Note 19, on 5 January 2017, in execution of the share purchase and sale agreement entered into 2016, the sale by Banco BPI to Unitel of the shareholding representing 2% of BFA's share capital was completed. Thus, on 30 June 2024 and 31 December 2023, BFA was majority held by Unitel, S.A., with a stake of 51.9%.

The Bank is engaged in obtaining funds from third parties in the form of deposits or other funds, which it invests, together with its own funds, in the granting of loans, deposits in the Banco Nacional de Angola, investments in credit institutions and acquisition of securities or other assets, for which it is duly authorized. It also provides other banking services and performs various types of operations in foreign currency, having for this purpose, as at 30 June 2024, a national network of 158 branches, 11 investment centers, 7 large corporate centers, 4 Oil & Gas and Public Sector centers, 11 medium corporate centers and 1 Private Banking center.

## 2. BASIS OF PRESENTATION AND SUMMARY OF MAIN ACCOUNTING POLICIES

### 2.1 Basis of presentation

The Bank's financial statements have been prepared on the going concern assumption and in accordance with International Financial Reporting Standards (IFRS), pursuant to Notice No. 5/2019, of 30 August of the Banco Nacional de Angola IFRS includes accounting standards, issued by the International Accounting Standards Board (IASB) and interpretations issued by the International Financial Reporting Interpretation Committee (IFRIC).

The Bank's financial statements now presented relate to the period ended 30 June 2024. These condensed interim financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting (IAS 34). Thus, these financial statements do not include all the information required by IFRS, and therefore should be read in conjunction with the financial statements for the period ended 31 December 2023.

The accounting policies used by the Bank in the preparation are consistent with those used in the preparation of the financial statements as at 31 December 2023 and 30 June 2023, except for the new standards issued.

The Bank's financial statements are stated in thousands of Kwanzas, rounded to the nearest thousand. The financial statements were prepared in accordance with the historical cost principle, modified by the application of the fair value to derivative financial instruments and financial assets and liabilities recognized at fair value through profit or loss. Other financial assets and liabilities and other non-financial assets and liabilities are recorded at amortized cost or historical cost.

The preparation of the financial statements in accordance with IAS/IFRS requires the Bank to make judgments and estimates and uses assumptions which affect the application of accounting policies and the amounts of income, expenses, assets and liabilities. Changes or differences between such assumptions and reality may have impacts on the actual estimates and judgments. The areas involving a higher degree of judgment or complexity, or areas where significant assumptions and estimates are made in preparing the financial statements are discussed in Note 3.

The condensed interim financial statements for the six-month period ended 30 June 2024 were approved at the meeting of the Bank's Board of Directors on 13 September 2024.

The recently issued accounting standards and interpretations that have not yet come into force and that the Bank has not yet applied in the preparation of its financial statements can be analyzed in Note 31.

2.2 Transactions in foreign currency

Transactions in foreign currency are translated into the functional currency (Kwanza) at the exchange rate prevailing on the transaction date

Foreign currency transactions are recorded in accordance with the principles of the multi-currency system, with each transaction being recorded according to the respective denomination currencies. Assets and liabilities stated in foreign currency are translated into Kwanzas at the exchange rate published by the Banco Nacional de Angola as at the balance sheet date. Non-monetary assets and liabilities recorded at fair value are translated into the functional currency at the exchange rate published by the Banco Nacional de Angola on the date the fair value is determined and recognized against profit or loss. Income and expenses related to exchange rate differences, whether realized or potential, are recorded in the income statement in the period in which they occur under Foreign exchange gains/(losses). The “forward currency position” transactions relate to currency forward contracts, and the related income and expenses are recorded under the caption Net gains/(losses) on financial assets and liabilities at fair value through profit or loss in the income statement.

As at 30 June 2024, 31 December 2023 and 30 June 2023, the exchange rates of the Kwanza (AOA) against the United States Dollar (USD) and the Euro (EUR) were as follows:

|       | 30/06/2024 | 31/12/2023 | 30/06/2023 |
|-------|------------|------------|------------|
| 1 USD | 853.629    | 828.800    | 822.940    |
| 1 EUR | 913.725    | 915.990    | 899.227    |

Forward foreign exchange position

The forward currency position corresponds to the net balance of forward transactions pending settlement. All contracts related to these transactions are revalued at market forward exchange rates.

The difference between the equivalent in Kwanzas at the forward revaluation rates applied, and the equivalent at the contracted rates, is recorded under assets or liabilities, against income or expenses, respectively.

2.3 Financial instruments

2.3.1 Classification of financial assets

In accordance with IFRS 9 - Financial Instruments, financial assets can be classified into three categories with different measurement criteria:

- Amortized cost;
- Fair value through other comprehensive income (FVOCI); and
- Fair value through profit or loss (FVTPL).

The classification of financial assets depends on the business model and the contractual cash flow characteristics (SPPI criterion).

Business model

The business models foreseen in the standard are as follows:

- Business model whose objective is achieved by holding the asset to maturity to collect the contractual cash flows therefrom (Held to collect);
- Business model whose objective is achieved both by collecting the contractual cash flows from the asset and selling it (Held to collect and sell); and
- Other business models (e.g., trading).

Evaluation of the business model

The business model reflects the way the Bank manages its assets from a cash-flow generation standpoint. Thus, it is important to understand whether the objective of the Bank is only to receive the contractual cash flows from the assets or whether it intends to receive the contractual cash flows and the cash flows resulting from the sale of the assets. If none of these situations apply (e.g., financial assets are held for trading), the financial assets are classified as part of “other business models” and recognized at fair value through profit or loss.

The factors considered by the Bank in identifying the business model for a set of assets include past experience with respect to the way (i) cash flows are received, (ii) asset performance is assessed and reported to management, (iii) risks are assessed and managed and (iv) directors are remunerated.

Financial assets at fair value through profit or loss are held essentially for the purpose of being sold in the short term, or to form part of a portfolio of jointly-managed financial instruments, for which there is clear evidence of a recent pattern of short-term gains. These assets are classified under “other business models” and recognized at fair value through profit or loss.

The evaluation of the business model does not depend on the intentions for an individual instrument, but for a set of instruments, and considers the frequency, the value, the sales calendar in previous periods, the reasons for the referred sales and the

expectations regarding future sales. Sales that are infrequent, or insignificant, or close to the maturity of the asset and those motivated by an increase in the credit risk of the financial assets, or to manage concentration risk, among others, may be compatible with the model of holding assets to receive contractual cash flows.

If a financial asset contains a contractual clause that can modify the timing or the amount of the contractual cash flows (such as early amortization or extension of term clauses), the Bank determines whether the cash flows that will be generated during the life of the instrument, due to the exercise of that contractual clause, are solely payments of principal and interest on the principal amount outstanding.

In the event that a financial asset includes a periodic interest rate adjustment, but the frequency of such adjustment does not coincide with the benchmark interest rate (for example, the interest rate is adjusted every three months), the Bank assesses, at the time of the initial recognition, this inconsistency in the interest component to determine whether the contractual cash flows represent solely payments of principal and interest on the principal amount outstanding.

Contractual conditions that, at the time of the initial recognition, have a minimal effect on cash flows or depend on the occurrence of exceptional or highly unlikely events (such as redemption by the issuer) do not prevent their classification in portfolios at amortized cost or at fair value through other comprehensive income.

SPPI assessment

When the business model involves holding assets in order to (i) collect contractual cash flows or (ii) collect contractual cash flows and sell these assets, the Bank assesses whether the cash flows of the financial instrument correspond solely to payments of principal and interest on the principal amount outstanding (SPPI test). In this assessment, the Bank considers whether the contractual cash flows are consistent with a basic loan agreement, that is, the interest includes only considerations regarding the time value of money, credit risk and a profit margin that is consistent with a basic loan agreement. When the contractual terms introduce exposure to risk or variability in cash flows that are inconsistent with a basic loan agreement, the financial instrument is classified and measured at fair value through profit or loss.

The financial assets with embedded derivatives are considered in their entirety, when determining whether the cash flows correspond solely to payments of principal and interest on the principal outstanding (SPPI test).

Financial liabilities at amortized cost

The Bank measures a financial asset at amortized cost if it complies, simultaneously, with the following characteristics and if it is not designated at FVTPL by option (use of the Fair Value Option):

- the financial asset is held in a business model whose main purpose is to hold the assets to collect its contractual cash flows (HTC - Held to collect); and

- its contractual cash flows occur on specific dates and correspond solely to payments of principal and interest on the principal amount outstanding (SPPI).

These instruments are initially recorded at fair value and subsequently valued at amortized cost, based on the effective interest rate method, and are subject to impairment tests.

This category of Financial assets at amortized cost includes Other loans and advances to credit institutions, Loans and advances to customers, debt securities and other financial instruments (Investments at amortized cost) managed based on a business model whose objective is to receive its contractual cash flows.

#### **Financial assets at fair value through other comprehensive income**

The Bank measures a financial asset at fair value through other comprehensive if it complies, simultaneously, with the following characteristics and if it is not designated at FVTPL by option (use of the Fair Value Option):

- the financial asset is held in a business model whose objective is to hold the assets to collect its contractual cash flows and/or sell them (HTC and Sell – Held to collect and Sell); and
- its contractual cash flows occur on specific dates and correspond solely to payments of principal and interest on the principal amount outstanding (SPPI - Solely Payments of Principal and Interest).

On initial recognition of an equity instrument that is not held for trading, the Bank may irrevocably assign it to this category. This designation is made on a case-by-case, investment-by-investment basis and is only available for financial instruments that meet the definition of equity instruments under IAS 32 and may not be used for financial instruments classified as equity instruments at issuer level under the exceptions provided for in paragraphs 16A to 16D of IAS 32.

Financial assets at fair value through other comprehensive income are initially recorded at fair value. Gains and losses relating to subsequent changes in fair value are reflected in a specific item of equity (Reserves of financial assets at fair value through other comprehensive income) until they are sold, where they are reclassified to profit or loss for the period, except for equity instruments which are reclassified to retained earnings. Additionally, they are subject, since their initial recognition, to calculation of impairment losses (debt instruments only).

Interest income is calculated in accordance with the effective interest rate method and recognized in the income statement under the caption Interest income and similar income. Income from variable-income securities is recognized in the income statement caption Income from equity instruments on the date when it is attributed. In accordance with this criterion, prepaid dividends are recorded as income in the year the distribution is decided.

#### **Financial assets at fair value through profit or loss**

All financial assets that are not measured according to the methods described above are measured at fair value through profit or loss.

Debt instruments whose contractual cash flow characteristics do not meet the SPPI criterion, and which would otherwise be measured at amortized cost or at fair value through other comprehensive income, are required to be measured at fair value through profit or loss.

This category also includes assets acquired for the purpose of realizing gains from short-term fluctuations in market prices. This category also includes derivative financial instruments, excluding those that comply with hedge accounting requirements. By default, equity instruments are also classified at fair value through profit or loss, unless the entities opt for the irrevocable classification at fair value through other comprehensive income as referred to above.

In addition, at initial recognition, the Bank may irrevocably classify a financial asset, which otherwise meets the requirements to be measured at amortized cost or at fair value through other comprehensive income, as at fair value through profit or loss if the classification significantly eliminates the accounting mismatch that would otherwise exist (Fair Value Option).

Financial assets classified in this category are initially recognized at fair value. Gains and losses arising from subsequent valuation at fair value are recognized in the income statement. Income is reflected in the respective captions of Interest and similar income.

Equity instruments

Equity instruments are instruments that meet the definition of capital from the issuer’s perspective, which means, instruments that do not contain a contractual payment obligation and that evidence a residual interest in the issuer’s net assets. An example of equity instruments are ordinary shares.

Investments in equity instruments are an exception to the general measurement criteria described above. As a general rule, the Bank has the option, on initial recognition, to designate, irrevocably, in the category of financial assets at fair value through other comprehensive income, the investments in equity instruments that are not classified as held for trading and that, in the event it did not exercise this option, would be classified as financial assets that are mandatorily accounted for at fair value through profit or loss.

2.3.2 Classification of financial liabilities

An instrument is classified as a financial liability when there is a contractual obligation for its settlement to be realized through the delivery of cash or another financial asset, regardless of its legal form.

Financial liabilities are classified into the following categories:

i. Financial liabilities at amortized cost

Financial liabilities correspond essentially to Deposits from central banks and other credit institutions and Deposits from customers and other loans. These liabilities are initially measured at fair value, which normally corresponds to the consideration received, net of transaction costs, and are subsequently recorded at amortized cost, in accordance with the effective interest method.

ii. Financial liabilities held for trading

This category includes derivative financial instruments with a negative fair value.

iii. Financial liabilities at fair value through profit or loss (Fair Value Option)

The Bank designates, at initial recognition, certain financial liabilities at fair value through profit or loss (Fair Value Option) provided that at least one of the following requirements is met:

- the financial liabilities are managed, measured and analyzed internally based on their fair value;
- derivative operations are contracted to hedge these assets or liabilities economically, thus ensuring consistency in the measurement of the assets or liabilities and the derivatives (accounting mismatch); and
- the financial liabilities contain embedded derivatives.

2.3.3 Recognition and initial measurement of financial instruments

At the time of their initial recognition, all financial instruments are recorded at their fair value. For financial instruments that are not recorded at fair value through profit or loss, fair value is adjusted by adding or subtracting transaction costs directly attributable to their acquisition or issue. In the case of financial instruments at fair value through profit or loss, the directly attributable transaction costs are immediately recognized in the income statement.

Transaction costs are defined as expenses directly attributable to the acquisition or disposal of a financial asset, or to the issue or assumption of a financial liability, which would not have been incurred if the Bank had not carried out the transaction. These include, for example, commissions paid to intermediaries (such as promoters) and mortgage formalization expenses.

Financial assets are recognized in the balance sheet on the transaction date - the date on which the Bank commits to purchase the assets, unless there is a contractual stipulation or applicable legal figure that determines that the transfer of rights occurs at a later date.

At initial recognition, when the fair value of financial assets and liabilities differs from the transaction price, the entity should recognize this difference as follows:

- When the fair value is evidenced by a quotation on an active market of an equivalent asset or liability (that is, level 1 inputs) or based on a valuation technique that uses only observable market data, the difference is recognized as a gain or loss, and

- In the remaining cases, the difference is deferred, and the moment of initial recognition of the gain or loss is determined individually. This difference can then be (i) amortized over the life of the instrument, (ii) deferred until the fair value of the instrument can be determined using observable market data, or (iii) recognized through the liquidation of the asset or liability.

#### 2.3.4 Subsequent measurement of financial instruments

After its initial recognition, the Bank measures its financial assets at (i) amortized cost, at (ii) fair value through other comprehensive income, or at (iii) fair value through profit or loss.

Trade receivables from commercial operations that do not have a significant financing component and commercial loans and short-term debt instruments that are initially measured at the transaction price or by the principal outstanding, respectively, are valued at the aforementioned amount less impairment losses.

Immediately after initial recognition, an impairment is also recognized for expected credit losses (ECL), for financial assets measured at amortized cost and investments in debt instruments measured at fair value through other comprehensive income, resulting in the recognition of a loss in results when the asset is originated.

Financial liabilities are initially recorded at fair value less transaction costs incurred and subsequently at amortized cost, based on the effective interest rate method, with the exception of financial

liabilities designated at fair value through profit or loss, which are recorded at fair value.

The subsequent measurement of financial liabilities is generally performed at amortized cost. There are some exceptions to this measurement basis, namely:

- Financial liabilities that are held for trading or when fair value option is applied – the subsequent measurement consists of fair value through profit or loss.
- Financial guarantees – the subsequent measurement consists of the higher of the corresponding expected credit losses and the amount of the initial fee received less the amounts already recognized as revenue in accordance with IFRS 15.

#### 2.3.5 Income and expenses of financial instruments

Income and expenses from financial instruments at amortized cost are recognized according to the following criteria:

- Interest is recorded in the income statement under Interest and similar income and Interest and similar expense, using the effective interest rate of the transaction on the gross book value of the transaction (except for impaired assets where the interest is applied on the book value net of impairment) and the interest already recognized and unpaid relating to overdue loans for more than 90 days is reversed, being recognized only when received since it is considered that its recovery is remote, and recognized off balance sheet; and

- The remaining changes in value will be recognized in the income statement as income, or expenses, when the financial instrument is derecognized from the balance sheet under Net gains/(losses) on investments at amortized cost, when it is reclassified, and in the case of financial assets, when there are impairment losses or gains through recovery, which are recorded under Impairment of loans and advances to customers net of reversals and recoveries, in the case of loans and advances to customers or under Impairment of other financial assets net of reversals and recoveries, in the case of other financial assets.

In order to determine the effective interest rate, the Bank estimates future cash flows considering all contractual terms of the financial instrument, without considering possible impairment losses. The calculation includes all fees paid or received considered as part of the effective interest rate, transaction costs and all other premiums or discounts directly related with the transaction, except for assets and liabilities at fair value through profit or loss.

Treasury Bonds issued in national currency indexed to the exchange rate of the United States Dollar (hereinafter US Dollar) are subject to exchange rate adjustments. The result of the exchange rate adjustments is reflected in the income statement for the period in which it occurs. The result of the exchange rate adjustment of the nominal value of the security is recorded in the caption Foreign exchange gains/(losses) and the result of the exchange rate adjustment of the discount and accrued interest is recorded under Net interest income – Interest and similar income.

Income and expenses from financial instruments at fair value through profit or loss are recognized according to the following criteria:

- i. Changes in fair value are recorded directly in the income statement, separating the portion attributable to the instrument's income, which is recorded as interest or dividends according to its nature under the captions Interest and similar income and Income from equity instruments, respectively, and the remainder, which is recorded as results of financial operations under the caption Net gains/(losses) on financial assets and liabilities at fair value through profit or loss; and
- ii. Interest on debt instruments is recorded in the income statement under the caption Interest and similar income and is calculated using the effective interest rate method.

Income and expenses from financial instruments at fair value through profit or loss are recognized according to the following criteria:

- i. Interest or, when applicable, dividends are recognized in the income statement under the caption Interest and similar income and Income from equity instruments, respectively. For interest, the procedure is the same as for assets at amortized cost;

- ii. Foreign exchange differences are recognized in the income statement under Foreign exchange gains/(losses), in the case of monetary financial assets, and in other comprehensive income, in the case of non-monetary financial assets;
- iii. In the case of debt instruments, impairment losses or reversals are recognized in the income statement under the caption Impairment losses on other financial assets, net of reversals and recoveries; and
- iv. The remaining changes in value are recognized in other comprehensive income.

Thus, when a debt instrument is measured at fair value through other comprehensive income, the amounts recognized in the income statement for the financial year are the same as those that would be recognized if measured at amortized cost.

When a debt instrument measured at fair value through other comprehensive income is derecognized from the balance sheet, the gain or loss recorded in other comprehensive income is reclassified to the net profit/(loss) for the period. On the other hand, when an equity instrument measured at fair value through other comprehensive income is derecognized from the balance sheet, the gain or loss recorded in other comprehensive income is not reclassified to the profit and loss account, remaining under a caption of reserves.

2.3.6 Reclassification between categories of financial instruments

Financial assets are not reclassified after their initial recognition, except in the period after the Bank changes its business model for managing financial assets. Financial assets are reclassified to other categories only if the business model used in their management is changed. In this case, all affected financial assets are reclassified. The reclassification is applied prospectively from the date of reclassification, and any previously recognized gains, losses (including those related to impairment) or interest are not restated. Financial assets, at the date of their reclassification, are measured at fair value.

The reclassification of investments in equity instruments measured at fair value through other comprehensive income, or financial instruments designated at fair value through profit or loss, is not allowed.

The reclassification of financial liabilities is not allowed.

During the six-month period ended 30 June 2024, the Bank did not reclassify any financial instruments.

2.3.7 Fair value

In accordance with IFRS 13, financial instruments at fair value are measured according to the valuation levels described in Note 30.4.

2.3.8 Modification of loans and advances

The Bank occasionally renegotiates or modifies contractual cash flows from loans and advances to customers. In this situation, the Bank assesses whether the new terms of the contract are substantially different from the original terms. The Bank performs this analysis considering, among others, the following factors:

- If the debtor is in financial difficulty, whether the modification only reduces the contractual cash flows to an amount that the debtor is expected to be able to pay;
- If any significant new term has been introduced, such as profit-sharing or an equity-based return, which substantially affects credit risk;
- Significant extension of the maturity of the contract when the debtor is not in financial difficulties;
- Significant change in the interest rate;
- Change in the currency in which the loan was contracted; and
- Inclusion of a collateral, a guarantee or other improvement associated with the loan, which significantly affects the credit risk associated with the loan.

If the terms of the contract are significantly different, the Bank derecognizes the original financial asset and recognizes the new asset at fair value, calculating its new effective interest rate. The renegotiation date is considered the initial recognition date for the purpose of calculating the impairment, including for the purpose of assessing whether a significant increase in credit risk has occurred.

However, the Bank also assesses whether the newly recognized financial asset is impaired at initial recognition, especially when the renegotiation is related to the fact that the debtor has not made the payments originally agreed. Differences in the book value are recognized in the income statement, as a derecognition gain or loss.

If the terms of the contract are not significantly different, the renegotiation, or modification, does not result in derecognition and the Bank recalculates the gross book value based on the revised cash flows of the financial asset and recognizes a gain or loss from this modification in the income statement.

The new gross book value is recalculated discounting the modified cash flows at the original effective interest rate (or adjusted effective interest rate for impaired financial assets, originated or acquired).

After the modification, the Bank can determine that the credit risk has improved significantly and that the assets have moved from Stage 3 to Stage 2 (lifetime ECL) or from Stage 2 to Stage 1 (12 month-ECL). This situation can only occur when the performance of the modified asset is in accordance with the new terms of the contract for a period of twelve consecutive months. Additionally, the Bank continues to monitor whether there has been a significant increase in the credit risk of these assets, applying specific models for modified assets.

2.3.9 Derecognition not resulting from a modification

Financial assets granted are derecognized when the associated cash flows are extinguished, collected or disposed of to third parties and (i) the Bank substantially transfers all risks and rewards of ownership of the asset, or (ii) the Bank neither transfers nor substantially holds all the risks and rewards of ownership of the asset and does not hold control over the asset. Gains and losses obtained from the definitive sale of loans and advances to customers are recorded under Other operating income/(expenses). These gains or losses correspond to the difference between the sales value set and the book value of those assets, net of impairment losses.

The Bank participates in transactions in which it has the contractual right to receive cash flows from assets but assumes a contractual obligation to pay those cash flows to other entities and transfers substantially all the risks and rewards. These transactions result in the derecognition of the asset if the Bank:

- Has no obligation to make payments unless it receives equivalent amounts from the assets;
- Is prohibited from selling or pledging the assets; and
- Is obliged to remit any cash flow it receives from the assets without material delays.

The guarantees granted by the Bank (shares and bonds) through repurchase agreements and securities lending and borrowing operations are not derecognized because the Bank holds substantially all the risks and rewards based on the pre-established repurchase price, and therefore the derecognition criteria are not met (see Note 2.4).

Financial liabilities are derecognized when the underlying obligation is settled, expires, or is canceled.

**2.3.10 Write-off policy**

The Bank writes off financial assets, in part or in whole, when it concludes that there is no reasonable expectation of collection. The indicators that demonstrate that there is no reasonable expectation of collection are (i) the shutdown of the activity and (ii) the cases in which the recovery depends on the collection of a collateral, but in which the value of the collateral is so low that there is no reasonable expectation of fully recovering the asset.

The rules implemented for the selection of loans that may be written off from assets are as follows:

- The loans cannot be under a risk-sharing protocol;
- The loans must be past due for more than 210 days; and
- The loans cannot be marked as overdue renegotiated loans or be part of an active payment agreement.

**2.3.11 Impairment of financial assets**

The Bank determines impairment losses for debt instruments that are measured at amortized cost and at fair value through other comprehensive income, as well as for other exposures that have an associated credit risk such as bank guarantees and commitments assumed.

The requirements of IFRS 9 aim to recognize expected losses from operations, assessed on an individual or collective basis, considering all reasonable, reliable, and duly substantiated information that is available, including information from a forward-looking perspective.

Impairment losses on debt instruments that are measured at amortized cost are recognized against an accumulated impairment caption in the balance sheet, which reduces the book value of the asset, while impairment of assets measured at fair value through other comprehensive income is recognized against other comprehensive income.

Impairment losses arising from the granting of loans and advances to customers are recognized in the income statement under the caption Impairment losses on loans and advances to customers, net of reversals and recoveries and those of the remaining financial assets under the caption Impairment losses on other financial assets, net of reversals and recoveries.

Impairment losses on exposures that have an associated credit risk and that are not positions recorded in assets are recorded as a provision under Provisions in liabilities, in the balance sheet. Charges for the period and reversals are recorded under the caption Provisions, net of reversals in the income statement.

**Impairment model of loans and advances to customers**

The methodology adopted by the Bank foresees, in a first stage, the identification of Economic Groups (and Retail customers, hereinafter “Retail”) considered as individually significant. These are analyzed individually and the remainder collectively, according to homogeneous risk groups. The following criteria for selecting Groups (and Retail) that are individually significant are considered:

- Customers/economic groups with no signs of impairment with exposure greater than or equal to 0.1% of FPR;
- Customers/economic groups with signs of impairment with exposure greater than or equal to 0.02% of FPR; and
- Customers restructured due to financial difficulties with exposure above AOA 50 million.

In the collective analysis methodology, the Bank groups customers into homogeneous risk segments, namely the following:

- Consumer credit
- Overdrafts
- Credit cards
- Car loans

- Mortgages
- Small and Medium-sized Businesses – Less significant exposures
- Large Businesses – significant exposures
- State
- Credit institutions

The amount of impairment losses is determined according to whether there is a significant deterioration of the risk since initial recognition, and whether a default event occurs. Consequently, the Bank classifies financial instruments into three stages of impairment, as described below:

- Stage 1: Classification to be applied on initial recognition of the financial instruments or in the event of not meeting any of the classification criteria of the other impairment stages
- Stage 2: Classification to be applied to financial instruments that show a significant increase in credit risk (SIRC) since their origin
- Stage 3: All financial instruments that are in default according to the Bank's internal definition and in line with Instruction No. 8/2019 will be classified under this stage.

The Stage 2 criteria for classification are as follows:

**Marking**

- Product contracts other than overdrafts, with credit more than 30 days overdue;
- Overdraft product contracts with credit more than 15 days overdue;

- Customer with at least one credit operation restructured due to financial difficulties in the last 6 months;
- Customers with an operation in litigation in the last 5 years;
- Customers with bounced checks and/or inhibited from using checks according to the information available at CIRC (Angolan Centralized Credit Register);
- Customers with unauthorized overdrafts;
- Customers with revolving operations (overdrafts, credit cards and escrow accounts) above the limit formally contracted, or revolving credit operations permanently used at, at least, 95% of the limit initially contracted in the last 6 months; and
- Credit with a material decrease in the value of the collateral (greater than 20%) when this results in a funding-collateral ratio greater than 80%.
- Transactions restructured in default (stage 3 on the origination date) and which, on the reporting date, do not meet stage 3 classification criteria.
- Classification of Customer operations due to Significant Increase in Credit Risk (SICR), whenever the Customer's exposure to these criteria is greater than 20% of the Customer's total exposure.
- POCI (Purchased or Originated Credit Impaired) operations that do not have stage 3 classification criteria on the reporting date.
- Unrestructured operations that have not complied with the quarantine period in Stage 2 (6 months after clearing default).
- Restructured operations that have not been restructured in default but have not yet been cleared of restructuring due to financial difficulties.

For individually analyzed customers the following additional criteria are considered:

- Customers with a credit operation in the financial system more than 90 days in arrears, principal or interest written off/ canceled or in litigation;
- Customer subject to Special Recovery Programs;
- Customers with overdue debts to the Tax Administration and/or Social Security;
- Bank pledges or expectation of insolvency or subject to a financial and/or operational recovery/reorganization process;
- Significant change in the Customer's operating results (Companies), for customers subject to Individual Analysis.

**Propagation**

- Propagation of all operations to Stage 2 if the total exposure of the operation in Stage 2 is greater than or equal to 20% of the Customer's exposure.

Applicable only to Stage 3 Customers, the default classification criteria, are as follows, provided they have (i) Absolute Materiality:  $\geq$  AOA 5,000 of overdue loans; (ii) Relative materiality: 1% Corporate and 2.5% Retail, of the Customer's asset exposure.

**Classification**

- Contracts with overdue credit for more than 90 days;
- Restructured contracts with overdue credit for more than 30 days; and
- Restructurings with material loss or grace period of the principal or arising from contracts already at Stage 3.

For individually analyzed customers the following additional criteria are considered:

- Customers in bankruptcy/insolvency or with expectation of bankruptcy/insolvency.

**Propagation**

- Propagation of marking of default when the default exposure represents 20% of total customer exposure

**Unmarking**

- Contracts with overdue credit for more than 90 days: 12-month quarantine period (at least 6 months in Stage 3 and 6 months in Stage 2) with no default activation criteria; and
- Restructured credits: a quarantine period (at least 12 months) is applied with payment of principal and interest without overdue exposure for a period greater than 30 days.

In calculating collective impairment, the Bank considers the following credit risk parameters:

- a) Exposure: The exposure at default (EAD) is the estimated amount outstanding in the event of default. This component is relevant for financial instruments that have a variable amortization structure depending on the Customer use (credit current accounts, credit cards, in general any revolving product). The calculation of this estimate is based on the observation of historical data for debtors in respect of which default situations have been verified, relating the levels of use

of the limits at the time of default with those in the previous 12 months. In this context, future levels of use are estimated according to the nature of the product, the current levels of use and the value of the cap.

- b) Probability of default (PD): the Bank applies a methodology for calculating the probability of default forecast for each borrower for the entire loan portfolio and for each risk segment. This parameter is used directly to calculate the ECL of operations in Stage 1 and 2 of impairment. Thus, for Stage 1 the 12-month period should be considered and for Stage 2 the residual maturity of the operation.

- c) Loss given default (LGD): is the percentage of debt that will not be recovered in the event of a Customer default. The calculation of the LGD is performed based on historical internal information, considering the cash flows associated with the contracts from the time of default until their settlement or until the moment when there are no relevant recovery expectations. It is also included in the calculation of the estimates of the costs associated with the credit recovery processes..

The parameters considered for determining impairment are generally based on the internal historical experience of defaults and recoveries of the Bank. The parameters are reviewed and updated periodically to reflect the economic position and to be representative of the current economic context at all times.

The models also incorporate prospects of future economic evolution (forward looking) to determine the expected loss considering the macroeconomic factors that are related to the probability of default and/or recoverability indicators of the Bank, namely:

- Real GDP
- Growth rate of non-oil GDP
- (Parallel) USD/AOA exchange rate - end of period
- Luanda Consumer Price Index
- Real Effective Exchange Rate (REER)

In the review processes, the necessary improvements will also be made as detected in the backtesting exercises.

Impairment model for other financial instruments (Disponibilidades (Deposits at other credit institutions and Investments at amortized cost)

The Bank classifies exposures into stages of impairment with regard to financial instruments measured at amortized cost.

**Stage 1 - Financial assets with no significant increase in credit risk since initial recognition**

Assets that do not have a significant increase in credit risk since initial recognition are classified in Stage 1. The calculation of impairment losses for these exposures with a maturity of 12 months.

In assessing the existence of a significant increase in the credit risk for the financial asset portfolio, an increase of more than two notches is considered for a significant increase in the credit risk, in accordance with the information published by the international rating agency Moody's.

**Stage 2** – *Financial assets with significant increase in credit risk since initial recognition*

Whenever the existence of a significant increase in the counterparty's credit risk is determined, the exposure is classified as Stage 2.

For these exposures, the Bank measures the impairment losses over the respective residual maturity.

**Stage 3** - *Financial assets in default*

This stage includes all financial instruments for which events of default have been verified for more than 90 days.

Impairment losses for debt securities, investments and cash and cash equivalents in other credit institutions are calculated based on the credit risk parameters (probability of default and loss given default) provided by the international rating agency Moody's.

For the purposes of calculating impairment losses, the Bank also considers risk mitigation through the fair value of financial collateral and mortgage collateral.

**2.4 Operations with repurchase or resale agreement**

Securities sold under repurchase agreements (repos) at a fixed price or at a price equal to the sale price plus interest over the term of the transaction are not derecognized from the balance sheet and are revalued in accordance with the accounting policy of the category to which they belong. The corresponding liability is accounted for under Deposits from customers or Deposits from other credit institutions, as appropriate. The difference between the sale price and the repurchase price is treated as interest and is accrued over the life of the agreement using the effective rate method and recorded under Net interest income.

Securities purchased under resale agreements (reverse repos) at a fixed price or at a price equal to the purchase price plus interest over the term of the transaction, are not recognized in the balance sheet, and the purchase price is recorded under Loans and advances to customers or Other loans and advances to credit institutions, as appropriate. The difference between the purchase price and the resale price is treated as interest and is accrued over the life of the agreement using the effective interest rate method under Net interest income. The amounts receivable are collateralized by the associated securities.

**2.5 Financial instruments derivatives**

The Bank can carry out derivative financial instrument operations, within the scope of its activity, to manage its own positions based

on expectations of market developments or to meet the needs of its customers.

All derivative instruments are recorded on the trade date at fair value and changes in fair value are recognized in the income statement unless they qualify as cash flow hedges or net investments in foreign operating units. Derivatives are also recorded in off-balance sheet accounts at their reference value (notional value).

Derivative financial instruments are classified as hedging (provided that all designation conditions are met) or trading instruments, depending on their purpose.

**Hedging derivatives**

The Bank had no hedging derivatives at the date of the first adoption of IFRS 9, however it took the decision to continue to apply as a policy, the accounting treatment of IAS 39 as permitted by IFRS 9.

The Bank designates derivatives and other financial instruments to hedge interest rate and foreign exchange risks, resulting from its business. Derivatives that do not qualify for hedge accounting are recorded as trading instruments.

Hedging derivatives are recorded at fair value and the gains or losses resulting from their remeasurement are recognized in accordance with the hedge accounting model adopted.

A hedging relationship exists when:

- at the beginning of the relationship there is formal documentation of the hedge;
- the hedge is expected to be highly effective;
- the effectiveness of the hedge can be reliably measured;
- the hedge is assessed on an ongoing basis and effectively determined to be highly effective over the financial reporting period; and
- in relation to the hedging of an anticipated transaction, the transaction is highly probable and presents an exposure to changes in cash flows that could ultimately affect profit or loss.

When a derivative financial instrument is used to hedge foreign exchange changes arising from monetary assets or liabilities, no hedge accounting model is applied. Any gain or loss associated with the derivative is recognized in profit or loss for the period, as are the changes in the foreign exchange risk of the underlying monetary elements.

#### i. Fair value hedges

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement, together with changes in the fair value of the asset, liability or group of assets and liabilities to be hedged in respect of the risk covered. If the hedging relationship no longer meets the requirements of hedge accounting, the derivative financial instrument is transferred to the trading category and the hedge accounting is subsequently discontinued (the adjustment made

to the book value of a hedging instrument, for which the effective interest rate method is used, is amortized through profit or loss for the period until its maturity and recognized in Net interest income). If the hedged asset or liability corresponds to a fixed-income instrument, the accumulated gains or losses in respect of changes in the interest rate risk associated with the hedging item until the date the hedging is discontinued, are amortized through profit or loss over the remaining period of the hedged item.

#### ii. Cash flow hedges

Changes in the fair value of derivatives, which qualify as cash flow hedges, are recognized in equity - cash flow reserves - for the effective part of the hedging relationships. Changes in the fair value of the ineffective portion of hedging relationships are recognized in the income statement when they occur.

The amounts accumulated in equity are reclassified to the income statement in the periods when the hedged item affects results.

When the hedging instrument is derecognized or when the hedging relationship no longer meets the hedge accounting requirements or is revoked, the hedging relationship is discontinued prospectively. Accordingly, changes in fair value accumulated in equity until the date the hedging is discontinued can be:

- deferred for the remaining period of the hedged instrument; and
- recognized immediately in profit or loss for the period if the hedged instrument has been extinguished.

In the case of the discontinuation of a hedging relationship of a future transaction, the changes in fair value of the derivative recorded in equity remains there until the future transaction is recognized in the income statement. When the transaction is no longer expected to occur, the accumulated gains or losses recorded in equity are immediately recognized in the income statement.

As at 30 June 2024 and 31 December 2023, the Bank had no hedging derivatives.

#### Derivatives held for trading

Derivatives that are not considered in an accounting hedging relationship are considered as other financial instruments at fair value through profit or loss. When the fair value of the instruments is positive, they are presented under assets, when their fair value is negative, they are classified under liabilities, in both cases under financial assets or liabilities at fair value through profit or loss.

#### Embedded derivatives

There is an embedded derivative when a part of the financial instrument traded by the Bank trades contains a derivative and a non-derivative component. This component of the derivative is identified as an “embedded derivative”, while the remainder of the contract is described as a “host contract”.

Derivatives embedded in financial instruments are separately accounted for whenever

- the risks and rewards of the derivative are not related to those of the main instrument (host contract);
- a separate instrument with the same terms meets the definition of a derivative; and
- the hybrid instrument (as a whole) is not initially recognized at fair value through profit or loss.

Embedded derivatives are presented under the captions of financial assets or liabilities at fair value through profit or loss, being recorded at fair value with the changes being reflected in profit or loss. As at 30 June 2024, the Bank did not hold any embedded derivatives disclosed in its financial statements.

**2.6 Investments in subsidiaries, associates and joint ventures**

Investments in subsidiaries and associates are accounted in the Bank’s financial statements at their historical cost less any impairment losses.

Subsidiaries are entities (including investment funds and securitization vehicles) controlled by the Bank. The Bank controls an entity when it is exposed to, or has rights to, the variability in returns arising from its involvement with that entity and can seize them through the power it has over the relevant activities of that entity (*de facto* control).

Associates are entities over which the Bank has significant influence but does not exercise control over their financial and operating policy. The Bank is presumed to have significant influence when it holds more than 20% of the voting rights of the associate. If the Bank holds, directly or indirectly, less than 20% of the voting rights, it is presumed that it does not have significant influence, except when that influence can be clearly demonstrated. The existence of significant influence by the Bank is usually demonstrated in one or more of the following:

- representation on the Board of Directors or equivalent governing body;
- participation in policy-making processes, including participation in decisions about dividends or other distributions;
- material transactions between the Bank and the investee;
- interchange of management personnel; and
- provision of essential technical information.

**Impairment**

The recoverable amount of investments in subsidiaries and associates is assessed whenever there are signs of impairment. Impairment losses are calculated based on the difference between the recoverable amount of investments in subsidiaries or associates and their book value. The identified impairment losses are recorded in the income statement and are subsequently reversed through profit or loss if there is a reduction in the

estimated loss amount, in a subsequent period. The recoverable amount is determined based on the higher of the value in use of the assets and the fair value less costs to sell, calculated using valuation methodologies supported by discounted cash flow techniques, considering market conditions, time value of money and business risks.

**2.7 Equity instruments**

A financial instrument is classified as an equity instrument when it meets the definition of equity from the issuer’s perspective, i.e., there is no contractual obligation for its settlement to be made by delivering cash or another financial asset to a third party, regardless of its legal form, evidencing a residual interest in the assets of the issuing entity after deducting all of its liabilities.

Transaction costs directly attributable to the issue of equity instruments are recorded against equity, as a deduction from the amount of the issue. The amounts paid and received for purchases and sales of equity instruments are recorded in equity, net of transaction costs.

Income from equity instruments (dividends) is recognized when the right to receive it is established and are deducted to equity.

2.8 Intangible assets and other tangible assets

Intangible assets are only recognized when: i) they are identifiable; ii) it is probable that future economic benefits will flow from the asset and iii) the cost of the asset can be reliably measured.

The acquisition cost of intangible assets comprises: i) the purchase price, including costs with intellectual rights and fees and after deducting any discounts and ii) any cost directly attributable to the preparation of the asset for its intended use.

After the initial accounting, BFA measures its intangible assets according to the cost model.

Intangible assets, which correspond mainly to IT software, are recorded at acquisition cost, and are amortized on a straight-line basis over a three-year period.

Property, plant, equipment and others tangible assets are recorded at acquisition cost less accrued amortization and impairment losses. The cost includes expenditure that is directly attributable to the acquisition of the goods.

The acquisition cost of property, plant and equipment comprises the purchase price of the asset, expenses directly attributable to its acquisition and costs incurred in preparing the asset to be

ready for its intended use. Financial costs incurred with loans obtained for the construction of qualifying tangible fixed assets are recognized as part of the construction cost of the asset.

Land is not depreciated.

Depreciation is calculated on a straight-line basis, according to the useful life estimated by the Bank, which corresponds to the following years of useful life:

|   | Years of useful life |
|---|----------------------|
| Real Estate for own use (Buildings)         | 50                   |
| Improvements in leased buildings            | 10                   |
| Equipment:                                  |                      |
| Furniture and material                      | 10                   |
| IT equipment                                | 3                    |
| Indoor facilities                           | 10                   |
| Transport equipment                         | 3 e 5                |
| Machines and tools                          | 6 e 7                |
| Automatic data processing system (Software) | 3                    |

As mentioned in Note 2.18, this caption includes right-of-use assets arising from lease agreements.

2.9 Non-current assets held for sale

Non-current assets are classified as non-current assets held for sale when their book value is intended to be realized mainly through a sale transaction rather than through their continued use in the Bank’s activities.

The value of assets received as payment in kind is initially recorded at the lower of the fair value net of selling costs and the book value of the loan at the date the payment in kind was made.

When the outstanding amount of the loan operation is greater than its book value (net of provisions), the difference must be recognized as income for the period, up to the value determined upon valuation of the assets. When the valuation of the assets is lower than the book value of the loan operation, the difference must be recognized as a cost for the period.

Assets recorded under this caption are not amortized and are valued at the lower of book value and fair value. The fair value of these assets is determined based on periodic valuations performed by independent valuers. Whenever the value resulting from these valuations (net of costs to sell) is lower than the book value, impairment losses are recorded under Impairment of other assets, net of reversals and recoveries.

In addition, as these are assets whose fair value level in the IFRS 13 hierarchy corresponds mainly to level 3, given the subjectivity of some assumptions used in the valuations and the fact that there are external indications with alternative values, the Bank carries out internal analyses on the assumptions used, which may imply additional adjustments to their fair value.

**2.10 Impairment of non-financial assets**

When there are signs that an asset may be impaired, IAS 36 requires that its recoverable amount is estimated, and an impairment loss shall be recognized whenever the net book value of an asset exceeds its recoverable amount. Impairment losses are recognized in the income statement and are reversed in subsequent reporting periods when the reasons that led to their initial recognition cease. For this purpose, the new depreciated amount shall not exceed the book value that would be accounted, had no impairment losses been allocated to the asset, considering its depreciation.

The recoverable amount is determined as the higher of its fair value less costs to sell and its value in use, which is calculated based on the present value of the estimated future cash flows expected to be obtained from the continued use of the asset and its disposal at the end of its useful life.

On the date of derecognition of a non-financial asset, the gain or loss calculated as the difference between the fair value less

costs to sell and the net book value is recognized in the income statement under Net gains/(losses) on sale of other assets.

**2.11 Cash and cash equivalents**

For the purposes of the cash flow statement, Cash and cash equivalents comprise balances with less than three months' maturity from the balance sheet date, including Cash and deposits at central banks and Deposits at other credit institutions (Notes 4 and 5), and do not include impairment losses.

**2.12 Dividends**

Dividends (income from equity instruments) are recognized in the income statement when the right to receive them is attributed. Dividends are recorded under Net gains/(losses) on financial operations, Net gains/(losses) on other financial instruments at fair value through profit or loss or other income, depending on the classification of the underlying instrument.

**2.13 Commissions**

Income from services and commissions is recognized as revenue from customer agreements to the extent that the performance obligations are satisfied:

- when they are obtained as the services are rendered, their recognition in profit or loss is made in the period to which they relate; and

- when they result from the rendering of services, their recognition is made when that service is completed.

When they are an integral part of the effective interest rate of a financial instrument, the income resulting from services and commissions are recorded in net interest income.

**2.14 Employee benefits**

**Short-term benefits**

Short-term benefits are reflected under Staff costs in the period to which it relates, in accordance with the accrual accounting principle.

The Bank grants variable remuneration to its employees and directors as a result of their performance (performance bonus). The Executive Committee of the Board of Directors is responsible for establishing the respective allocation criteria for each employee, and the Remuneration Committee is responsible for establishing the criteria at director level. The variable remuneration paid to employees and directors is recorded against profit or loss in the period to which they relate, although payable in the following year (Note 25).

In November 2022, Order No. 3923/22 ((Official Gazette) No. 123 of Series II) published the Addendum to the BFA Pension Fund and the New Pension Plan. The new Defined Contribution Pension Plan defines a mixed contribution system between the Associate (BFA) and the Employees and sets the Associate's rate at 7.5% on the

pensionable salary, also setting a variable employee contribution of between 2.5% and 10% on the pensionable salary.

For defined-contribution plans, the liabilities related to the benefit attributable to the Bank’s employees are recognized as an expense for the period when due (Note 25).

**Long-term benefit**

This type of long-term benefit is recognized when the Bank has a legal or constructive obligation to pay its employees long-term benefits.

The Bank grants variable remuneration to directors and 40% of this amount is paid over a 3-year period plus remuneration. In this respect, the remuneration is associated with the interest rate of Angolan treasury bonds, traded on the secondary market in the same currency and maturity as the deferral. The deferred charges are recorded under Interest and similar expense and the principal is recorded under Staff costs, against Other assets.

**Termination benefits**

This type of benefit is recognized when the Bank terminates the employment contract before the employee reaches normal retirement date, or when an employee accepts the termination of employment in exchange for such benefit. The Bank recognizes a liability for

termination benefits on the earliest of the following dates: when the Bank is no longer able to withdraw the offer of benefits or when the Bank recognizes the costs of a restructuring, within the scope of the recognition of restructuring provisions. Benefits due more than 12 months after the end of the reporting period are discounted to their present value.

**2.15 Income tax and other taxes**

The total income tax recorded in the income statement includes current and deferred taxes.

**Current tax**

Current tax is calculated based on the taxable income for the period, which differs from the accounting income due to adjustments to the tax base resulting from expenses or income not relevant for tax purposes, or which will only be considered in future periods according to the applicable tax laws (Corporate Tax Code).

**Deferred tax**

Deferred tax corresponds to the impact on tax recoverable/payable in future periods resulting from deductible or taxable temporary differences between the balance sheet value of assets and liabilities and their tax base, used to determine taxable income. Deferred taxes are calculated based on the tax rate in force or substantially in force at

the financial reporting date, and which is estimated to be applicable on the date of realization of deferred tax assets or on the date of payment of deferred tax liabilities.

Deferred tax liabilities are normally recorded for all taxable temporary differences, whereas deferred tax assets are only recognized up to the amount by which it is probable that future taxable income will exist, to allow for the use of the corresponding deductible temporary differences or tax losses carried forward. Additionally, deferred tax assets are not recorded in cases where their recoverability may be questionable due to other situations, including issues of interpretation of the tax legislation in force.

As at 30 June 2024 and for the year ended 31 December 2023, the Bank has not recorded any deferred tax assets or liabilities in its financial statements.

**Industrial Tax**

As at 30 June 2024, the Bank is subject to a Corporate Tax under the terms of the General Tax System. The taxation of its income is carried out under the terms of Law No. 26/20, of 20 July (which revoked Law No. 19/14, of 22 October) and, currently, the applicable tax rate is 35%.

The income from public debt securities, resulting from Treasury Bonds and Treasury Bills issued by the Angolan State, whose issue is

regulated by the Framework Law of Direct Public Debt (Law No. 16/02, of 5 December) and by Regulatory Decrees No. 51/03 and 52/03, of 8 July, as well as the other income obtained by the Bank subject to Capital Gains Tax (IAC), are exempt from Corporate Tax, in accordance with the provisions of Article 47(1)(b) of the Corporate Tax Code.

This article expressly states that in order to determine the taxable amount, income or gains subject to IAC must be deducted from the net profit calculated under the terms of the previous articles.

Moreover, this law enshrined, among other changes, the eligibility for tax purposes of favorable and unfavorable exchange rate variations as accepted income and costs for tax purposes, respectively. Likewise, provisions/impairment on secured loans are no longer accepted as a cost, except for the part not covered.

In addition, the Corporate Tax is subject to provisional assessment in a single installment to be made by the end of August, calculated by applying a rate of 2% on the result derived from financial intermediation operations, ascertained in the first six months of the previous tax year, excluding income subject to capital gains tax (taxpayers who have presented losses in the previous year are exempt from the provisional assessment).

Tax returns are subject to review and correction by tax authorities for 5 (five) years, which may result in possible amendments to the taxable income for the years 2019 to 2023.

The recording of the tax impacts of the transactions carried out by the Bank corresponds to management's understanding of the tax treatment applicable under the legislation issued. In situations where the tax interpretation is questioned by the Tax Authorities (AGT), Management reassesses the probability (above or below 50%) that the adopted tax treatment will be accepted, and consequently determines the most likely or expected amount of tax assets or liabilities to be recorded.

**Capital Gains Tax (IAC)**

The new IAC Code, approved by Presidential Legislative Decree No. 2/2014, of 20 October, came into force on 19 November 2014.

The IAC is generally levied on income from the Bank's financial investments. The rate varies between 5% (in the case of interest received on debt securities which are admitted to trading on a regulated market and which have a maturity of three years or more) and 15%.

Notwithstanding the above, with respect to income from public debt securities, according to the understanding of the AGT and the Banco Nacional de Angola addressed to the Angolan Banks Association (in Portuguese, Associação Angolana de Bancos) (letter from the Banco Nacional de Angola dated 26 September 2013), only income arising from securities issued on or after 1 January 2013 are subject to this tax.

This income from Treasury Bonds and Treasury Bills, issued by the Angolan State after 1 January 2013, is subject to IAC at the rate of 10% (5% in the case of debt securities admitted to trading on a regulated market and which have a maturity of three years or more).

On 1 August 2013, the automation process to withhold tax was initiated, by the BNA, in respect of IAC, in accordance with the provisions of Presidential Legislative Decree No. 5/11, of 31 December.

IAC is generally levied on the income from the securities identified above and is withheld by the Bank. For these reasons, the Bank considers that the conditions to consider IAC as an income tax under IFRS are fulfilled.

**Value Added Tax (VAT)**

Law No. 7/19 introduced VAT, which has been in force since 1 October 2019, repealing the Consumption Tax Regulation (IC) and introducing relevant amendments to the Stamp Duty Code (IS).

Under the terms of the VAT Code approved by Law No. 7/19 and the amendments introduced by Law No. 17/19 of 13 August, they are subject to this tax: (i) the transfer of goods and services carried out within national territory, for consideration, by a taxable person acting as such; and (ii) the import of goods.

Nevertheless, the VAT Code provides for the exemption of certain transactions, including the exemption applied to financial intermediation transactions, including those described in Annex III to this Code, except those which give rise to the payment of a specific and predetermined fee or consideration for their performance. This exemption does not entitle the taxable person to deduct the VAT incurred on the acquisition of goods and services connected with exempt transactions.

It should be noted that the VAT rate in force in Angola, applicable to transactions subject and not exempt from VAT, is 14%. Additionally, and in accordance with Article 21(2) of the VAT Code, commercial banks must withhold 50% of the tax included in the invoice or equivalent document issued by the taxpayer at the time of transfer of goods or rendering of services (except for the transfers of goods or services listed as excluded from this withholding tax). In this regard, the withholding of this tax must be made in the periodic VAT return for the month in which this tax becomes chargeable under the terms of Article 21(3) of the VAT Code (i.e., upon receipt of the respective invoice or equivalent document by the entities subject to the withholding VAT system).

However, Instruction No. 000003/DNP/DSIVA/AGT/2020, issued by the Angolan tax authorities, has clarified that transfers of goods to any withholding entities whose payment is made by debit in the account, with the exception of the State, are exempt from withhold. Examples of these situations are transfers of

goods within the scope of banking and financial operations in which the Institutions debit the customer's account, namely: (i) the transfer of leased assets to the respective lessee when the stipulated purchase option is exercised, as well as (ii) the sale of point-of-sale (POS) systems as part of the institutions' provision of payment card acceptance services to their customers.

Under the terms of Article 10(1) of the VAT Code, for the purposes of this tax, and as a general rule, the rendering of services takes place within the national territory when the purchaser has domicile, head office or fixed establishment therein for which the services are acquired. In this context, Article 29(2) of the VAT Code, in conjunction with Article 2(1) (d) of the same tax compendium, provides for a reverse charge mechanism, whereby “whenever the purchaser is a taxable person, the tax is payable by that purchaser, in respect of services rendered within national territory, under Article 10 of the VAT Code, where the service provider is a non-resident taxable person and does not have a fixed establishment in national territory”, i.e., the purchaser, a VAT taxpayer in Angola, must (self)assess the Angolan VAT due on the rendering of services in Angola, when these are rendered by non-resident suppliers.

Moreover, considering the Bank is a taxable person that carries out transactions which grant the right to deduct (i.e., transactions subject to VAT) and transactions which do not grant the right to deduct (i.e., transactions which are exempt from this tax under

the aforementioned terms), the VAT incurred by the Bank on its purchases of goods and services is only partially deductible using the pro rata method.

Nevertheless, the Bank, as a taxable person subject to the general VAT system, may, under the terms of Article 27(2) of the VAT Code, adopt the actual allocation method regarding the VAT incurred on goods for sale. This method of deduction consists of the possibility of deducting all the tax incurred in the acquisition of goods in transactions which give rise to a right to deduct but excludes the possibility of deducting the tax incurred in transactions which do not give rise to this right, under the terms of Articles 22 and 24 of the VAT Code. The goods whose tax may be deducted according to the actual use method are subject to prior authorization by the Tax Authorities. Additionally, Instruction No. 000003/DNP/DSIVA/AGT/2020, referred to below, established that credit institutions may adopt the actual allocation method to deduct the VAT incurred on the acquisition of goods and services “exclusively used” to carry out:

- I. Financial lease operations;
- II. Financial operations carried out by institutions without head office or permanent establishment in national territory (“correspondent banks”) for Angolan institutions;
- III. Operations covered by the provisions of Article 6(3) of the VAT Code, namely the re-invoicing of goods and/or services acquired by the institutions in their own name, but on behalf of third parties, to whom the respective goods and/or services are re-invoiced, with a view to obtaining a refund (cost recovery).

For the purposes of VAT deduction according to the mentioned method, credit institutions must prepare a letter addressed to the VAT Services Department (in Portuguese, *Direcção dos Serviços do IVA*), requesting the amendment of the statement on the commencement of operations, as well as the respective compliance with the obligations foreseen in the VAT Code regarding the accounting record of the operations, in order to allow the control of the operations whose tax was deducted according to the actual allocation method.

Moreover, the Bank is also required to comply with the invoicing rules under the Legal Regime of Invoices and Equivalent Documents (in Portuguese, *Regime Jurídico das Facturas e Documentos Equivalentes* (RJFDE)), in force since April 2019. Within this scope, the economic agents with a turnover equal or superior to Kwanzas equivalent to USD 250 thousand must issue the invoices or equivalent documents through a certified invoicing system.

Property Tax

In accordance with the provisions of Law No. 20/20, published on 9 July, which approved the new Property Tax Code and revoked the previous law, the Bank withholds Property Tax at a rate of 15% (considering that the taxable amount of these properties

corresponds only to 60% of the value of the rents received during the year, since the applicable tax rate is 25%), on the payment or delivery of rents on rented property, with the exception of land for construction, for which Property Tax will be due at a rate of 0.6% of the asset value.

Property Tax will be due on non-rented property in accordance with the following ranges:

- A rate of 0.1% on the asset value, applicable to real estate with an asset value below AOA 5,000,000;
- A fixed value of AOA 5,000 for properties with an asset value above AOA 5,000,000 and below AOA 6,000,000;
- A rate of 0.5% on the asset value exceeding AOA 5,000,000, applicable to real estate with an asset value above AOA 6,000,000.

In the transfer with or without consideration of property, the taxable amount corresponds to the asset value as stated in the land registry at the date of transfer, the value determined by evaluation, in the case of an omitted building, or the declared value, whichever is greater. The transfer of real estate assets is subject to property tax at the rate of 2%, the charge and liability for settlement of which should fall on the Bank whenever it acts as purchaser.

Other taxes

The Bank is also subject to indirect taxes, namely customs duties, stamp duty, employment income tax, as well as other taxes, namely the Special Contribution on Foreign Exchange Transactions, which, in accordance with Law No. 15/23 of 29 December, which came into force on 1 January 2024, is applicable to all transfers made with a national registered office or domicile, within the scope of contracts for the provision of services, technical assistance, consultancy and management, capital operations and unilateral transfers.

2.16 Provisions and contingent assets and liabilities

Provisions

A provision is set up when there is a present obligation (legal or constructive) as a result of a past event for which the future outflow of resources is probable and can be reliably measured. The provision amount corresponds to the best estimate of the amount to be disbursed to settle the liability, at the balance sheet date. Provisions are measured at the present value of the estimated costs to settle the obligation using a pre-tax interest rate, which reflects the market value, for the discount period and for the risk of the provision in question.

If the future expenditure of resources is not likely, it is a contingent liability, and is subject to the respective disclosure, in accordance with the requirements of IAS 37 – Provisions, contingent liabilities and contingent assets.

Provisions related to legal proceedings, opposing BFA to third parties, are constituted in accordance with internal risk assessments carried out by the Board of Directors, with the support and advice of its legal advisors.

Provisions for loan commitments and financial guarantees provided are measured according to the impairment model implemented as described in Note 2.3.11.

Provisions are reviewed at each balance sheet date and adjusted to reflect the best estimate and are reversed against profit or loss in the proportion of the payments that are not probable.

Provisions are derecognized through their use for the obligations for which they were initially recognized or for the cases that the situations were no longer observed.

**Contingent Assets**

Contingent assets are not recognized in the financial statements, being disclosed when it is probable that there will be a future economic inflow of resources.

**Contingent Liabilities**

Contingent liabilities are not recognized in the financial statements but are covered by IAS 37 and disclosed whenever the possibility of an outflow of resources involving economic benefits is not remote.

The Bank records a contingent liability when:

- i) it is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not entirely within the Bank's control; or,
- ii) it is a present obligation that arises from past events, but is not recognized because:
  - a) it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or,
  - b) the amount of the obligation cannot be measured with sufficient reliability.

Identified contingent liabilities are subject to disclosure unless the possibility of an outflow of resources embodying economic benefits is remote.

**2.17 Financial and performance guarantees**

**Financial guarantees**

Financial guarantees are contracts that require the issuer to make payments in order to compensate the holder for losses incurred, as a result of breaches of the contractual terms of debt instruments, namely the payment of the respective principal and/or interest.

Financial guarantees issued are initially recognized at their fair value. Subsequently, these guarantees are measured at the higher (i) of the fair value initially recognized and (ii) the amount of any obligation arising from the guarantee contract, measured at the balance sheet date. Any change in the amount of the obligation associated with financial guarantees issued is recognized in the income statement.

Financial guarantees issued by the Bank usually have a defined maturity and a periodic fee charged in advance, which varies according to the counterparty risk, amount, and performance of the contract. On this basis, the fair value of the guarantees, on the

date of their initial recognition, is approximately equivalent to the value of the initial commission received, considering that the agreed conditions are market conditions. Thus, the amount recognized on the contracting date equals the amount of the initial commission received, which is recognized in the income statement during the period to which it relates. Subsequent commissions are recognized in the income statement, in the period to which it relates.

Performance guarantees

Performance guarantees are contracts that result in one party being compensated if it fails to perform its contractual obligation. Performance guarantees are initially recognized at fair value, which is normally stated by the amount of commissions received over the life of contract. Upon breach of contract, the Bank has the right to revert the guarantee, with the amounts being recognized in Loans and advances to customers, following the transfer of the loss compensation to the guarantee beneficiary.

2.18 Leases

IFRS 16 sets out requirements regarding the scope, classification/ recognition and measurement of leases:

- from the lessor’s perspective, leases continue to be classified as finance leases or operating leases;
- from the lessee’s perspective, the standard defines a single accounting model for lease agreements that results in the recognition of a right-of-use asset and a lease liability for all

lease agreements except for leases with a period of less than 12 months or for leases of low value assets in which cases the lessee may opt for the recognition exemption provided for in IFRS 16, and, in that case, should recognize the lease payments associated with those contracts as External supplies and services.

The Bank has opted not to apply this standard to short-term lease agreements of less than or equal to one year and to lease agreements where the underlying asset has low value, and the option of not applying this standard to leases of intangible assets has also been used.

Definition of a lease

A contract is or contains a lease if it conveys the right to control the use of an identified asset, that is, obtaining substantially all of the economic rewards of its use, and the right to direct the use of that identified asset, for a certain period of time in exchange for consideration.

Impacts from the lessee’s perspective

The Bank recognizes for all leases, except for leases with a period of less than 12 months or for leases of low-value assets:

- a right-of-use asset, initially measured at cost, considering the Net Present Value (NPV) of the lease liability, plus payments made (fixed and/or variable) less lease incentives received,

penalties for termination (if reasonably certain), as well as any cost estimates to be incurred by the lessee in dismantling and removing the underlying asset and/or restoring the location where it is located. Subsequently, it is measured according to the cost model (subject to depreciation/amortization according to the lease term of each agreement and to impairment tests);

- a lease liability, initially recorded at the present value of the future lease cash flows (NPV), which includes:
  - fixed payments, less leasing incentives receivable;
  - variable lease payments that depend on an index or rate, initially measured using the index or rate at the start date of the agreement;
  - the amounts payable by the lessee as residual value guarantees;
  - the exercise price of a call-option, if the lessee is reasonably certain to exercise that option; and
  - sanction payments for the termination of the lease if the lease term reflects the exercise of a lease termination option by the lessee.

The lease liability is measured at amortized cost using the effective interest rate method.

Since the interest rate implicit in the lease cannot be readily determined (paragraph 26 of IFRS 16), the lease payments are discounted at the lessee’s incremental borrowing rate which incorporates the risk-free interest rate curve (swap curve), plus a risk spread of the Bank, applied over the weighted average term

of each lease agreement. For open-ended contracts, this date is considered to be the end date of the lease. For other open-ended contracts, the period within which the lease will be enforceable is assessed, as well as any economic penalties associated with the lease. When assessing enforceability, the specific clauses of the contracts are considered, as well as the legislation in force regarding Urban Leases.

Subsequently, the lease liability is measured as follows:

- by an increase in its carrying amount to reflect interest thereon;
- by a decrease in its carrying amount to reflect lease payments; and
- the carrying amount is remeasured to reflect any revaluations or changes in the lease, as well as to incorporate the revision of lease payments fixed in substance and the revision of the lease term.

The Bank remeasures a lease liability, and calculates the respective adjustment related to the right-of-use asset whenever:

- there is a change in the lease term or in the assessment of a call-option over the underlying asset, in which case the lease liability is remeasured, discounting the revised lease payments and using a revised discount rate;
- there is a change in the amounts payable under a residual value guarantee, or in the future lease payments resulting from the change in an index or rate used to determine those payments, in which case the lease liability is remeasured by

discounting the revised lease payments using an unchanged discount rate (unless the change in the lease payments results from a change in variable interest rates, in which case a revised discount rate should be used); and

- a lease agreement is changed, but such lease change is not accounted for as a separate lease, in which case the lease liability is remeasured, discounting the revised lease payments using a revised discount rate.

Right-of-use assets are depreciated from the lease start date until the end of the useful life of the underlying asset, or until the end of the lease term, whichever is earlier. If the lease transfers the ownership of the underlying asset, or if the cost of the right-of-use asset reflects the fact that the Bank will exercise a call-option, the right-of-use asset should be depreciated/amortized from the lease start date until the end of the useful life of the underlying asset.

The estimated useful life of the right-of-use assets is determined following the same principles as for Property, plant and equipment.

In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted by certain remeasurements of the lease liability.

Depreciation/amortization begins on the date the lease takes effect. Accounting for leases from the lessee's perspective in the Bank's financial statements is as follows:

In the income statement:

- the interest expense on lease liabilities is recorded under Net interest income;
- the amounts relating to short-term lease agreements and lease agreements for low-value assets are recorded under Other administrative expenses; and
- the cost of depreciation of right-of-use assets is recorded under Depreciation and amortization for the period. In the balance sheet:
- right-of-use assets recognized under Property, plant and equipment; and
- the value of lease liabilities recorded under Other liabilities.

### Impact from the lessor's perspective

As at 30 June 2024 and 31 December 2023, the Bank has no lease agreements in which it is the lessor.

### 2.19 Earnings per share

Basic earnings per share are calculated by dividing the net income attributable to shareholders of the Bank by the weighted average number of ordinary shares outstanding, excluding the average number of own shares held by the Bank.

For the diluted earnings per share, the average number of ordinary shares outstanding is adjusted to reflect the effect of all potential ordinary shares treated as dilutive. Contingent or

potential issues are treated as dilutive when their conversion into shares decreases earnings per share.

If earnings per share change as a result of an issue with a premium or discount or other event that changes the potential number of ordinary shares, or changes in accounting policies, the calculation of earnings per share for all periods presented is adjusted retrospectively (see Note 19).

## 2.20 Subsequent events

The Bank analyzes events that occur after the balance sheet date, i.e., favorable and/or unfavorable events that occur between the balance sheet date and the date on which the financial statements were authorized for issue. In this context, two types of events can be identified:

- those that provide evidence of conditions that existed at the balance sheet date (adjusting events after the balance sheet date); and
- those that are indicative of conditions that arose after the balance sheet date (non-adjusting events after the balance sheet date).

Events occurring after the date of the financial statements that are not considered as adjustable events, if material, are disclosed in the notes to the financial statements.

## 3. MAIN ESTIMATES AND UNCERTAINTIES ASSOCIATED WITH THE APPLICATION OF THE ACCOUNTING POLICIES

IFRS establish several accounting treatments and require the Board of Directors to make judgments and prepare the necessary estimates to decide which accounting treatment is most appropriate. The main estimates and judgments used in the application of accounting principles by the Bank are presented in this Note, with the objective of improving the understanding of how their application affects the Bank's reported results and their disclosure, considering the context of uncertainty resulting from the impact of the devaluation of the functional currency. A broad description of the main accounting policies used by the Bank is presented in Note 2 to the financial statements.

Considering that, in many situations, there are alternatives to the accounting treatment adopted by the Board of Directors, the results reported by the Bank could be different should a different treatment be chosen. The Board of Directors considers that the choices made are appropriate and that the financial statements give a true and fair view of the Bank's financial position and the result of its operations in all material respects.

### 3.1 Impairment losses of financial assets at amortized cost and debt instruments at fair value through other comprehensive income

The determination of impairment losses of financial instruments involves judgments and estimates regarding the following aspects, among others:

#### a) Significant increase in credit risk:

Impairment losses correspond to the expected losses in the event of a default over a 12-month time horizon, for Stage 1 assets, and to the expected losses considering the probability of a default event occurring at some point up to the financial instrument's maturity date, for Stage 2 and 3 assets. An asset is classified as Stage 2 whenever there is a significant increase in the respective credit risk since its initial recognition. In assessing the existence of a significant increase in credit risk, the Bank considers reasonable and sustainable qualitative and quantitative information.

#### b) Definition of groups of assets with common credit risk characteristics:

When expected credit losses are measured on a collective basis, financial instruments are grouped based on common risk characteristics. The Bank monitors the adequacy of the credit risk characteristics on a regular basis to assess whether they remain similar. This procedure is necessary to ensure that, in the event of a change in credit risk characteristics, the asset segmentation is revised. This revision may result in the creation of new portfolios or in the transfer of assets to existing portfolios which better reflect their credit risk characteristics.

#### c) Probability of default:

The probability of default represents a determining factor in measuring expected credit losses. The probability of default corresponds to an estimate of the probability of default in a given period, which is calculated based on historical data, assumptions, and expectations about future conditions.

d) Loss given default:

Corresponds to an estimate of loss in a default scenario. It is based on the difference between the contractual cash flows and those that the Bank expects to receive, either through the cash flows generated by the customer's business or loan collateral. The calculation of the estimated loss given default is based, among other aspects, on the different recovery scenarios, historical information, the costs involved in the recovery process and the estimated valuation of collaterals associated with loan operations.

This assessment is performed using internal and external information and includes the use of assumptions and judgments in its modeling, the change of which could determine different results.

Consequently, the use of different methodologies or different assumptions or judgments in measuring impairment could lead to different results from those reported and summarized in Notes 6, 8, 9 and 30.

Finally, the Bank considers that the impairment determined based on this methodology allows an adequate reflection of the risk associated to its financial assets, considering the rules established by IFRS 9 - Financial Instruments.

3.2 Fair value of derivative financial instruments and other financial assets and liabilities measured at fair value

Fair value is based on market quotations, when available, and, in their absence, on the use of prices of similar recent transactions carried out under market conditions or based on valuation methodologies, using discounted cash flow techniques, applied to the future cash flows considering market conditions, the effect of time, the yield curve and volatility factors. These methodologies may require the use of assumptions or judgments in estimating fair value.

Consequently, the use of different methodologies or different assumptions or judgments in the application of a given model could give rise to different financial results from those reported in Notes 7 and 30.4.

3.3 Provisions

The measurement of provisions considers the principles defined in IAS 37 regarding the best estimate of the expected cost, the most likely outcome of ongoing actions, and considers the risks and uncertainties inherent in the process. Different assumptions and judgments would have an impact on the determination of the amount of the provisions, which are presented in Note 17.

Changes to these assumptions could have a significant impact on the values determined.

4. CASH AND DEPOSITS AT CENTRAL BANKS

As at 30 June 2024 and 31 December 2023, the caption Cash and deposits at Central Banks is detailed as follows:

| Amounts expressed in thousands of Kwanzas             |             |             |
|---|-------------|-------------|
|   | 30/06/2024  | 31/12/2023  |
| Cash  |             |             |
| National currency - banknotes and coins               | 24 725 754  | 21 416 760  |
| Foreign currency - banknotes and coins                |             |             |
| In United States dollar                               | 2 169 842   | 2 746 929   |
| In Euro   | 2 490 021   | 2 179 124   |
| In other currencies                                   | 590 032     | 555 764     |
|   | 29 975 649  | 26 898 577  |
| Deposits at Central Bank                              |             |             |
| Demand deposits at the Banco Nacional de Angola (BNA) |             |             |
| In national currency                                  | 156 095 443 | 153 175 534 |
| In United States dollar                               | 273 916 148 | 199 652 609 |
| In Euro   | 176 482 598 | 176 920 075 |
|   | 606 494 189 | 529 748 218 |
| TOTAL   | 636 469 838 | 556 646 795 |

Demand deposits at the BNA in national and foreign currency aim to comply with the provisions in force regarding the reserve requirement to be maintained and are not remunerated. As at 30 June 2024, the minimum reserve requirements amounted to AOA 140,654,698 thousand in national currency and AOA 300,863,347 thousand in foreign currency (2023: AOA 100,838,260 thousand and AOA 297,515,264 thousand, respectively).

As at 30 June 2024 and 31 December 2023, the reserve requirements are calculated in accordance with the provisions of BNA Instruction No. 04/2023 of 30 March 2023, Directive No. 01/2024 of 30 January 2024 and Directive No. 12/2023 of 28 November 2023, respectively. The currencies for compliance with the minimum reserve requirements in Foreign Currency are the US Dollar, the Euro and the South African Rand, in accordance with Directive 03/DME/2023 of 6 February 2023.

As at 30 June 2024, the tax base for calculating reserve requirements in national currency (NC) and in foreign currency (FC) is every two weeks.

The reserve requirement in national currency is set at 20% for items that comprise the reserve base, in accordance with Directive No. 01/2024 of 30 January, and 20% for the balances of local governments and municipal administrations, to be applied to the average fortnightly balances of the reserve base.

The reserve requirement in foreign currency was set at 22%, to be applied to the average weekly balances of items that comprise the reserve base, as defined in paragraph 2 of Instruction No. 04/2023 of 30 March and at 100% for the balances of local governments and municipal administrations, to be applied to the daily balances of the accounts.

Directive No. 12/2023 provides that in relation to the reserve requirements in national and foreign currency, the balances of deposit accounts in foreign and national currency, opened at the Banco Nacional de Angola on behalf of each banking credit institution, are eligible. The following assets are eligible for compliance with the reserve requirement in foreign currency:

- The balance of the foreign currency deposit account, opened at the Banco Nacional de Angola, on behalf of each Banking Credit Institution. Deducted from the corresponding 100% (one hundred percent) of deposits on behalf of the Central Government held at the financial institution.

For the fulfillment of the minimum reserve requirements the following are also eligible:

- 80% (eighty percent) of the assets representing the value of loan disbursements in national currency, relating to projects in the agriculture, livestock, forestry and fishing sectors, granted until 14 April 2021, provided that they have a residual maturity equal to or greater than 24 (twenty-four) months;
- Loans defined in accordance with the provisions of Article 8, of Notice No. 10/2020, of 6 April on Granting Credit to the Real Sector of the Economy, whatever the residual maturity; and
- Loans defined in accordance with the provisions of Article 10 of Notice No. 09/2022, of 6 April on the granting of mortgages, whatever the residual maturity.

5. LOANS AND ADVANCES TO OTHER CREDIT INSTITUTIONS

As at 30 June 2024 and 31 December 2023, the caption Loans and advances to credit institutions is detailed as follows:

|   | Amounts expressed in thousands of Kwanzas |            |
|---|---|------------|
|   | 30/06/2024                                | 31/12/2023 |
| Demand deposits                         | 36 953 924                                | 41 635 446 |
| Accumulated impairment losses (Note 17) | (3 198)                                   | (4 180)    |
|   | 36 950 726                                | 41 631 266 |

The reconciliation of changes in the gross book value and impairment losses per stage of impairment of Loans and advances to credit institutions is presented below:

|   | Amounts expressed in thousands of Kwanzas |                   |
|---|---|-------------------|
|   | 30/06/2024<br>Stage 1                     |                   |
|   | Book value                                | Impairment losses |
| Balance as at 1 January 2024                  | 41 635 446                                | 4 180             |
| Originated / derecognized financial assets    | (5 524 676)                               | (1 035)           |
| Changes in exchange rates and other movements | 843 154                                   | 53                |
| Balance as at 30 June 2024                    | 36 953 924                                | 3 198             |

|   | Amounts expressed in thousands of Kwanzas |                   |
|---|---|-------------------|
|   | 31/12/2023<br>Stage 1                     |                   |
|   | Book value                                | Impairment losses |
| Balance as at 1 January 2023                  | 24 125 503                                | 3 444             |
| Originated or acquired financial assets       | 2 045 510                                 | (1 954)           |
| Changes in exchange rates and other movements | 15 464 433                                | 2 690             |
| Balance as at 31 December 2023                | 41 635 446                                | 4 180             |

As at 30 June 2024 and 31 December 2023, the balance, net of impairment, by currency under Loans and advances to credit institutions is detailed as follows:

|                     | Amounts expressed in thousands of Kwanzas |            |
|---------------------|---|------------|
|                     | 30/06/2024                                | 31/12/2023 |
| In US dollars       | 20 063 151                                | 21 717 823 |
| In Euros            | 13 840 780                                | 15 331 017 |
| In other currencies | 3 046 795                                 | 4 582 426  |
|                     | 36 950 726                                | 41 631 266 |

6. OTHER LOANS AND ADVANCES TO CENTRAL BANKS AND CREDIT INSTITUTIONS

As at 30 June 2024 and 31 December 2023, the caption Other loans and advances to central banks and credit institutions is detailed as follows:

| Amounts expressed in thousands of Kwanzas                  |                      |                    |
|--|----------------------|--------------------|
|  | 30/06/2024           | 31/12/2023         |
| Other loans and advances to credit institutions abroad:    |                      |                    |
| In United States Dollars                                   | 617 361 565          | 610 262 015        |
| In Euro  | 81 601 125           | 74 561 586         |
| In Pound Sterling  | 8 091 953            | 8 432 968          |
|  | <b>707 054 643</b>   | <b>693 256 569</b> |
| Other loans and advances to central banks                  |                      |                    |
| In Kwanzas   | 419 647 956          | 198 021 408        |
|  | <b>419 647 956</b>   | <b>198 021 408</b> |
| Other loans and advances to credit institutions in Angola: |                      |                    |
| In Kwanzas   | 20 999 926           | -                  |
|  | 20 999 926           | -                  |
|  | <b>1 147 702 525</b> | <b>891 277 977</b> |
| Income receivable  | 21 954 935           | 10 599 657         |
|  | 1 169 657 460        | 901 877 634        |
| Accumulated impairment losses (Note 17)                    | (507 507)            | (375 124)          |
|  | <b>1 169 149 953</b> | <b>901 502 510</b> |

As at 30 June 2024 and 31 December 2023, the residual maturities of Other loans and advances to credit institutions in Angola, abroad and with Central Banks were as follows:

| Amounts expressed in thousands of Kwanzas |                      |                    |
|---|----------------------|--------------------|
|   | 30/06/2024           | 31/12/2023         |
| Up to 3 months                            | 831 056 024          | 798 548 255        |
| 3 to 6 months                             | 66 827 885           | 44 545 023         |
| More than 6 months                        | 249 818 616          | 48 184 699         |
|   | <b>1 147 702 525</b> | <b>891 277 977</b> |

Other loans and advances to central banks refer to reverse repos, which are accounted for in accordance with the accounting policy described in Note 2.4.

As at 30 June 2024 and 31 December 2023, Other loans and advances to credit institutions earned interest at the following annual weighted average rates:

|                          | 30/06/2024 | 31/12/2023 |
|--------------------------|------------|------------|
| In United States Dollars | 5.14%      | 5.18%      |
| In Euros                 | 3.48%      | 3.58%      |
| In Kwanzas               | 14.66%     | 9.58%      |
| In Pound Sterling        | 4.75%      | 4.75%      |

The reconciliation of changes in the book value and impairment losses per stage of Other loans and advances to central banks and credit institutions is presented below:

| Amounts expressed in thousands of Kwanzas     |                       |                   |

In the period ended 31 December 2023, the Bank sold Angolan sovereign debt securities recognized in the Investment portfolio at amortized cost, which were close to maturity and whose receivable amount corresponded approximately to the sale price. Therefore, as this is an infrequent transaction, the Board of Directors considers that it does not jeopardize the business model established.

This operation led to the recognition of a capital gain of AOA 8,508,936 thousand in 2023.

In 2023, BFA contracted a set of short-term reverse repo operations with the Angolan state, negotiated through BODIVA, which matured in the first quarter of 2024. Given the nature of the operations, the Board of Directors recognizes their classification under Investments at amortized cost. Impairment recognized follows the model already implemented for other similar credit exposures.

The breakdown of investments at amortized cost, by residual maturity, is disclosed in Note 30.2.

The fair value and the detail by fair value hierarchy of the investment portfolio at amortized cost are presented in Note 30.4.

As at 30 June 2024 and 31 December 2023, impairment losses for Treasury Bonds, Treasury Bills, Eurobonds and foreign treasury bonds were calculated based on the credit risk parameters provided by the international rating agency Moody's.

The credit quality of the investment portfolio at amortized cost is disclosed in Note 30.1.

A reconciliation of changes in the gross book value and impairment losses per stage of investments at amortized cost is presented below:

| Income receivable from loans granted        | 13 291 176                                | 13 378 114   |
|   | 683 859 025                               | 600 370 855  |
| Impairment for loans and advances (Note 17) | (54 750 335)                              | (50 268 076) |
|   | 629 108 690                               | 550 102 779  |

As at 30 June 2024 and 31 December 2023, Loans and advances to customers earned interest at the following weighted average annual rates:

|                          | 30/06/2024 | 31/12/2023 |
|--------------------------|------------|------------|
| In Kwanzas               | 16.,81%    | 16.12%     |
| In United States Dollars | 12.34%     | 12.09%     |
| In Euros                 | 7.00%      | 7.00%      |

As at 30 June 2024 and 31 December 2023, the group of ten largest debtors represents 62.71% and 64.02%, respectively, of the total loan portfolio (excluding guarantees provided and documentary credits).

In the period ended 31 December 2023, loans were written-off in the amount of AOA 9,247,161 thousand (Note 17), in accordance with the criteria defined by the Bank.

In the six-month period ended 30 June 2024 and in the period ended 31 December 2023, there were recoveries of loans and interest previously written off or written down from assets, in the amounts of AOA 132,150 thousand and AOA 342,381 thousand (Note 24), respectively.

The loan portfolio, by segment, presents the following structure:

| Amounts expressed in thousands of Kwanzas   |                                     |                  |                               |                       |                  |                               |                       |  |                 |                               |                       |  |                            |                  |                  |                  |

In order to mitigate the credit risk, credit operations have associated guarantees, namely mortgages or pledges. The fair value of these guarantees is determined on the date the loan is granted and is periodically reassessed.

The loan-guarantee ratio of the corporate, construction and real estate development, and residential segments has the following structure:

| Amounts expressed in thousands of Kwanzas |                      |                                 |                  |                  |                  |            | Amounts expressed in thousands of Kwanzas |                      |                                 |                  |                  |                  |            |

| Tax losses (used)/to be carried forward                               | 42.48%                                    | 41 323 007   | -9.47%     | (8 511 264)  |
| Income tax  | 7.96%                                     | 7 740 535    | 7.59%      | 6 821 689    |

Corporate Tax

As mentioned in Note 2.15, the Bank is subject to Corporate Tax, and the applicable tax rate is 35% for the six-month period ended 30 June 2024 and in the period ended 31 December 2023.

Deferred taxes

As at 30 June 2024 and 31 December 2023, the Bank had no deferred tax assets or liabilities.

As at 30 June 2024, tax losses carried forward from previous periods in the tax return Modelo 1 and the tax losses carried forward for the six-month period ended 30 June 2024, by year of expiry, are analyzed as follows:

| Amounts expressed in thousands of Kwanzas |                |             |
|---|----------------|-------------|
| Year                                      | Year of expiry | Tax losses  |
| 2022                                      | 31/12/2027     | 21 838 961  |
| 2023                                      | 31/12/2028     | 154 477 132 |
| 2024                                      | 31/12/2029     | 118 065 736 |
|   |                | 294 381 829 |

The tax authorities may review the Bank’s tax position for a period of five years, and as a result of different interpretations of tax law, potential adjustments to the respective tax/tax losses assessed may arise.

The Bank’s Board of Directors believes that any additional settlements, which may result from these reviews, will not be significant for the financial statements.

14. OTHER ASSETS

As at 30 June 2024 and 31 December 2023, this caption is detailed as follows:

| Of an administrative and commercial nature                                 | 32 680 810                   | 1 142 216                             | (3 730 074)                            | (2 587 858)                 | -          | (3 047 186) | 1 898 469                                 | -         | 28 944 235                   |
| Guarantees provided and undrawn credit facilities (Note 9)                 | 661 325                      | 256 164                               | (317 641)                              | (61 477)                    | -          | -           | 58 556                                    | -         | 658 404                      |
|  | 51 578 163                   | 1 398 380                             | (4 047 715)                            | (2 649 335)                 | -          | (3 444 213) | 11 545 926                                | -         | 57 030 541                   |
|  | 117 121 258                  | 3 983 070                             | (6 556 161)                            | (2 573 091)                 | -          | (3 444 213) | 16 723 392                                | -         | 127 827 346                  |

For the six-month period ended 30 June 2024, the Bank reversed impairment, on a net basis, in the amount of AOA 489,916 thousand for the portfolio of Impairment of other financial assets – Investments at amortized cost (see Note 8).

In terms of Loan impairment, the Bank increased impairment, on a net basis, in the amount of AOA 4,457,666 thousand (see Note 9).

In 2023, the Bank wrote off a set of operations, with an impairment amount of AOA 9,247,161.

As at 30 June 2024, the caption Guarantees provided includes the impairment recognized for off-balance sheet captions of documentary credits, guarantees provided and undrawn limits included in the loan portfolio. The Bank increased impairment, on a net basis, in the amount of AOA 48,201 thousand (2023: reversal of AOA 243,199 thousand) (see Note 9).

In 2018, the Bank created the Social Responsibility Department, which comprises the (i) monitoring of the “BFA Solidário” project and (ii) subsidies units and is responsible for the Bank’s social activities until the process of setting up the BFA Foundation is completed.

Since it is the intention of the Bank’s Board of Directors that the provision existing as at 30 June 2024 in the amount of AOA 26,639,966 thousand (2023: AOA 26,770,430 thousand) be used as a monetary endowment for the initial assets of the Fundação BFA, it is also its intention that it be alternatively used through the social activity to be developed by the Social Responsibility Directorate until the incorporation of the Fundação BFA is completed. It should be noted that, as mentioned in Note 32, on 5 July 2024, in accordance with a resolution of BFA’s Board of Directors, the Bank proceeded with the initial endowment of the BFA Foundation in the amount equivalent to 50%, which amounted to AOA 12,920,014 thousand.

As at 30 June 2024 and 31 December 2023, the caption Provisions of an administrative and commercial nature in the amount of AOA 28,082,987 and AOA 28,274,425, respectively, consists of provisions to cover several contingencies, frauds, ongoing legal proceedings and other liabilities, corresponding to the best estimate of the costs that the Bank will bear in the future with these liabilities.

In 2023, the Bank settled the amount of AOA 4,183,789 thousand to deal with tax proceedings.

18. OTHER LIABILITIES AND LEASE LIABILITIES

As at 30 June 2024 and 31 December 2023, this caption is detailed as follows:

| Amounts expressed in thousands of Kwanzas              |                   |                   |

|  | <b>55 589 119</b> | <b>59 042 681</b> |

The balance of the caption Tax charges payable – withheld on behalf of third parties includes amounts payable to the Tax Authorities in the month following the month to which it relates. The balance of the caption Liabilities of a civil nature corresponds to invoices for services rendered outstanding to the Bank’s suppliers.

As at 30 June 2024 and 31 December 2023, the balance of the caption Liabilities of an administrative and marketing nature – Staff – Salaries and wages includes the amounts of holidays and holiday allowances, performance bonus and other staff costs.

On 28 March 2023, by Unanimous Written Resolution No. 3/2023 (and following the postponement of the decision taken at the General Meeting of 30 March 2023), the amount relating to 60% of the variable remuneration for 2022 was settled and 40% (AOA 1,035,229 thousand) of that amount deferred for a 3-year period, to be valued considering the interest rate of Angolan treasury bonds, traded on the secondary market, in the same currency and maturity as the deferral.

On 1 April 2024, the General Meeting decided to settle the amount relating to 60% of the variable remuneration for 2023 and to defer 40% (AOA 1,024,727 thousand) of that amount for a 3-year period, to be valued considering the interest rate of Angolan treasury bonds, traded on the secondary market, in the same currency and maturity as the deferral.

On 30 June 2024, this caption includes the sum of AOA 1,021,543 thousand relating to 40% of the variable remuneration for 2022 and the sum of AOA 1,478,233 thousand relating to the variable remuneration for 2023, plus the remuneration described above.

The caption Premium/Discount – Acquisition of securities in the amount of AOA 13,279,718 and AOA 14,567,530 refer to the amount to be deferred to the gain on day 1, for the acquisition of public debt securities, considering that the fair value calculated by the Bank at the time of acquisition does not derive from prices directly observed in the market (the operation was OTC), but based on curves

(level 2), it was concluded that the difference between the fair value of the security acquired and the acquisition price (P&L of day 1) should be accrued over the maturity of the securities and/or recognized in profit or loss at the time of derecognition.

The balance of the caption Other administrative and marketing costs payable – Accrued costs includes the amount of AOA 2,919,075 thousand (2023: AOA 2,858,647 thousand) related to accrued costs with external supplies and services rendered and not yet invoiced by the suppliers.

The caption Other administrative and marketing costs payable – IAC accruals – Own portfolio refers to the IAC payable to the BNA on the interest on securities in the own portfolio.

As at 30 June 2024 and 31 December 2023, the caption Lease liabilities corresponds to the present value of lease payments to be settled over the lease term, recognized under IFRS 16.

The detail of the lease liabilities by maturity is presented below:

| Amounts expressed in thousands of Kwanzas |                  |                  |
|---|------------------|------------------|

Lease liabilities relate to the lease agreements for branches and offices used by the Bank in the course of its business

19. EQUITY

Share Capital

The Bank was incorporated with a share capital of AOA 1,305,561 thousand (equivalent to Euro 30,188,657 at the exchange rate in force on 30 June 2002), represented by 1,305,561 registered shares of one thousand Kwanzas each, having been subscribed and paid-up by incorporation of all assets and liabilities, including property or real estate rights of any nature, as well as all the rights and obligations of the former BFE Branch.

At the end of the 2004, 2003 and 2002, the Bank increased its share capital by AOA 537,672 thousand, AOA 1,224,333 thousand and AOA 454,430 thousand, respectively, through the incorporation of the special reserve for the maintenance of own funds, in order to maintain the counter value in kwanzas of the initial capital endowment in foreign currency.

By Unanimous Resolution of the General Meeting, of 4 October 2018, it was decided to increase BFA's share capital by incorporating reserves recorded under the caption Other reserves and Retained earnings in the amount of AOA 11,478,004 thousand. This capital increase was carried out within the scope of Notice No. 02/2018 of the Banco Nacional de Angola, which defines that the minimum value of fully paid-up share capital in national currency is AOA 7,500,000 thousand.

On 26 November 2018, there was an increase in share capital which corresponded to an increase in the shareholding of each shareholder in proportion to their respective holdings in the share capital of the Bank at that date, with 13,694,439 shares having been issued with a par value of AOA 1,000. Accordingly, at the end of 31 December 2018, the Bank had a total of 15,000,000 ordinary shares outstanding.

On 30 March 2023, the General Shareholders' Meeting decided on a share capital increase by incorporating Free Reserves in the amount of AOA 30,000,000 thousand, remaining above the minimum set by the BNA stipulated in BNA Notice No. 17/2022, raising the capital to AOA 45,000,000 thousand..

Following this resolution, Banco de Fomento Angola, S.A., in accordance with the Angolan Commercial Companies Code, registered the change in capital, which was registered after a public deed on 22 August 2023 and registered at the Commercial Registry Office on 28 August 2023. In addition, following a public deed on 22 August 2023 at the Commercial Registry Office, the General Shareholders' Meeting decided to regroup its shares representing its share capital by applying a regrouping ratio of 1:5, with each 5 shares prior to the regrouping corresponding to 1 share after the regrouping, with the regrouping applying to all shares in the same proportion The Bank regrouped the 45,000,000 shares it had after increasing its capital by incorporating reserves into 9,000,000 shares with a nominal value of 5,000 each.

Consequently, on 30 June 2024 and 31 December 2023, the Bank's share capital increased to AOA 9,000,000 thousand, represented by 9,000,000 registered shares of AOA 5,000 each, as a result of the grouping of the 45,000,000 shares it had after the capital increase.

As at 30 June 2024 and 31 December 2023, the shareholder structure of the Bank is as follows:

|                          | 30/06/2024       |        | 31/12/2023       |        |
|--------------------------|------------------|--------|------------------|--------|
|                          | Number of shares | %      | Number of shares | %      |
| Unitel, S.A.             | 4 671 000        | 51 90% | 4 671 000        | 51 90% |
| Banco BPI, S.A.          | 4 328 370        | 48 09% | 4 328 370        | 48 09% |
| Other BPI Group entities | 630              | 0 01%  | 630              | 0 01%  |
|                          | 9 000 000        | 100%   | 9 000 000        | 100%   |

On 7 October 2016, Unitel, S.A. (Unitel) entered into an agreement with Banco BPI, S.A. (Banco BPI) for the purchase of 2% of the share capital of BFA, which led to an increase in Unitel's stake in BFA from 49.9% to 51.9%. On that same date, the new shareholders' agreement concerning BFA was also signed.

The completion of this operation was dependent on the verification of the following suspensive conditions:

- Authorization from the Banco Nacional de Angola (BNA) for the increase in the qualified shareholding already held by Unitel in BFA and authorization for the capital transactions necessary for the payment to Banco BPI and the transfer to Portugal of the agreed price of Euro 28 million;
- Authorization from the BNA to change the Articles of Association of BFA; and
- Approval of the operation by the General Shareholders' Meeting of Banco BPI.

On 12 December 2016, the Banco Nacional de Angola communicated that it did not object to the practice of the following acts:

- i) i) Partial amendment of BFA's Articles of Association;
- ii) Increase in Unitel's qualified shareholding in the share capital of BFA through the acquisition from Banco BPI of 26,111 ordinary shares representative of 2% of share capital;
- iii) Indirect acquisition of the qualified shareholding representative of 48.10% of BFA's share capital, following the settlement of the general and mandatory initial public offer (IPO) launched by Caixabank for all the shares representative of Banco BPI's share capital.

The BNA established as a condition that the three operations referred to above are indivisible, i.e., it is assumed that they must occur simultaneously or almost simultaneously or, if it is not possible for any reason to ensure their simultaneity, the operation referred to in (ii) must precede the operations referred to in (i) and (iii).

On 5 January 2017, pursuant to the share purchase and sale agreement entered into in 2016, the sale by Banco BPI to Unitel of the shareholding representing 2% of the share capital of BFA was completed.

On 26 November 2018, a share capital increase took place which corresponded to an increase in the shareholding of each shareholder in proportion to their respective shareholdings in the Bank's share capital at that date, with 13,694,439 shares with a nominal value of AOA 1,000 having been issued. Accordingly, as at 31 December 2018, the Bank had a total of 15,000,000 ordinary shares outstanding.

On 22 August 2023, the Bank formalized the share capital increase by incorporation of Free Reserves in the amount of AOA 30,000,000 thousand, grouping its shares to the amount of 9,000,000 shares, with a nominal value of AOA 5,000.

Other reserves and Retained earnings

As at 30 June 2024 and 31 December 2023, this caption is detailed as follows:

| Amounts expressed in thousands of Kwanzas           |             |             |
|---|-------------|-------------|
|   | 30/06/2023  | 31/12/2022  |
| Legal reserve, other reserves and retained earnings |             |             |
| Reserva legal                                       | 45 000 000  | 38 224 192  |
| Outras reservas                                     | 393 771 206 | 316 792 208 |
| Resultados transitados                              | -           | -           |
|   | 438 771 206 | 355 016 400 |

Under current legislation, the Bank must set aside a legal reserve up to the amount of their capital. To this end, a minimum of 10% of the previous period's net profit is transferred to this reserve each period. This reserve can only be used to cover accumulated losses when the remaining reserves have been exhausted. As a result of the General Shareholders' Meeting resolution on the capital increase, effective on 22 August 2023, the Bank increased the legal reserve by 15%, as part of the distribution of profits for 2022, by unanimous resolution of the General Shareholders' Meeting held on 30 March 2023.

As at 30 June 2024, as provided for in Article 165 of the Legal Framework for Financial Institutions, the legal reserve set up by the Bank amounts to its entire share capital, considering that, by resolution of the General Shareholders' Meeting, it was approved, on 1 April 2024, to increase the legal reserve by 4.05% of the profit achieved in 2023 (AOA 6,775,808 thousand to AOA 45,000,000 thousand). In addition, on the same day and at the General Shareholders' Meeting, it was also decided to transfer 45.95% of the profit for 2023 (AOA 76,978,998 thousand) to free reserves, resulting in a balance of other reserves, as at 30 June 2024, of AOA 393,771,206 thousand. The remaining 50% (AOA 83,754,806 thousand) was distributed to shareholders, as disclosed below.

Earnings and dividend per share

In the six-month period ended 30 June 2024 and 31 December 2023, the basic earnings per share and the dividend attributed, relating to the profit of the previous year, were as follows:

| Amounts expressed in thousands of Kwanzas                           |            |             |
|---|------------|-------------|
|   | 30/06/2024 | 31/12/2023  |
| Average number of ordinary shares issued                            | 9 000 000  | 5 153 425   |
| Net profit/(loss) for the period                                    | 89 545 738 | 167 509 612 |
| Dividends distributed in the period relating to the previous period | 83 754 806 | 84 273 132  |
| Basic earnings per share  | 9.950      | 32.505      |
| Diluted earnings per share  | 9.950      | 32.505      |
| Dividend per share attributed during the period                     | 9.306      | 16.353      |

20. NET INTEREST INCOME

In the six-month periods ended 30 June 2024 and 2023, this caption is detailed as follows:

| Amounts expressed in thousands of Kwanzas             |             |             |
|---|-------------|-------------|
| Interest and similar income                           | 30/06/2024  | 30/06/2023  |
| For short-term investments:                           |             |             |
| Term deposits with credit institutions abroad         | 17 758 422  | 10 052 101  |
| Term deposits with credit institutions in the country | 17 785 690  | 3 862 553   |

## 21. FEES AND COMMISSIONS INCOME/(EXPENSE)

In the six-month periods ended 30 June 2024 and 2023, this caption is detailed as follows:

| Amounts expressed in thousands of Kwanzas                  |                     |                    |
|--|---------------------|--------------------|
|  | 30/06/2024          | 30/06/2023         |
| Fees and commissions income                                |                     |                    |
| Fees and commissions on ATMs and TPAs                      | 13 510 512          | 6 211 948          |
| Fees and commissions on payment orders issued              | 1 503 070           | 1 291 057          |
| Commitment fee   | 1 364 640           | 246 374            |
| Fees and commissions on open import documentary credits    | 1 331 147           | 634 457            |
| Fees and commissions on cards                              | 1 239 179           | 725 480            |
| Fees and commissions on currency sales                     | 996 870             | 746 827            |
| Fees and commissions on interbank services                 | 855 352             | 266 292            |
| Fees and commissions on account maintenance and inactivity | 842 798             | 211 098            |
| Fees and commissions for restructuring credit operations   | 625 644             | 305 581            |
| Fees and commissions on guarantees and sureties provided   | 597 826             | 460 756            |
| Fees and commissions on securities                         | 517 663             | 1 841 893          |
| Fees and commissions for opening loans                     | 509 836             | 363 641            |
| Fees and commissions on services rendered                  | 223 223             | 293 444            |
| Fees and commissions on early settlements                  | 144 876             | 10                 |
| Fees and commissions on card cancellation/replacement      | 77 804              | 626 279            |
| Fees and commissions on the issuance of checks             | 40 843              | 348 618            |
| Other fees and commissions                                 | 640 095             | 600 733            |
|  | <b>25 021 378</b>   | <b>15 174 488</b>  |
| Fees and commissions expense                               |                     |                    |
| Fees and commissions on cards                              | (12 197 751)        | (6 164 581)        |
| Fees and commissions on ATMs and TPAs                      | (704 711)           | (495 725)          |
| Fees and commissions on securities                         | (342 919)           | (207 456)          |
| Other fees and commissions                                 | (505 805)           | (296 374)          |
|  | <b>(13 751 186)</b> | <b>(7 164 136)</b> |
| <b>Total</b>   | <b>11 270 192</b>   | <b>8 010 352</b>   |

The variation in the caption Fees and commissions income – Fees and commissions on ATM and POS and in the caption Fees and commissions expense – Fees and commissions on cards, compared to the same period of the previous year, is due to the increase in EMIS prices and its impact on the corresponding prices.

## 22. FOREIGN EXCHANGE GAINS/(LOSSES)

In the six-month periods ended 30 June 2024 and 2023, this caption is detailed as follows:

| Amounts expressed in thousands of Kwanzas   |                   |                   |
|---|-------------------|-------------------|
|   | 30/06/2024        | 30/06/2023        |
| Changes in exchange rates on assets and liabilities denominated in foreign currency | 1 575 698         | 5 374 767         |
| Foreign exchange spot and forward transactions                                      | (2 651 758)       | (701 095)         |
| Foreign currency purchase and sale transactions                                     | 16 475 194        | 6 708 435         |
|   | <b>15 399 134</b> | <b>11 382 107</b> |

The caption Changes in exchange rates on assets and liabilities denominated in foreign currency essentially refers to the foreign exchange gains/(losses) related to the exchange revaluation of the Bank's assets and liabilities in foreign currency on the reporting date.

In the six-month period ended 30 June 2024, the entity recorded an increase in foreign exchange gains/(losses) from foreign currency purchase and sale operations as a result of the pricing effect associated with these transactions.

## 23. GAINS/(LOSSES) ON DISPOSAL OF OTHER ASSETS

In the six-month periods ended 30 June 2024 and 2023, this caption is detailed as follows:

| Amounts expressed in thousands of Kwanzas       |               |               |
|---|---------------|---------------|
|   | 30/06/2024    | 30/06/2023    |
| Net gains/(losses) on sale of assets            |               |               |
| Gains on sale of property, plant and equipment  | 83 341        | 45 918        |
| Losses on sale of property, plant and equipment | (2 143)       | (176)         |
|   | <b>81 198</b> | <b>45 742</b> |

24. OTHER OPERATING INCOME/(EXPENSE)

In the six-month periods ended 30 June 2024 and 2023, this caption is detailed as follows:

| Amounts expressed in thousands of Kwanzas          |             |             |
|--|-------------|-------------|
|  | 30/06/2024  | 30/06/2023  |
| Operating income:                                  |             |             |
| Recovery of administrative and commercial expenses | 3 104 185   | 3 230 260   |
| Gain on expenses charged                           | 26 796      | 1 785 069   |
| Gains on credit recovery                           | 132 150     | 153 186     |
| Other  | 252 168     | 10 158 205  |
|  | 3 515 299   | 15 326 720  |
| Operating expense:                                 |             |             |
| Taxes and fees not levied on income                | (4 908 697) | (4 488 075) |
| Contribution to Deposits Guarantee Fund            | (593 086)   | (3 111 840) |
| Penalties applied by regulatory authorities        | (7 990)     | (42 709)    |
| Other  | (1 249 696) | (25 356)    |
|  | (6 759 469) | (7 667 980) |
|  | (3 244 170) | 7 658 740   |

In the six-month periods ended 30 June 2024 and 2023, the caption Taxes and fees not levied on income includes a balance for value added tax in the amount of AOA 4,360,329 thousand and AOA 3,338,028 thousand, respectively.

In the six-month periods ended 30 June 2024 and 2023, the caption Other operating income – Recovery of administrative and commercial expenses refers, essentially, to: (i) the reimbursement of communication and shipping expenses originally borne by the Bank, namely in execution of payment order operations and (ii) gains from lease renegotiations.

25. STAFF COSTS

In the six-month periods ended 30 June 2024 and 2023, this caption is detailed as follows:

| Amounts expressed in thousands of Kwanzas        |            |            |

| Mandatory social charges                         | 1 910 520  | 1 757 744  |
| Optional social charges                          | 2 261 085  | 1 864 705  |
| Other  | 217 091    | 80 667     |
|  | 29 707 044 | 26 547 691 |
| Pension costs                                    |            |            |
| Supplementary pension plan                       | 1 430 029  | 1 512 869  |
|  | 1 430 029  | 1 512 869  |
|  | 34 272 157 | 31 477 347 |

In 2013, with reference to the last day of the year, the Bank set up the BFA Pension Fund to cover the liabilities with retirement pensions for old age, disability and survival that the Bank granted to its Angolan employees registered with the Social Security, having used the provisions previously set up as an initial contribution to the BFA Pension Fund (defined contribution plan). In accordance with the contract for the set-up of the Fund, BFA will contribute annually with 10% of the salary subject to Angolan Social Security charges, applied on fourteen salaries.

In November 2022, Order No. 3923/22 ((Official Gazette) No. 123 of Series II) published the Addendum to the BFA Pension Fund and the New Pension Plan. The new Pension Plan defines a mixed contribution system between the Associate (BFA) and the Employees and establishes the associate’s rate at 7.5% on the pensionable salary, also defining a variable employee contribution between 2.5% and 10% on the pensionable salary.

In the six-month periods ended 30 June 2024 and 2023, the Bank’s contribution to the BFA Pension Fund amounted to AOA 1,430,029 thousand and AOA 1,512,869 thousand, respectively. In the six-month period ended 30 June 2024, BFA Pensões – Sociedade Gestora de Fundos de Pensões, S.A. Is responsible for managing the BFA Pension Fund. The Bank assumes the role of depositary of the Fund.

26. EXTERNAL SUPPLIES AND SERVICES

In the six-month periods ended 30 June 2024 and 2023, this caption is detailed as follows:

27. OFF-BALANCE SHEET DISCLOSURES

These captions are detailed as follows:

|                                    | Amounts expressed in thousands of Kwanzas |              |
|------------------------------------|---|--------------|
|                                    | 30/06/2024                                | 31/12/2023   |
| Liabilities to third parties:      |   |              |
| Guarantees provided                | 52 711 922                                | 68 560 046   |
| Commitments to third parties       |   |              |
| - Open documentary credits         | 67 708 509                                | 42 558 525   |
| - Undrawn limits                   | 33 630 323                                | 45 101 700   |
|                                    | 154 050 754                               | 156 220 271  |
| Liabilities for services rendered: |   |              |
| Services rendered by the Bank      |   |              |
| - Safekeeping of securities        | 1 920 399                                 | 200 279 059  |
| - Check clearing on foreign banks  | 1 166 852                                 | 440 513      |
| - Documentary remittances          | (97 646 815)                              | (95 157 799) |
|                                    | (94 559 564)                              | 105 561 773  |

As at 30 June 2024 and 31 December 2023, the Bank has set up provisions to cover the credit risk assumed on the granting of guarantees, documentary credits and irrevocable credit facilities (Undrawn limits), in the amounts of AOA 452,987 and 479,791 thousand, respectively (Notes 9 and 17).

As at 30 June 2024 and 31 December 2023, the notional amounts of the forwards are recognized under off-balance sheet captions in the amounts of AOA 7,628,967 and AOA 7,703,799 thousand, respectively. (Note 7)

As at 30 June 2024 and 31 December 2023, the caption Safekeeping of securities refers essentially to securities of customers in the custody of the Bank.

28. RELATED PARTIES

In accordance with IAS 24, the following are considered entities related to the Bank:

- the entities that exercise, directly or indirectly, a significant influence over the management and financial policy of the Bank – Shareholders;
- those over which the Bank exercises, directly or indirectly, a significant influence over their financial management and policy – Associates and joint ventures and the Pension Fund;
- key management personnel of the Bank, considering for this purpose executive and non-executive members of the Board of Directors and companies in which the members of the Board of Directors have control or joint control;
- subsidiaries, joint ventures or associates of the shareholder holding control over the Bank;
- key personnel of the shareholder with control over the Bank (executive and non-executive members of the Board of Directors); and entities controlled or jointly controlled by key personnel of the shareholder with control over the Bank.

## 30. RISK MANAGEMENT

BFA's activities are exposed to a variety of financial risk factors, including the effects of changes in market prices: foreign exchange risk, credit risk, liquidity risk and cash flow risks associated with interest rate risk, among others.

BFA's risk management is controlled by the Risk Management Department, in accordance with policies approved by the Board of Directors. Accordingly, the Board of Directors has defined, in writing, the main global risk management principles, as well as specific policies for some areas, such as interest rate risk, liquidity risk and credit risk.

The Board of Directors defines the principles for risk management as a whole and policies that cover specific areas, such as exchange risk, interest rate risk, credit risk, the use of derivatives and other non-derivative financial instruments, as well as the investment of excess liquidity.

### Main Risk Categories

**Credit** – Credit risk is the uncertainty of recovery of an investment and its return, due to the debtor's inability (and that of his/her guarantor, if any) to fulfill its financial commitments, thus causing a financial loss to the creditor. Credit risk is reflected in debt securities or other receivables.

**Market** – Market risk reflects the potential loss that can be recorded by a given portfolio as a result of changes in rates (interest and exchange rates) and/or the prices of the different financial instruments that comprise it, considering both the correlations between them and the respective volatilities. Accordingly, Market Risk encompasses interest rate risk, exchange rate and other price risks.

**Liquidity** – Liquidity risk reflects the inability of the Bank to meet its liabilities associated with financial liabilities on each maturity date without incurring significant losses as a result of a deterioration in the conditions of access to financing (financing risk) and/or sale of its assets for amounts lower than the amounts usually practiced in the market (market liquidity risk).

**Real Estate** - Real estate risk is the probability of negative impacts on the Bank's income or capital level due to fluctuations in the market price of real estate assets.

**Operating** – Operational risk is the potential loss resulting from failures or inadequacies in internal processes, information systems, human behavior or external events.

### 30.1 Credit Risk

Credit risk corresponds to the risk of default by counterparties, with which the Bank maintains open positions in financial instruments, as a creditor. In accordance with the BFA's General Credit Regulations, the granting of credit in the Bank is based on the following fundamental principles:

#### Formulation of proposals

Loan operations, or guarantees, subject to the decision of BFA:

- They are adequately characterized in the Technical Data Sheet, containing all the essential and accessory elements necessary for the formalization of the operation;
- Respect the specific product sheet;
- Are accompanied by a duly substantiated credit risk analysis;
- Contain the signatures of the proposing bodies.

#### Credit risk analysis

In the credit risk analysis, the total exposure of the Bank to the customer, or to the group to which the customer belongs, is considered, according to the terms of the legislation applicable at any time. Exposures in respect of the same customer or economic group are classified, having as reference those that represent the greatest risk.

Currently, considering the regulations of the Banco Nacional de Angola:

- For a single customer, all its liabilities vis-à-vis the Bank, in force or potential, already contracted or committed, for financing and guarantees are considered (total exposure of the Bank to the customer);
- For a group of customers, the sum of the liabilities of each customer that comprises the group is considered (total exposure of the Bank to the group); and
- The existence of guarantees with State risk, or with immediate liquidity, has an impact on the calculation of the value of the Global Exposure.

Classification of Risk

The Bank classifies loan operations in ascending order of risk, according to the following grades:

- Grade A: Minimum risk
- Grade B: Very low risk
- Grade C: Low risk
- Grade D: Moderate risk
- Grade E: High risk
- Grade F: Very high risk
- Grade G: Maximum risk

The individual classification of the exposure considers the characteristics and risks of the operation and of the borrower, and is initially classified based on the following criteria adopted by the Bank:

Grade A: operations that are:

- (i) assumed by the Angolan State, encompassing its central and provincial administrations;
- (ii) assumed by central administrations, central banks of countries, included in group 1 (defined in Instruction No. 1/2015, of 14 January, of the Banco Nacional de Angola), international organizations and multilateral development banks;
- (iii) fully guaranteed by cash deposits, or certificates of deposit, constituted or issued by the lending institution, or by institutions in a controlling or group relationship with the lending institution and having their head office in Angola, or a country included in group 1, multilateral development banks and international organizations, provided that the exposure and the deposit or certificate are denominated in the same currency;

- (iv) fully guaranteed by cash deposits or certificates of deposit constituted or issued by the lending institution or by branches of the lending institution, not covered by the preceding paragraph, provided that the exposure and the deposit or certificate are denominated in the same currency;
- (v) fully guaranteed by securities or bonds issued by the Angolan State, or by the Banco Nacional de Angola.

Grade B and others: remaining loans.

The classification of exposures is revised whenever there are signs of impairment in late payments.

Within the scope of the regular review of loan operations, including loan operations overdue, BFA reclassifies overdue loan operations into those that are due, based on an analysis of the economic prospects of collectability, namely considering the existence of guarantees, the borrowers' or guarantors' assets and the existence of operations whose risk BFA equates to State risk, or even when the situation of delay results from the Bank's exclusive responsibility due to a one-off failure in its processes.

### Association of Guarantees

When granting loans to Retail customers or small companies with a maturity of more than 36 months, in the absence of short-term financial investments, BFA requires, as a rule, the provision of a real guarantee on property.

Loan operations are associated with guarantees considered adequate to the risk of the borrower, the nature and term of the operation, which are duly substantiated, in terms of sufficiency and liquidity.

Real guarantees are assessed prior to the loan decision, and these assessments are periodically reviewed. Exceptions to this rule (with decisions being conditional on a subsequent assessment) imply that disbursement will only occur after the Bank has obtained the guarantee assessment.

The main types of collateral for loans and advances to customers are:

- Mortgages on residential properties;
- Encumbrances on Company assets, such as facilities, inventory or accounts receivable;
- Encumbrances on financial instruments, such as debt securities or shares; and
- Encumbrances on term deposits at the institution.

Long-term financing and loans to corporate entities usually have an associated guarantee. On the contrary, revolving credit products do not generally have an associated guarantee.

Collaterals obtained as a guarantee for financial assets, other than loans and advances to customers, always depends on the type of financial instrument. Debt instruments do not normally have an associated guarantee, with the exception of securitized instruments, which have portfolios of financial instruments as collateral. On the other hand, derivative instruments have associated guarantees.

The Bank's policies on collateral obtained as guarantee have not changed significantly during the reporting period, nor have there been any significant changes in the quality of the collateral held by the Bank since the previous period.

The Bank monitors collateral obtained as security for impaired loans and advances to customers as it becomes more likely that the Bank will take ownership of such collateral to mitigate possible credit losses. Loans to impaired customers (stage 3) and the collaterals obtained as guarantee are detailed as follows:

| Amounts expressed in thousands of Kwanzas |             |            |            |                     |

Exclusions due to incidents

The Bank does not grant loans and advances to customers who have registered material incidents in the last 24 months known to BFA, nor to other companies that are part of a group with customers in that situation. The following are considered material incidents:

- Delays in making payments of principal or interest owed to a credit institution, social security, AGT, court or State Inspectorate for more than 45 days;
- Irregular use of means of payment for which that person or entity is responsible;
- Pending legal actions against that person or entity that have potential adverse effects on their economic or financial position.

Exceptions to these rules have specific decision rules under the Bank’s general credit regulation, which are stricter.

Restructurings

In principle, BFA only formalizes ongoing loan restructuring operations, after assessing the customer’s ability to comply with the new plan, if the following criteria are met:

- New guarantees (more liquid and/or more valuable) are presented for the new operation;

- Interest and late payment fees are paid in advance (in the event of a non-performing operation); and
- There is a significant partial settlement of the outstanding principal (performing and/or non-performing).

Exceptionally, and if none of the above assumptions are met, BFA admits formalizing the formal restructuring of Retail customers’ debts, if it is verified that in the last 6 months, deposits were made of a minimum amount equal to the installment amount foreseen for the restructured operation.

Loan operations restructured due to the customer’s financial difficulties are defined in the General Credit Regulation and comply with the regulator’s specific regulations in this matter.

Restructuring operations are classified, for the purpose of increasing risk, and periodically monitored as to compliance with the established plan and are only unclassified when certain conditions of regularity in complying with the plan are met.

The operations subject to renegotiation are maintained at least at the same risk level in which they were classified in the month immediately prior to the renegotiation. Reclassification to a lower risk level only occurs if there is regular and significant repayment of the operation, payment of interest due and on arrears, or depending on the quality and value of new guarantees presented for the renegotiated operation.

Monitoring of non-performing loans

Non-performing loans are monitored by the commercial teams, as a rule until it is 60 days overdue, with monitoring being done by a specialized team. After 60 days of default, the management of the relationship is transferred to this specialized team, which has the mission of collaborating in loan recovery actions, being able to take over negotiations and restructuring proposals.

The restructuring negotiations follow the principles mentioned above.

This team is responsible for the management and relationship with the customer, with the aim of recovering the loan, resorting to the enforcement, through the courts, if necessary.

Impairment

BFA implemented a model to calculate impairment losses of the loan portfolio, in accordance with the requirements set out in IFRS 9.

BFA calculates the impairment losses of the loan portfolio monthly based on the implemented model, with the amount of impairment determined being approved by the Executive Committee of the Board of Directors.

The first application and the respective outcomes of this model were calculated with reference to 1 January 2018. Since that reference date, monthly calculations have been carried out. The half-yearly results are approved by the Board of Directors of the Bank.

Securities and bonds

As at 30 June 2024 and 31 December 2023, BFA’s securities portfolio complies with the principle of the high credit quality of its issuers, consisting mainly of securities issued by the Angolan State and by the Banco Nacional de Angola.

As at 30 June 2024 and 31 December 2023, the maximum exposure to credit risk presents the following detail:

|   | Amounts expressed in thousands of Kwanzas |              |                |                  |              |                |
|---|---|--------------|----------------|------------------|--------------|----------------|
|   | 30/06/2024                                |              |                | 31/12/2023       |              |                |

| Other assets (Note 14)  | 30 926 589                                |              | 30 926 589     | 23 413 473       |              | 23 413 473     |
|   | 3 674 898 122                             | (67 926 434) | 3 606 971 688  | 3 595 421 931    | (63 696 151) | 3 531 725 780  |
| Off-balance sheet   |   |              |                |                  |              |                |
| Guarantees provided, open documentary credits and undrawn facilities (Note 9) | 154 050 754                               | (452 987)    | 153 597 767    | 156 220 271      | (479 791)    | 155 740 480    |
| Total   | 3 828 948 876                             | (68 379 421) | 3 760 569 455  | 3 751 642 202    | (64 175 942) | 3 687 466 260  |

For financial assets recognized in the balance sheet, the maximum exposure to credit risk is represented by the book value net of impairment. For off-balance sheet items, the maximum exposure from guarantees is the maximum amount that the Bank would have to pay should the guarantees be forfeited and of loan and other credit-related commitments of an irrevocable nature is the total amount of commitments made.

As at 30 June 2024 and 31 December 2023, the credit quality of financial assets is as follows:

| Amounts expressed in thousands of Kwanzas                         |                  |              |                |            |               |
|---|------------------|--------------|----------------|------------|---------------|

30.2 Liquidity risk

Liquidity risk corresponds to the risk of the Bank presenting difficulties in obtaining the financial resources it needs to meet its financial commitments when they become due. Liquidity risk may consist, for example, in the inability to sell a financial instrument quickly for an amount representative of its fair value, because of its large size, in relation to the volume normally traded, or because of some discontinuity in the market.

Within the scope of the Bank's internal policies with respect to exposure to liquidity risk, the respective follow-up and monitoring of the established principles and limits is ensured by the Risk Management Department.

As at 30 June 2024 and 31 December 2023, the total contractual cash flows are detailed as follows:

| Amounts expressed in thousands of Kwanzas                         |                         |                      |                      |                        |                        |                      |                    |                    |                    |                      |

30.3 Market risk

Market risk corresponds to the possible fluctuation of the fair value or future cash flows associated with a financial instrument, due to changes in market prices. Market risk encompasses interest rate risk and exchange rate risk.

Interest rate risk

The interest rate risk corresponds to the risk arising from adverse movements in interest rates resulting in a mismatch in the amount, maturities or interest-fixing dates observed in financial instruments with interest receivable and payable.

As at 30 June 2024 and 31 December 2023, financial instruments by exposure to interest rate risk were as follows:

Currency risk

Currency risk is the fluctuation of the fair value or future cash flows of a financial instrument due to changes in exchange rates.

The securities portfolio of the Bank is divided between securities denominated in national currency and in foreign currency, taking into consideration the overall structure of its balance sheet, in order to avoid incurring, in this manner, currency risk.

As at 30 June 2024 and 31 December 2023, financial instruments by currency are detailed as follows:

| Amounts expressed in thousands of Kwanzas                         |               |                      |             |                  |               |
|---|---------------|----------------------|-------------|------------------|---------------|
|   | 30/06/2024    |                      |             |                  |               |
|   | Kwanzas       | United States Dollar | Euro        | Other currencies | Total         |
| Assets  |               |                      |             |                  |               |
| Cash and deposits at central banks                                | 180 821 197   | 276 085 990          | 178 972 620 | 590 031          | 636 469 838   |

30.4 Fair value of financial assets and liabilities

The Bank classified the financial instruments recorded in the balance sheet at fair value in accordance with the hierarchy established in IFRS 13.

Instruments listed in active markets (level 1)

This category includes financial instruments with available quoted prices in official markets and those in which there are entities that usually disclose prices of transactions for these instruments traded in liquid markets.

Priority in the prices used is given to those observed in official markets, in cases where there is more than one official market the option falls on the main market where these financial instruments are traded.

This category includes, among others, the following financial instruments: (i) derivatives traded on an organized market and (ii) listed shares.

Valuation methods with observable market parameters/prices (level 2)

This category includes financial instruments valued through internal models, namely discounted cash flow models, which require judgments that vary according to the complexity of the products being valued and use assumptions similar to those that an unrelated party would use in estimating the fair value of the same financial instrument. The Bank uses as inputs in its models variables provided by the market, such as interest rate curves and credit spreads. It also includes instruments whose valuation is obtained through quotations disclosed by independent entities but whose markets have the lowest liquidity.

This category includes, among others, the following financial instruments: (i) unlisted bonds; and (ii) over-the-counter (OTC) derivatives.

Montantes expressos em milhares de Kwanzas

Valuation methods with non-observable parameters in the market (level 3)

This level includes the valuations determined by the use of internal valuation models or quotations provided by third parties but where the parameters used are not observable in the market. The bases and assumptions used in the calculation of the fair value are in accordance with the principles of IFRS 13.

This category includes, among others, the following financial instruments: (i) debt securities valued using inputs that are not observable in the market; (ii) unquoted shares; (iii) over-the-counter (OTC) market derivatives with quotes provided by third parties.

As at 30 June 2024 and 31 December 2023, the book value of financial instruments is detailed as follows:

| Amounts expressed in thousands of Kwanzas                         |                        |                            |                     |                      |

The fair value of financial instruments should be estimated, whenever possible, using quotations on an active market. A market is considered active, and therefore liquid, when it is accessed by equally knowledgeable counterparties and where transactions are carried out on a regular basis. Almost all the financial instruments of the Bank are not listed on active markets.

In view of the absence of quotations on active markets, the valuation of financial instruments is performed in the following terms:

a) Financial instruments recorded in the balance sheet at fair value:

Treasury Bonds in national currency that are non-readjustable and Treasury Bonds in national currency indexed to the US dollar exchange rate issued by the Angolan State and held by the Bank for trading in the secondary market with other banks are revalued based on a discounted cash-flows model. The discount curve used can be observed directly on BODIVA's daily report, which the Bank considers to be an active market.

Currency forwards are revalued using a discounted cash-flows model. The amounts in foreign currency are updated with an interest rate curve directly observed from Bloomberg and the amounts in national currency are updated with a curve built with interbank money market yields and reference rates (Luibor) observed on the BNA website.

Since they are not listed on a stock exchange and provided that there is observable market data, the equity instruments, with the exception of Visa Incl, are valued by the equity method and the Participation Units by the quotation made available by the fund management company.

b) Financial instruments recorded in the balance sheet at amortized cost:

For financial instruments recorded in the balance sheet at amortized cost, the Bank calculates their fair value using valuation techniques based on the conditions applicable to similar transactions on the reference date of the financial statements, namely the value of the respective discounted cash flows based on the interest rates considered most appropriate, *i.e.*:

- Non-adjustable Treasury Bills and Treasury Bonds in national currency issued by the Angolan State are valued, for disclosure purposes, based on a discounted cash-flows model.
- Treasury Bonds in dollars issued by the Angolan State are valued, for disclosure purposes, based on a discounted cash-flows model. As there are not yet any significant transactions of this instrument in BODIVA, the discount curve is built based on the yields of the last issues of these bonds.

- For loans and advances to customers, the average interest rates charged by the Bank in the six-month period ended 30 June 2024 and in the period ended 31 December 2023, respectively, were used for operations with similar characteristics and net of accumulated impairment losses; and
- Regarding Cash and deposits at central banks, Loans and advances to other credit institutions repayable on demand, Other loans and advances to central banks and credit institutions, Deposits from central banks and Deposits from other credit institutions and Deposits from customers and other loans, as they are essentially short-term investments, the balance sheet value was considered a reasonable approximation of their fair value.

It should be noted that the fair value presented does not correspond to the realization value of these financial instruments in a sale or liquidation scenario and was not calculated for that purpose.

As at 30 June 2024 and 31 December 2023, the fair value of financial instruments recorded in the balance sheet at fair value presents the following detail by valuation methodology:

| Amounts expressed in thousands of Kwanzas                  |   |  |  |            |
|--|---|--|--|------------|

Fair value of financial instruments recorded at amortized cost

The fair value hierarchy of the financial instruments recorded in the balance sheet at amortized cost is analyzed as follows. These were estimated based on the main methodologies and assumptions described below:

| Amounts expressed in thousands of Kwanzas                         |               |   |  |  |                  |
|---|---------------|---|--|--|------------------|
|   | 30/06/2024    |   |  |  |                  |
|   | Book value    | Fair Value                                |  |  | Total fair value |
|   |               | Level 1<br>Prices on the<br>active market | Level 2<br>Observable market<br>inputs | Level 3<br>Other valuation<br>techniques |                  |

### Cash and deposits at central banks and other demand deposits, Other loans and advances to credit institutions and Deposits from central banks

These assets and liabilities are very short-term, and therefore the balance sheet value is a reasonable estimate of their fair value.

### Securities at amortized cost

The fair value of securities recorded at amortized cost is estimated in accordance with the methodologies followed for valuing securities that are recorded at fair value, as described at the beginning of this Note.

### Loans and advances to customers

The fair value of loans and advances to customers is estimated based on the discounted expected cash flows of principal and interest, considering that the installments are paid on the contractually agreed dates. Discount rates used are the current rates for loans with similar characteristics. For stage 2 loans via the individual analysis model, the fair value considered is the balance sheet value.

For stage 3 loans, for which recovery is via foreclosure of the collateral, the Balance Sheet value was considered.

### Deposits from customers

The fair value of deposits from customers and other loans is short-term, and therefore the balance sheet value is a reasonable estimate of fair value.

## 30.5 Capital management

As at 30 June 2024 and 31 December 2023, the Bank's capital and the regulatory capital ratio (solvency) are determined in accordance with the applicable regulatory standards, namely with Notice No. 8/2021.

Angolan credit institutions should hold a level of capital compatible with the nature and scale of operations, duly weighted by the risks inherent to the operations, with a minimum regulatory capital ratio of 8%, a minimum Tier 1 (T1) capital ratio of 6% and a minimum Common Equity Tier 1 (CET1) capital ratio of 4.5%.

Regulatory capital ratio comprises:

1. Tier 1 capital – comprises: i) Paid-up share capital; ii) Positive retained earnings from previous periods; iii) Legal, statutory and other reserves arising from non-distributed profits, or set up to increase capital; iv) Net profit of the previous period; v) Provisional net profit of the current period; vi) Equity instruments; and, vii) Share premium.
2. The negative elements of Tier 1 capital – comprise: (i) Own shares in the portfolio, at book value in the balance sheet; (ii) Losses carried forward from previous periods; (iii) Net loss of the previous period; (iv) Provisional net loss of the current period; (v) Intangible assets net of amortization, including goodwill included in the valuation of significant investments of the institution; (vi) Expenses with deferred costs related to pension liabilities; (vii) Deferred tax assets depending on future profitability; (viii) Adjustments on impairment losses on financial instruments in relation to that determined by the Banco Nacional de Angola in the prudential supervision; (ix) Positive revaluation differences arising from the application of the equity method; (x) Actuarial losses not recognized in profit and loss; (xi) The amount of the items that need to be deducted from additional Tier 1 capital items that exceed the Institution's additional Tier 1 capital items; (xii) The exposure value of incomplete transactions; (xiii) The applicable amount of Common Equity Tier 1 instruments of credit institutions held directly, indirectly and synthetically with which the Institution has cross-holdings that the Banco Nacional de Angola considers to have been set up to artificially inflate the Institution's capital; (xiv) The applicable amount of Common Equity Tier 1 instruments of credit institutions held by the Institution directly, indirectly and synthetically where the Institution does not have a significant investment in such entities; (xv) The applicable amount of Common Equity Tier 1 instruments of credit institutions held by the Institution directly, indirectly and synthetically

where the Institution has a significant investment in such entities, excluding underwriting positions held for a period of five (5) business days or less (xvi) Any tax on Common Equity Tier 1 items that is foreseeable at the time it is calculated, except where the Institution appropriately adjusts the amount of Common Equity Tier 1 items to the extent that such tax reduces the amount by which those items may be used to hedge risks or losses.

3. Additional Tier 1 capital – comprises (i) Preference shares; ii) Hybrid and/or convertible instruments; iii) Other instruments whose issue conditions have been previously approved by the Banco Nacional de Angola; and iv) Share premium relating to the items included in the previous sub-paragraphs.

4. The negative elements of additional Tier 1 capital – comprise: i) Additional Tier 1 instruments held directly, indirectly and synthetically, including additional Tier 1 instruments that the Institution may be required to acquire as a result of existing contractual obligations; ii) Additional Tier 1 instruments of credit institutions held directly, indirectly and synthetically, with which the Institution has cross-holdings that the Banco Nacional de Angola considers to have been set up to artificially inflate the Institution's capital; iii) The applicable amount of additional Tier 1 instruments of credit institutions held directly, indirectly and synthetically, where the Institution does not have a significant investment in those credit institutions; (iv) The applicable amount of additional Tier 1 capital instruments of credit institutions held directly, indirectly and synthetically by the Institution, where the institution has a significant investment in such credit institutions, excluding underwriting positions held for a period of five (5) business days or less; (v) The amount of items required to be deducted from Tier 2 capital items in excess of the Institution's Tier 2 capital items; and, (vi) Any tax on additional Tier 1 capital items that is foreseeable at the time it is calculated, except where the Institution appropriately adjusts the amount of additional Tier 1 capital items to the extent that such tax reduces the amount by which those items may be used to hedge risks or losses.

5. Tier 2 capital – comprises: i) Redeemable preference shares; ii) Reserves from the revaluation of real estate for own use; iii) Subordinated debt, in the form of loans or bonds issued, whose issue conditions were previously approved by the Banco Nacional de Angola; iv) Other instruments whose issue conditions were previously approved by the Banco Nacional de Angola; and, v) Share premium relating to the items included in the previous points.

6. The negative elements of Tier 2 capital – comprise: i) Common Equity Tier 2 instruments held directly, indirectly and synthetically, including Tier 2 instruments that the Institution may be required to acquire as a result of existing contractual obligations; ii) Tier 2 instruments of directly, indirectly and synthetically held credit institutions with which the Institution has cross-holdings that the Banco Nacional de Angola considers to have been set up to artificially inflate the Institution's capital; (iii) The applicable amount of Tier 2 instruments of credit institutions held directly, indirectly and synthetically, where the Institution does not have a significant investment in such credit institutions; and, (iv) Tier 2 instruments of credit institutions held directly, indirectly and synthetically by the Institution, where the Institution has a significant investment in such entities, excluding underwriting positions held for a period of five (5) business days or less.

Net profit for the previous period and for the current period referred to in the previous paragraphs can only be considered whenever they are certified by the expert accountant who is a member of the supervisory body or single auditor and by the external auditor.

The table below shows the capital and the solvency ratio of the Bank as at 30 June 2024 and 31 December 2023:

| Amounts expressed in thousands of Kwanzas         |             |             |
|---|-------------|-------------|
|   | 30/06/2024  | 31/12/2023  |
| Regulatory capital ratio                          |             |             |
| Tier I capital                                    | 517 005 711 | 470 142 948 |
| Tier II capital                                   | -           | -           |
| Total   | 517 005 711 | 470 142 948 |
| Regulatory Capital Requirements                   |             |             |
| Credit risk requirements                          | 54 886 286  | 47 048 554  |
| Market risk requirements                          | 1 807 967   | 1 884 471   |
| Operational risk requirements                     | 39 614 075  | 39 614 075  |
| Excesses of prudential limits for large exposures | 188         | 188         |
| Total   | 96 308 516  | 88 547 288  |
| Regulatory Solvency Ratio                         | 42.95%      | 42.48%      |

31. RECENTLY ISSUED ACCOUNTING STANDARDS AND INTERPRETATIONS

Clarification of the requirements for classifying liabilities as current or non-current (amendments to IAS 1 – Presentation of Financial Statements)

On 23 January 2020, the IASB issued an amendment to IAS 1 Presentation of Financial Statements to clarify how to classify debt and other liabilities as current and non-current.

The amendments clarify a criterion in IAS 1 for classifying a liability as non-current: the requirement for an entity to have the right to defer settlement of the liability for at least 12 months after the reporting period.

The amendments:

- a. specify that an entity's right to defer settlement must exist at the end of the reporting period;
- b. clarify that the ratios that the entity must meet after the balance sheet date (i.e., future ratios) do not affect the classification of a liability on the balance sheet date. However, where non-current liabilities are subject to future ratios, companies must disclose information that enables users to understand the risk that these liabilities may be repaid within 12 months after the balance sheet date; and
- c. clarify requirements for classifying liabilities an entity will or may settle by issuing its own equity instruments (e.g., convertible debt).

This amendment is effective for periods after 1 January 2024.

The Bank has no impacts resulting from the adoption of this standard.

### Lease liability in a sale and leaseback transaction (amendments to IFRS 16 – Leases)

The IASB issued amendments to IFRS 16 – Leases in September 2022 that introduce a new accounting model for variable payments in a sale and leaseback transaction.

These amendments confirm that:

- On initial recognition, the seller-lessee includes variable lease payments when it measures a lease liability arising from a sale-and-leaseback transaction.
- After initial recognition, the seller-lessee applies the general requirements for subsequent accounting of the lease liability such that it recognizes no gain or loss relating to the right of use it retains.

A seller-lessee may adopt different approaches that satisfy the new requirements on subsequent measurement.

Under IAS 8 – Accounting Policies, Changes in Accounting Estimates and Errors, a seller-lessee will need to apply the amendments retrospectively to sale-and-leaseback transactions entered into or after the date of initial application of IFRS 16. This means that it will need to identify and re-examine sale-and-leaseback transactions entered into since implementation of IFRS 16 in 2019, and potentially restate those that included variable lease payments.

The Bank has no impacts resulting from the adoption of this standard.

### Amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures - Supplier Finance Arrangements

On 25 May 2023, the International Accounting Standards Board (IASB) published Supplier Finance Arrangements with amendments to IAS 7 – Statement of Cash Flows and IFRS 7 – Financial Instruments Disclosures.

The amendments address disclosure requirements for supplier finance arrangements – also known as supply chain finance, trade payables finance or reverse factoring arrangements.

The new requirements complement those already included in IFRS standards and include disclosures on:

- Terms and conditions of supplier finance arrangements;
- The amounts of liabilities covered by such agreements, the extent to which suppliers have already received payments from the finance providers and under which caption those liabilities are presented in the balance sheet;
- The ranges of payment due dates; and
- Information on liquidity risk.

The Bank has no impacts resulting from the adoption of this standard.

Standards, amendments and interpretations issued but not yet effective for the Bank:

### Amendments to IAS 21 - The Effects of Changes in Foreign Exchange Rates: Lack of Exchangeability

On August 15, 2023, the International Accounting Standards Board (the IASB or Board) issued Lack of Exchangeability (Amendments to IAS 21 – The Effects of Changes in Foreign Exchange Rates) (the amendments).

The amendments clarify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking.

An entity assesses whether a currency is exchangeable into another currency at a measurement date and for a specified purpose. When a currency is not exchangeable, the entity has to estimate a spot exchange rate.

According to the amendments, entities will have to provide new disclosures to help users assess the impact of using an estimated exchange rate on financial statements. These disclosures may include:

- the nature and financial effects of the currency not being exchangeable into the other currency;
- the spot exchange rate(s) used
- the estimation process; and
- the risks to which the entity is exposed because of the currency not being exchangeable into the other currency.

The amendments apply for annual reporting periods beginning on or after 1 January 2025. Early adoption is permitted.

The Bank has not early applied the standard.

### Amendments to the Classification and Measurement of Financial Instruments

On 30 May 2024, the International Accounting Standards Board (the IASB or the Board) issued amendments to the classification and measurement requirements of IFRS 9 – Financial Instruments. The changes aim to resolve the diversity in the application of the standard, making the requirements more understandable and consistent.

The amendments:

- Clarify the classification of financial assets with environmental, social and governance (ESG)-linked features and other similar features, since these features in loans can affect whether loans are measured at amortized cost or fair value. In order to resolve any potential diversity in practice, the amendments clarify how to assess the contractual cash flows of loans.
- Clarify the date on which a financial asset or financial liability is derecognized when it is settled through electronic payment systems. There is an accounting policy option that allows the derecognition of a financial liability before delivering the cash on the settlement date, if certain criteria are met.

- Improve the description of the term “non-recourse”. According to the amendments, a financial asset has non-recourse features if the ultimate contractual right to receive cash flows from an entity is limited to the cash flows generated by specified assets. The presence of non-recourse features does not necessarily exclude the financial asset from complying with the SPPI (solely payment of principal and interest) requirement, but the features need to be carefully analyzed.
- Clarify the treatment of contractually linked instruments (CLI). CLI must feature a waterfall payment structure that creates concentration of credit risk by allocating losses disproportionately between different tranches. The underlying pool can include financial instruments not in the scope of IFRS 9 classification and measurement (e.g., lease receivables), but must have cash flows that are equivalent to SPPI criterion.

The IASB has also introduced additional disclosure requirements relating to equity instruments classified at fair value through other comprehensive income (FVOCI) and financial instruments with contingent features, for example features linked to ESG targets.

This amendment is effective for periods after 1 January 2026. Early adoption is permitted.

The Bank has not early applied the standard.

### IFRS 18 Presentation and Disclosure in Financial Statements

On 9 April 2024, the International Accounting Standards Board (the IASB or Board) issued the new standard, IFRS 18 Presentation and Disclosure in Financial Statements.

The main amendments to this standard are:

- Providing a more structured income statement. Specifically, it introduces a new subtotal “operating profit or loss” and the requirement that all income and expenses be classified into three new separate categories based on an entity’s main business activities: Operating, Investing and Financing.

- Requirement for entities to analyze their operating expenses directly on the face of the income statement – either by nature, by function or in combination.
- Requirement for some of the “non-GAAP” measures that the Entity/Group uses to be reported in the financial statements. IFRS 18 defines management-defined performance measure (MPM or non-GAAP Performance Measures) as a subtotal of income and expenses that an Entity uses:
  - in public communications outside financial statements; and
  - to communicate management’s view of the financial performance.
 IFRS 18 requires entities to disclose information about all its MPMs in a single note to the financial statements. These include: how the measure is calculated; how it provides useful information; and a reconciliation to a value determined in accordance with IFRS.
- Introduction of improved guidelines on how entities group information in financial statements. It provides guidance on whether material information should be included in the primary financial statements or in the notes.

IFRS 18 is effective for annual reporting periods beginning on or after 1 January 2027. The standard is applied retrospectively. Early adoption is permitted.

The Bank has not early applied the standard.

### IFRS 19 Presentation and Disclosure in Financial Statements

On 9 May 2024, the International Accounting Standards Board (the IASB or Board) issued the new standard, IFRS 19 Subsidiaries without Public Accountability: Disclosures, which allows eligible subsidiaries to use IFRS with reduced disclosures. The application of IFRS 19 will reduce the costs of preparing the financial statements of subsidiaries, while maintaining the usefulness of the information for the users of their financial statements.

A subsidiary may elect to apply the new standard in its consolidated, individual or separate financial statements, provided that, at the reporting date:

- it has no public accountability;
- its parent prepares consolidated financial statements which comply with IFRS.

A subsidiary that applies IFRS 19 is required to make an explicit and unreserved statement of compliance with IFRS that IFRS 19 has been adopted.

IFRS 19 is effective for annual reporting periods beginning on or after 1 January 2027. The standard is applied retrospectively. Early adoption is permitted.

The Bank has not early applied the standard.

## 32. SUBSEQUENT EVENTS

On 5 July 2024, in accordance with a resolution of BFA's Board of Directors, the Bank made the initial allocation to the BFA Foundation, in an amount equivalent to 50%, which amounted to AOA 12,920,014 thousand.

## 33. EXPLANATION ADDED FOR TRANSLATION

These financial statements are a free translation of the financial statements originally issued in Portuguese. In the event of discrepancies, the Portuguese language version prevails.

LIMITED REVIEW REPORT ON THE FINANCIAL STATEMENTS

(Free Translation from a report originally issued in Portuguese language. In case of doubt the Portuguese version will always prevail)

To the Board of Directors of  
Banco de Fomento Angola, S.A.

Introduction

We have performed a limited review on the accompanying condensed interim individual financial statements of Banco de Fomento Angola, S.A. ("Bank"), which comprise the condensed interim individual Balance Sheet as at June 30, 2024 (which shows a total of AOA 3,658,283,779 thousand and a total equity of AOA 573,316,944 thousand, including a net profit attributable to the Bank's shareholders of AOA 89,545,738 thousand), as well as the condensed interim individual Statement of Income and Other Comprehensive Income, the condensed interim individual Statement of Changes in Equity and the condensed interim individual Cash Flow Statement for the six-month period ended on that date, and the Notes to the condensed interim individual Financial Statements.

Responsibilities of the Management

The Management is responsible for the preparation and fair presentation of these condensed interim individual financial statements in accordance with IAS 34 – Interim Financial Reporting and for such internal control as the Board deems necessary to enable the preparation of individual financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express a conclusion on these condensed interim individual financial statements. We conducted our review in accordance with ISRE 2410 –Review of Interim Financial Information Performed by the Independent Auditor of the Entity and the Technical Standards of the Angolan Institute of Accountants ("Normas Técnicas da Ordem dos Contabilistas e Peritos Contabilistas de Angola").

KPMG Angola – Audit, Tax, Advisory, S.A., an Angolan private limited company and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

KPMG Angola – Audit, Tax, Advisory, S.A.  
Capital Social: 4.250.000 USD = 125.000.000 ANG  
Pessoa Colectiva NP 540/11760/1

These standards require us to conclude on whether anything has come to our attention that leads us to believe that the financial statements, as a whole, are not prepared, in all material aspects, in accordance with IAS 34 – Interim Financial Reporting.

A limited review of Financial Statements is a work designed to provide reasonable assurance. The procedures we perform consist primarily of inquiries and analytical procedures and the subsequent assessment of the evidence obtained.

The procedures performed on a limited review are substantially reduced than the procedures performed in an audit conducted in accordance with the International Standards on Auditing (ISA). Consequently, we do not express an audit opinion on those financial statements.

Conclusion

Based on our limited review, nothing has come to our knowledge that leads us to believe that the accompanying condensed interim individual financial statements of Banco de Fomento Angola, S.A. as at June 30, 2024, are not prepared, in all material respects, in accordance with IAS 34 – Interim Financial Reporting.

Luanda, September 13, 2024

(Registered Auditor with certificate no. 20140081)

SUPERVISORY BOARD

OPINION OF THE SUPERVISORY BOARD ON THE INTERIM INDIVIDUAL FINANCIAL STATEMENTS FOR H12024

In compliance with the applicable legal and regulatory provisions, namely pursuant to article 441(g) of the Angolan Companies Act (Law no. 1/04 dated 13th February), as well as pursuant to article 71(2) of the Financial Institutions Legal Framework (Law no. 14/21 dated 19th May), in conjunction with article 15(1)(d) of Notice no. 1/22 dated 28th January (the Financial Institutions Corporate Governance Code ) and article 6(5) of Notice no. 5/19 dated 30th August (the Accounting Standardisation and Harmonisation Process for the Angolan Banking Sector) and with article 8(1) of BFA’s Supervisory Board Regulations approved on the 19th December 2023, it is incumbent upon the Supervisory Board to issue an opinion on BFA’s Interim Condensed Individual Financial Statements as of 30th June 2024, as submitted by the Board of Directors.

It is incumbent upon BFA’s Board of Directors the duty of drafting and submitting the Interim Condensed Individual Financial Statements as of 30th June 2024.

It is incumbent upon BFA’s Supervisory Board the duty of reviewing, analysing and assessing the information contained within the Interim Condensed Individual Financial Statements in order to issue a professional and impartial opinion based on its supervisory function.

The Supervisory Board reviewed and analysed the Interim Condensed Individual Financial Statements, which comprise the Interim Condensed Individual Balance Sheet, the Interim Condensed Individual Income Statement and Other Comprehensive Income, the Interim Condensed Individual Cash Flow Statement and the Interim Condensed Individual Statement of Changes in Equity as of 30th June 2024. These statements demonstrate, for accounting purposes, that the Interim Condensed Individual Balance Sheet recorded as follows: Total Assets of AOA 3,658,283,779 thousand, Equity of AOA 573,316,944 thousand, which comprises a Net Profit of AOA 89,545,738 thousand and Total Liabilities of AOA 3,084,966,835 thousand. On the other hand, the Interim Condensed Individual Income Statement and Other Comprehensive Income recorded, for accounting

SUPERVISORY BOARD

purposes, a Net Financial Income of AOA 136,294,812 thousand, an Operating Income of AOA 163,920,573 thousand, a Profit Before Tax from Ongoing Operations of AOA 97,286,273 thousand and a Net Profit of AOA 89,545,738 thousand, all of which recorded for the six-month financial period under review that ended on the 30th of June 2024, in accordance with the Individual Financial Statements approved by the Board of Directors.

The Supervisory Board did not identify any situation that was not in accordance with legal regulations, International Financial Reporting Standards (IFRS) and applicable accounting practices. Moreover, the Supervisory Board considers that the financial statements present a true and fair view of the Bank’s financial position and the results of its operations in all materially relevant aspects.

The Supervisory Board took note of the External Auditors’ Limited Review Report concerning the Interim Condensed Individual Financial Statements as of 30th June 2024, which was issued unreservedly, with the auditor stating that “nothing has come to our attention that leads us to conclude that the accompanying interim condensed Individual financial statements of **Banco de Fomento Angola, S.A.** as of 30th June 2024 are not prepared, in all material respects, in accordance with IAS 34 – Interim Financial Reporting.”.

Accordingly, the Supervisory Board issues a favourable opinion on the approval of BFA’s Interim Condensed Individual Financial Statements as of 30th June 2024.

# Notes to the Financial Statements

## 1. INTRODUCTION

Banco de Fomento Angola, S.A. (hereinafter also referred to as Bank or BFA), was incorporated by Public Deed on 26 August 2002, following the transformation of the Angolan Branch of Banco BPI, S.A. into a bank under local law, and is fully owned by BPI.

In 2008, BPI sold 49.9% of its stake in the Bank to Unitel, S.A..

As indicated in Note 18, on 5 January 2017, in execution of the share purchase and sale agreement entered into 2016, the sale by Banco BPI to Unitel of the shareholding representing 2% of BFA's share capital was completed. Thus, on 30 June 2024 and 31 December 2023, BFA was majority held by Unitel, S.A., with a stake of 51.9%.

The Bank is engaged in obtaining funds from third parties in the form of deposits or other funds, which it invests, together with its own funds, in the granting of loans, deposits in the Banco Nacional de Angola, investments in credit institutions and acquisition of securities or other assets, for which it is duly authorized. It also provides other banking services and performs various types of operations in foreign currency, having for this purpose, as at 30 June 2024, a national network of 158 branches, 11 investment centers, 7 large corporate centers, 4 Oil & Gas and Public Sector centers, 11 medium corporate centers and 1 Private Banking center.

These are the first condensed interim consolidated financial statements presented by the Bank, and therefore consolidation has been carried out for comparative purposes as at 30 June 2024 and 31 December 2023.

As at 30 June 2024, the individual financial information of the companies that comprise the BFA Group is as follows:

|                       | Head office | Activiçty        | Equity      | Assets        | Profit/ (loss) for the period | BFA's direct shareholding | BFA Group's effective shareholdings | Consolidation method |
|-----------------------|-------------|------------------|-------------|---------------|-------------------------------|---------------------------|-------------------------------------|----------------------|
| BFA (Individual)      | Angola      | Banking          | 573 316 944 | 3 658 283 779 | 89 545 738                    | n.a.                      | n.a.                                | n.a.                 |
| BFA Gestão de Activos | Angola      | Asset Management | 2 284 586   | 3 053 430     | 113 819                       | 99.90%                    | 99.90%                              | Full                 |
| BFA Capital Markets   | Angola      | Asset Management | 1 145 355   | 3 961 387     | 534 875                       | 94.94%                    | 94.94%                              | Full                 |
| BFA Pensões           | Angola      | Asset Management | 597 481     | 2 080 589     | 184 778                       | 97.44%                    | 99.94%                              | Full                 |

Following Instruction No. 05/CMC/03.23 on the Transfer of Services and Activities of Investment in Securities and Derivative Instruments, BFA Capital Markets started operating on June 8, 2023, with a share capital of AOA 200 million, focusing on securities trading and custody;

On May 10, 2023, the Angolan Agency for Insurance Regulation and Supervision (in Portuguese, *Agência Angolana de Regulação e Supervisão de Seguros* (ARSEG)) granted a license to BFA Pension Fund, with a share capital of AOA 900 million, endowing the Group with this type of pension fund management.

2. BASIS OF PRESENTATION AND SUMMARY OF MAIN ACCOUNTING POLICIES

2.1 Basis of presentation

The Group’s financial statements have been prepared on the going concern assumption and in accordance with International Financial Reporting Standards (IFRS), pursuant to Notice No. 5/2019, of 30 August, of the Banco Nacional de Angola IFRS includes accounting standards, issued by the International Accounting Standards Board (IASB) and interpretations issued by the International Financial Reporting Interpretation Committee (IFRIC).

The Group’s financial statements now presented relate to the period ended 30 June 2024. These condensed interim

consolidated financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting (IAS 34). Thus, these financial statements do not include all the information required by IFRS, and therefore should be read in conjunction with the financial statements for the period ended 31 December 2023.

The accounting policies used by the Group in the preparation are consistent with those used in the preparation of the financial statements as at 31 December 2023 and 30 June 2023, except for the new standards issued.

The Group’s condensed interim consolidated financial statements are stated in thousands of Kwanzas, rounded to the nearest thousand. The condensed interim consolidated financial statements were prepared in accordance with the historical cost principle, modified by the application of the fair value to derivative financial instruments and financial assets and liabilities recognized at fair value through profit or loss. Other financial assets and liabilities and other non-financial assets and liabilities are recorded at amortized cost or historical cost.

The preparation of the condensed interim consolidated financial statements in accordance with IAS/IFRS requires the Group to make judgments and estimates and uses assumptions which affect the application of accounting policies and the amounts of income, expenses, assets and liabilities. Changes or differences between such assumptions and reality may have impacts on the actual estimates and judgments. The areas involving a higher degree of

judgment or complexity, or areas where significant assumptions and estimates are made in preparing the financial statements are discussed in Note 3.

The condensed interim consolidated financial statements for the six-month period ended 30 June 2024 were approved at the meeting of the Bank’s Board of Directors on 13 September, 2024.

The recently issued accounting standards and interpretations that have not yet come into force and that the Group has not yet applied in the preparation of its financial statements can be analyzed in Note 30.

2.2 Perimeter of Consolidation

These consolidated financial statements present the assets, liabilities, income, expenses, other comprehensive income and cash flows of Banco de Fomento Angola, S.A. and its subsidiaries.

The accounting policies were applied consistently by all the Bank’s subsidiaries for the periods covered by these consolidated financial statements.

Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed or has rights, to variable returns from its involvement with that entity, being able to seize

those returns through the power it has over the entity (de facto control) and having the ability to affect those variable returns through its power over the relevant activities of the entity.

As established in IFRS 10, the Group analyzes the purpose and structure of the way in which an entity’s operations are carried out when assessing control over it.

Subsidiaries are fully consolidated from the date the Group obtains control of their activities until that control ceases.

Third-party shareholdings in these companies are disclosed under Non-controlling interests. The accumulated losses of a subsidiary are attributed to non-controlling interests in the proportions held, which may lead to the recognition of negative non-controlling interests. Gains or losses arising from the dilution or sale of part of the shareholding in a subsidiary, with loss of control, are recognized by the Group in the income statement.

**Balances and transactions eliminated in consolidation**

Balances and transactions between Group companies, including any unrealized gains or losses resulting from intra-group operations, are eliminated in the consolidation process, except in cases where unrealized losses suggest impairment that should be recognized in the consolidated financial statements.

**2.3 Transactions in foreign currency**

Transactions in foreign currency are translated into the functional currency (Kwanza) at the exchange rate prevailing on the transaction date.

Foreign currency transactions are recorded in accordance with the principles of the multi-currency system, with each transaction being recorded according to the respective denomination currencies. Assets and liabilities stated in foreign currency are translated into Kwanzas at the exchange rate published by the Banco Nacional de Angola as at the balance sheet date. Non-monetary assets and liabilities recorded at fair value are translated into the functional currency at the exchange rate published by the Banco Nacional de Angola on the date the fair value is determined and recognized against profit or loss. Income and expenses related to exchange rate differences, whether realized or potential, are recorded in the income statement in the period in which they occur under Foreign exchange gains/(losses).

The “forward currency position” transactions relate to currency forward contracts, and the related income and expenses are recorded under the caption Net gains/(losses) on financial assets and liabilities at fair value through profit or loss in the income statement.

As at 30 June 2024, 31 December 2023 and 30 June 2023, the exchange rates of the Kwanza (AOA) against the United States Dollar (USD) and the Euro (EUR) were as follows:

|       | 30/06/2024 | 31/12/2023 | 30/06/2023 |
|-------|------------|------------|------------|
| 1 USD | 853.629    | 828.800    | 822.940    |
| 1 EUR | 913.725    | 915.990    | 899.227    |

**Forward currency position**

The forward currency position corresponds to the net balance of forward transactions pending settlement. All contracts related to these transactions are revalued at market forward exchange rates.

The difference between the equivalent in Kwanzas at the forward revaluation rates applied, and the equivalent at the contracted rates, is recorded under assets or liabilities, against income or expenses, respectively.

2.4 Financial instruments

2.4.1 Classification of financial assets

In accordance with IFRS 9 - Financial Instruments, financial assets can be classified into three categories with different measurement criteria:

- Amortized cost;
- Fair value through other comprehensive income (FVOCI); and
- Fair value through profit or loss (FVTPL).

The classification of financial assets depends on the business model and the contractual cash flow characteristics (SPPI criterion).

Business model

The business models foreseen in the standard are as follows:

- Business model whose objective is achieved by holding the asset to maturity to collect the contractual cash flows therefrom (Held to collect);
- Business model whose objective is achieved both by collecting the contractual cash flows from the asset and selling it (Held to collect and sell); and
- Other business models (e.g., trading).

Evaluation of the business model

The business model reflects the way the Group manages its assets from a cash-flow generation standpoint. Thus, it is important to understand

whether the objective of the Group is only to receive the contractual cash flows from the assets or whether it intends to receive the contractual cash flows and the cash flows resulting from the sale of the assets. If none of these situations apply (e.g., financial assets are held for trading), the financial assets are classified as part of “other business models” and recognized at fair value through profit or loss.

The factors considered by the Group in identifying the business model for a set of assets include past experience with respect to the way (i) cash flows are received, (ii) asset performance is assessed and reported to management, (iii) risks are assessed and managed and (iv) directors are remunerated.

Financial assets at fair value through profit or loss are held essentially for the purpose of being sold in the short term, or to form part of a portfolio of jointly-managed financial instruments, for which there is clear evidence of a recent pattern of short-term gains. These assets are classified under “other business models” and recognized at fair value through profit or loss.

The evaluation of the business model does not depend on the intentions for an individual instrument, but for a set of instruments, and considers the frequency, the value, the sales calendar in previous periods, the reasons for the referred sales and the expectations regarding future sales. Sales that are infrequent, or insignificant, or close to the maturity of the asset and those motivated by an increase in the credit risk of the financial assets, or to manage concentration risk, among others, may be compatible with the model of holding assets to receive contractual cash flows.

If a financial asset contains a contractual clause that can modify the timing or the amount of the contractual cash flows (such as early amortization or extension of term clauses), the Group determines whether the cash flows that will be generated during the life of the instrument, due to the exercise of that contractual clause, are solely payments of principal and interest on the principal amount outstanding.

In the event that a financial asset includes a periodic interest rate adjustment, but the frequency of such adjustment does not coincide with the benchmark interest rate (for example, the interest rate is adjusted every three months), the Group assesses, at the time of the initial recognition, this inconsistency in the interest component to determine whether the contractual cash flows represent solely payments of principal and interest on the principal amount outstanding.

Contractual conditions that, at the time of the initial recognition, have a minimal effect on cash flows or depend on the occurrence of exceptional or highly unlikely events (such as redemption by the issuer) do not prevent their classification in portfolios at amortized cost or at fair value through other comprehensive income.

SPPI assessment

When the business model involves holding assets in order to (i) collect contractual cash flows or (ii) collect contractual cash flows and sell these assets, the Group assesses whether the cash flows of the financial instrument correspond solely to payments

of principal and interest on the principal amount outstanding (SPPI test). In this assessment, the Group considers whether the contractual cash flows are consistent with a basic loan agreement, that is, the interest includes only considerations regarding the time value of money, credit risk and a profit margin that is consistent with a basic loan agreement. When the contractual terms introduce exposure to risk or variability in cash flows that are inconsistent with a basic loan agreement, the financial instrument is classified and measured at fair value through profit or loss.

The financial assets with embedded derivatives are considered in their entirety, when determining whether the cash flows correspond solely to payments of principal and interest on the principal outstanding (SPPI test).

#### **Financial liabilities at amortized cost**

The Group measures a financial asset at amortized cost if it complies, simultaneously, with the following characteristics and if it is not designated at FVTPL by option (use of the Fair Value Option):

- the financial asset is held in a business model whose main purpose is to hold the assets to collect its contractual cash flows (HTC – Held to collect); and
- its contractual cash flows occur on specific dates and correspond solely to payments of principal and interest on the principal amount outstanding (SPPI).

These instruments are initially recorded at fair value and subsequently valued at amortized cost, based on the effective interest rate method, and are subject to impairment tests.

This category of Financial assets at amortized cost includes Other loans and advances to credit institutions, Loans and advances to customers, debt securities and other financial instruments (Investments at amortized cost) managed based on a business model whose objective is to receive its contractual cash flows.

#### **Financial assets at fair value through other comprehensive income**

The Group measures a financial asset at fair value through other comprehensive if it complies, simultaneously, with the following characteristics and if it is not designated at FVTPL by option (use of the Fair Value Option):

- the financial asset is held in a business model whose objective is to hold the assets to collect its contractual cash flows and/or sell them (HTC and Sell – Held to collect and Sell); and
- its contractual cash flows occur on specific dates and correspond solely to payments of principal and interest on the principal amount outstanding (SPPI - Solely Payments of Principal and Interest).

On initial recognition of an equity instrument that is not held for trading, the Group may irrevocably assign it to this category.

This designation is made on a case-by-case, investment-by-investment basis and is only available for financial instruments that meet the definition of equity instruments under IAS 32 and may not be used for financial instruments classified as equity instruments at issuer level under the exceptions provided for in paragraphs 16A to 16D of IAS 32.

Financial assets at fair value through other comprehensive income are initially recorded at fair value. Gains and losses relating to subsequent changes in fair value are reflected in a specific item of equity (Reserves of financial assets at fair value through other comprehensive income) until they are sold, where they are reclassified to profit or loss for the period, except for equity instruments which are reclassified to retained earnings. Additionally, they are subject, since their initial recognition, to calculation of impairment losses (debt instruments only), which are recognized in profit or loss.

Interest income is calculated in accordance with the effective interest rate method and recognized in the income statement under the caption Interest income and similar income. Income from variable-income securities is recognized in the income statement caption Income from equity instruments on the date when it is attributed. In accordance with this criterion, prepaid dividends are recorded as income in the year the distribution is decided.

**Financial assets at fair value through profit or loss**

All financial assets that are not measured according to the methods described above are measured at fair value through profit or loss.

Debt instruments whose contractual cash flow characteristics do not meet the SPPI criterion, and which would otherwise be measured at amortized cost or at fair value through other comprehensive income, are required to be measured at fair value through profit or loss.

This category also includes assets acquired for the purpose of realizing gains from short-term fluctuations in market prices. This category also includes derivative financial instruments, excluding those that comply with hedge accounting requirements. By default, equity instruments are also classified at fair value through profit or loss, unless the entities opt for the irrevocable classification at fair value through other comprehensive income as referred to above.

In addition, at initial recognition, the Group may irrevocably classify a financial asset, which otherwise meets the requirements to be measured at amortized cost or at fair value through other comprehensive income, as at fair value through profit or loss if the classification significantly eliminates the accounting mismatch that would otherwise exist (Fair Value Option).

Financial assets classified in this category are initially recognized at fair value. Gains and losses arising from subsequent valuation at fair

value are recognized in the income statement. Income is reflected in the respective captions of Interest and similar income.

**Equity instruments**

Equity instruments are instruments that meet the definition of capital from the issuer’s perspective, which means, instruments that do not contain a contractual payment obligation and that evidence a residual interest in the issuer’s net assets. An example of equity instruments are ordinary shares.

Investments in equity instruments are an exception to the general measurement criteria described above. As a general rule, the Group has the option, on initial recognition, to designate, irrevocably, in the category of financial assets at fair value through other comprehensive income, the investments in equity instruments that are not classified as held for trading and that, in the event it did not exercise this option, would be classified as financial assets that are mandatorily accounted for at fair value through profit or loss.

**2.4.2 Classification of financial liabilities**

An instrument is classified as a financial liability when there is a contractual obligation for its settlement to be realized through the delivery of cash or another financial asset, regardless of its legal form.

Financial liabilities are classified into the following categories:

**i. Financial liabilities at amortized cost**

Financial liabilities correspond essentially to Deposits from central banks and other credit institutions and Deposits from customers and other loans. These liabilities are initially measured at fair value, which normally corresponds to the consideration received, net of transaction costs, and are subsequently recorded at amortized cost, in accordance with the effective interest method.

**ii. Financial liabilities held for trading**

This category includes derivative financial instruments with a negative fair value.

**iii. Financial liabilities at fair value through profit or loss (Fair Value Option)**

The Group designates, at initial recognition, certain financial liabilities at fair value through profit or loss (Fair Value Option) provided that at least one of the following requirements is met:

- the financial liabilities are managed, measured and analyzed internally based on their fair value;

- derivative operations are contracted to hedge these assets or liabilities economically, thus ensuring consistency in the measurement of the assets or liabilities and the derivatives (accounting mismatch); and
- the financial liabilities contain embedded derivatives.

#### 2.4.3 Recognition and initial measurement of financial instruments

At the time of their initial recognition, all financial instruments are recorded at their fair value. For financial instruments that are not recorded at fair value through profit or loss, fair value is adjusted by adding or subtracting transaction costs directly attributable to their acquisition or issue. In the case of financial instruments at fair value through profit or loss, the directly attributable transaction costs are immediately recognized in the income statement.

Transaction costs are defined as expenses directly attributable to the acquisition or disposal of a financial asset, or to the issue or assumption of a financial liability, which would not have been incurred if the Group had not carried out the transaction. These include, for example, commissions paid to intermediaries (such as promoters) and mortgage formalization expenses.

Financial assets are recognized in the balance sheet on the transaction date – the date on which the Group commits to purchase the assets, unless there is a contractual stipulation or

applicable legal figure that determines that the transfer of rights occurs at a later date.

At initial recognition, when the fair value of financial assets and liabilities differs from the transaction price, the entity should recognize this difference as follows:

- When the fair value is evidenced by a quotation on an active market of an equivalent asset or liability (that is, level 1 inputs) or based on a valuation technique that uses only observable market data, the difference is recognized as a gain or loss, and
- In the remaining cases, the difference is deferred, and the moment of initial recognition of the gain or loss is determined individually. This difference can then be (i) amortized over the life of the instrument, (ii) deferred until the fair value of the instrument can be determined using observable market data, or (iii) recognized through the liquidation of the asset or liability.

#### 2.4.4 Subsequent measurement of financial instruments

After its initial recognition, the Group measures its financial assets at (i) amortized cost, at (ii) fair value through other comprehensive income, or at (iii) fair value through profit or loss.

Trade receivables from commercial operations that do not have a significant financing component and commercial loans and short-term debt instruments that are initially measured at the transaction

price or by the principal outstanding, respectively, are valued at the aforementioned amount less impairment losses.

Immediately after initial recognition, an impairment is also recognized for expected credit losses (ECL), for financial assets measured at amortized cost and investments in debt instruments measured at fair value through other comprehensive income, resulting in the recognition of a loss in results when the asset is originated.

Financial liabilities are initially recorded at fair value less transaction costs incurred and subsequently at amortized cost, based on the effective interest rate method, with the exception of financial liabilities designated at fair value through profit or loss, which are recorded at fair value.

The subsequent measurement of financial liabilities is generally performed at amortized cost. There are some exceptions to this measurement basis, namely:

- Financial liabilities that are held for trading or when fair value option is applied – the subsequent measurement consists of fair value through profit or loss.
- Financial guarantees – the subsequent measurement consists of the higher of the corresponding expected credit losses and the amount of the initial fee received less the amounts already recognized as revenue in accordance with IFRS 15.

2.4.5 Income and expenses of financial instruments

Income and expenses from financial instruments at amortized cost are recognized according to the following criteria:

- i. Interest is recorded in the income statement under Interest and similar income and Interest and similar expense, using the effective interest rate of the transaction on the gross book value of the transaction (except for impaired assets where the interest is applied on the book value net of impairment) and the interest already recognized and unpaid relating to overdue loans for more than 90 days is reversed, being recognized only when received since it is considered that its recovery is remote, and recognized off balance sheet; and
- ii. The remaining changes in value will be recognized in the income statement as income, or expenses, when the financial instrument is derecognized from the balance sheet under Net gains/(losses) on investments at amortized cost, when it is reclassified, and in the case of financial assets, when there are impairment losses or gains through recovery, which are recorded under Impairment of loans and advances to customers net of reversals and recoveries, in the case of loans and advances to customers or under Impairment of other financial assets net of reversals and recoveries, in the case of other financial assets.

In order to determine the effective interest rate, the Group estimates future cash flows considering all contractual terms of the financial instrument, without considering possible impairment losses. The calculation includes all fees paid or received considered as part of the effective interest rate, transaction costs and all other premiums or discounts directly related with the transaction, except for assets and liabilities at fair value through profit or loss.

Treasury Bonds issued in national currency indexed to the exchange rate of the United States Dollar (hereinafter US Dollar) are subject to exchange rate adjustments. The result of the exchange rate adjustments is reflected in the income statement for the period in which it occurs. The result of the exchange rate adjustment of the nominal value of the security is recorded in the caption Foreign exchange gains/(losses) and the result of the exchange rate adjustment of the discount and accrued interest is recorded under Net interest income – Interest and similar income.

Income and expenses from financial instruments at fair value through profit or loss are recognized according to the following criteria:

- i. Changes in fair value are recorded directly in the income statement, separating the portion attributable to the instrument’s income, which is recorded as interest or dividends according to its nature under the captions Interest and similar income and Income from equity instruments, respectively,

and the remainder, which is recorded as results of financial operations under the caption Net gains/(losses) on financial assets and liabilities at fair value through profit or loss; and

- ii. Interest on debt instruments is recorded in the income statement under the caption Interest and similar income and is calculated using the effective interest rate method.

Income and expenses from financial instruments at fair value through profit or loss are recognized according to the following criteria:

- i. Interest or, when applicable, dividends are recognized in the income statement under the caption Interest and similar income and Income from equity instruments, respectively. For interest, the procedure is the same as for assets at amortized cost;
- ii. Foreign exchange differences are recognized in the income statement under Foreign exchange gains/(losses), in the case of monetary financial assets, and in other comprehensive income, in the case of non-monetary financial assets;
- iii. In the case of debt instruments, impairment losses or reversals are recognized in the income statement under the caption Impairment losses on other financial assets, net of reversals and recoveries; and

iv. The remaining changes in value are recognized in other comprehensive income.

Thus, when a debt instrument is measured at fair value through other comprehensive income, the amounts recognized in the income statement for the financial year are the same as those that would be recognized if measured at amortized cost.

When a debt instrument measured at fair value through other comprehensive income is derecognized from the balance sheet, the gain or loss recorded in other comprehensive income is reclassified to the net profit/(loss) for the period. On the other hand, when an equity instrument measured at fair value through other comprehensive income is derecognized from the balance sheet, the gain or loss recorded in other comprehensive income is not reclassified to the profit and loss account, remaining under a caption of reserves.

2.4.6 Reclassification between categories of financial instruments

Financial assets are not reclassified after their initial recognition, except in the period after the Group changes its business model for managing financial assets. Financial assets are reclassified to other categories only if the business model used in their management is changed. In this case, all affected financial assets are reclassified. The reclassification is applied prospectively from the date of reclassification, and any previously recognized gains, losses (including those related to impairment) or interest are not

restated. Financial assets, at the date of their reclassification, are measured at fair value.

The reclassification of investments in equity instruments measured at fair value through other comprehensive income, or financial instruments designated at fair value through profit or loss, is not allowed.

The reclassification of financial liabilities is not allowed.

During the six-month period ended 30 June 2024, the Group did not reclassify any financial instruments.

2.4.7 Fair value

In accordance with IFRS 13, financial instruments at fair value are measured according to the valuation levels described in Note 29.4.

2.4.8 Modification of loans and advances

The Group occasionally renegotiates or modifies contractual cash flows from loans and advances to customers. In this situation, the Group assesses whether the new terms of the contract are substantially different from the original terms. The Group performs this analysis considering, among others, the following factors:

- If the debtor is in financial difficulty, whether the modification only reduces the contractual cash flows to an amount that the debtor is expected to be able to pay;

- If any significant new term has been introduced, such as profit-sharing or an equity-based return, which substantially affects credit risk;
- Significant extension of the maturity of the contract when the debtor is not in financial difficulties;
- Significant change in the interest rate;
- Change in the currency in which the loan was contracted; and
- Inclusion of a collateral, a guarantee or other improvement associated with the loan, which significantly affects the credit risk associated with the loan.

If the terms of the contract are significantly different, the Group derecognizes the original financial asset and recognizes the new asset at fair value, calculating its new effective interest rate. The renegotiation date is considered the initial recognition date for the purpose of calculating the impairment, including for the purpose of assessing whether a significant increase in credit risk has occurred. However, the Group also assesses whether the newly recognized financial asset is impaired at initial recognition, especially when the renegotiation is related to the fact that the debtor has not made the payments originally agreed. Differences in the book value are recognized in the income statement, as a derecognition gain or loss.

If the terms of the contract are not significantly different, the renegotiation, or modification, does not result in derecognition and the Group recalculates the gross book value based on the revised cash flows of the financial asset and recognizes a gain or loss from this modification in the income statement.

The new gross book value is recalculated discounting the modified cash flows at the original effective interest rate (or adjusted effective interest rate for impaired financial assets, originated or acquired).

After the modification, the Group can determine that the credit risk has improved significantly and that the assets have moved from Stage 3 to Stage 2 (lifetime ECL) or from Stage 2 to Stage 1 (12 month-ECL). This situation can only occur when the performance of the modified asset is in accordance with the new terms of the contract for a period of twelve consecutive months. Additionally, the Group continues to monitor whether there has been a significant increase in the credit risk of these assets, applying specific models for modified assets.

#### 2.4.9 Derecognition not resulting from a modification

Financial assets granted are derecognized when the associated cash flows are extinguished, collected or disposed of to third parties and (i) the Group substantially transfers all risks and rewards of ownership of the asset, or (ii) the Group neither transfers nor substantially holds all the risks and rewards of ownership of the asset and does not hold control over the asset. Gains and losses obtained from the definitive sale of loans and advances to customers are recorded under Other operating income/ (expenses). These gains or losses correspond to the difference between the sales value set and the book value of those assets, net of impairment losses.

The Group participates in transactions in which it has the contractual right to receive cash flows from assets but assumes a contractual obligation to pay those cash flows to other entities and transfers substantially all the risks and rewards. These transactions result in the derecognition of the asset if the Group:

- Has no obligation to make payments unless it receives equivalent amounts from the assets;
- Is prohibited from selling or pledging the assets; and
- Is obliged to remit any cash flow it receives from the assets without material delays.

The guarantees granted by the Group (shares and bonds) through repurchase agreements and securities lending and borrowing operations are not derecognised because the Group holds substantially all the risks and rewards based on the pre-established repurchase price, and therefore the derecognition criteria are not met (see Note 2.5).

Financial liabilities are derecognized when the underlying obligation is settled, expires, or is canceled.

#### 2.4.10. Write-off policy

The Group writes off financial assets, in part or in whole, when it concludes that there is no reasonable expectation of collection. The indicators that demonstrate that there is no reasonable expectation of collection are (i) the shutdown of the activity and (ii) the cases in which the recovery depends on the collection of a collateral,

but in which the value of the collateral is so low that there is no reasonable expectation of fully recovering the asset.

The rules implemented for the selection of loans that may be written off from assets are as follows:

- The loans cannot be under a risk-sharing protocol;
- The loans must be past due for more than 210 days; and
- The loans cannot be marked as overdue renegotiated loans or be part of an active payment agreement.

#### 2.4.11. Impairment of financial assets

The Group determines impairment losses for debt instruments that are measured at amortized cost and at fair value through other comprehensive income, as well as for other exposures that have an associated credit risk such as bank guarantees and commitments assumed.

The requirements of IFRS 9 aim to recognize expected losses from operations, assessed on an individual or collective basis, considering all reasonable, reliable, and duly substantiated information that is available, including information from a forward-looking perspective.

Impairment losses on debt instruments that are measured at amortized cost are recognized against an accumulated impairment caption in the balance sheet, which reduces the book value of the asset, while impairment of assets measured at fair value through other comprehensive income is recognized against other comprehensive income.

Impairment losses arising from the granting of loans and advances to customers are recognized in the income statement under the caption Impairment losses on loans and advances to customers, net of reversals and recoveries and those of the remaining financial assets under the caption Impairment losses on other financial assets, net of reversals and recoveries.

Impairment losses on exposures that have an associated credit risk and that are not positions recorded in assets are recorded as a provision under Provisions in liabilities, in the balance sheet. Charges for the period and reversals are recorded under the caption Provisions, net of reversals in the income statement.

#### Impairment model of loans and advances to customers

The methodology adopted by the Group foresees, in a first stage, the identification of Economic Groups (and Retail customers, hereinafter Retail) considered as individually significant. These are analyzed individually and the remainder collectively, according to homogeneous risk groups. The following criteria for selecting Groups (and Retail) that are individually significant are considered:

- Customers/economic groups with no signs of impairment with exposure greater than or equal to 0.1% of FPR;
- Customers/economic groups with signs of impairment with exposure greater than or equal to 0.02% of FPR; and
- Customers restructured due to financial difficulties with exposure above AOA 50 million.

In the collective analysis methodology, the Group groups customers into homogeneous risk segments, namely the following:

- Consumer credit
- Overdrafts
- Credit cards
- Car loans
- Mortgages
- Small and Medium-sized Businesses - Less significant exposures
- Large Businesses – significant exposures
- State
- Credit institutions

The amount of impairment losses is determined according to whether there is a significant deterioration of the risk since initial recognition, and whether a default event occurs. Consequently, the Group classifies financial instruments into three stages of impairment, as described below:

- Stage 1: Classification to be applied on initial recognition of the financial instruments or in the event of not meeting any of the classification criteria of the other impairment stages
- Stage 2: Classification to be applied to financial instruments that show a significant increase in credit risk (SIRC) since their origin
- Stage 3: All financial instruments that are in default according to the Group's internal definition and in line with Instruction No. 8/2019 will be classified under this stage.

The Stage 2 criteria for classification are as follows:

#### Classification

- Product contracts other than overdrafts, with credit more than 30 days overdue;
- Overdraft product contracts with credit more than 15 days overdue;
- Customer with at least one credit operation restructured due to financial difficulties in the last 6 months;
- Customers with an operation in litigation in the last 5 years;
- Customers with bounced checks and/or inhibited from using checks according to the information available at CIRC (Angolan Centralized Credit Register);
- Customers with unauthorized overdrafts
- Customers with revolving operations (overdrafts, credit cards and escrow accounts) above the limit formally contracted, or revolving credit operations permanently used at, at least, 95% of the limit initially contracted in the last 6 months; and
- Credit with a material decrease in the value of the collateral (greater than 20%) when this results in a funding-collateral ratio greater than 80%.
- Transactions restructured in default (stage 3 on the origination date) and which, on the reporting date, do not meet stage 3 classification criteria.
- Classification of Customer operations due to Significant Increase in Credit Risk (SICR), whenever the Customer's exposure to these criteria is greater than 20% of the Customer's total exposure.

- POCI (Purchased or Originated Credit Impaired) operations that do not have stage 3 classification criteria on the reporting date.
- Unrestructured operations that have not complied with the quarantine period in Stage 2 (6 months after clearing default).
- Restructured operations that have not been restructured in default but have not yet been cleared of restructuring due to financial difficulties.

For individually analyzed customers the following additional criteria are considered:

- Customers with a credit operation in the financial system more than 90 days in arrears, principal or interest written off/ canceled or in litigation;
- Customer subject to Special Recovery Programs;
- Customers with overdue debts to the Tax Administration and/or Social Security;
- Bank pledges or expectation of insolvency or subject to a financial and/or operational recovery/reorganization process;
- Significant change in the Customer's operating results (Companies), for customers subject to Individual Analysis.

#### Propagation

- Propagation of all operations to Stage 2 if the total exposure of the operation in Stage 2 is greater than or equal to 20% of the Customer's exposure.

Applicable only to Stage 3 Customers, the default classification criteria, are as follows, provided they have (i) Absolute Materiality:  $\geq$  AOA 5,000 of overdue loans; (ii) Relative materiality: 1% Corporate and 2.5% Retail, of the Customer's asset exposure.

#### Classification

- Contracts with overdue credit for more than 90 days;
- Restructured contracts with overdue credit for more than 30 days; and
- Restructurings with material loss or grace period of the principal or arising from contracts already at Stage 3.

For individually analyzed customers the following additional criteria are considered:

- Customers in bankruptcy/insolvency or with expectation of bankruptcy/insolvency.

#### Propagation

- Propagation of marking of default when the default exposure represents 20% of total customer exposure.

#### Declassification

- Contracts with overdue credit for more than 90 days: 12-month quarantine period (at least 6 months in Stage 3 and 6 months in Stage 2) with no default activation criteria; and

- Restructured credits: a quarantine period (at least 12 months) is applied with payment of principal and interest without overdue exposure for a period greater than 30 days.

**In calculating collective impairment, the Group considers the following credit risk parameters:**

- Exposure: The exposure at default (EAD) is the estimated amount outstanding in the event of default. This component is relevant for financial instruments that have a variable amortization structure depending on the Customer use (credit current accounts, credit cards, in general any revolving product). The calculation of this estimate is based on the observation of historical data for debtors in respect of which default situations have been verified, relating the levels of use of the limits at the time of default with those in the previous 12 months. In this context, future levels of use are estimated according to the nature of the product, the current levels of use and the value of the cap.
- Probability of default (PD): the Group applies a methodology for calculating the probability of default forecast for each borrower for the entire loan portfolio and for each risk segment. This parameter is used directly to calculate the ECL of operations in Stage 1 and 2 of impairment. Thus, for

- Stage 1 the 12-month period should be considered and for Stage 2 the residual maturity of the operation.
- c) Loss given default (LGD): is the percentage of debt that will not be recovered in the event of a Customer default. The calculation of the LGD is performed based on historical internal information, considering the cash flows associated with the contracts from the time of default until their settlement or until the moment when there are no relevant recovery expectations. It is also included in the calculation of the estimates of the costs associated with the credit recovery processes.

The parameters considered for determining impairment are generally based on the internal historical experience of defaults and recoveries of the Group. The parameters are reviewed and updated periodically to reflect the economic position and to be representative of the current economic context at all times.

The models also incorporate prospects of future economic evolution (forward looking) to determine the expected loss considering the macroeconomic factors that are related to the probability of default and/or recoverability indicators of the Group, namely:

- Real GDP
- Growth rate of non-oil GDP
- (Parallel) USD/AOA exchange rate - end of period
- Luanda Consumer Price Index
- Real Effective Exchange Rate (REER)

In the review processes, the necessary improvements will also be made as detected in the backtesting exercises.

**Impairment model for other financial instruments**

(Deposits at other credit institutions and Investments at amortized cost)

The Group classifies exposures into stages of impairment with regard to financial instruments measured at amortized cost.

**Stage 1 - Financial assets with no significant increase in credit risk since initial recognition**

Assets that do not have a significant increase in credit risk since initial recognition are classified in Stage 1. The calculation of impairment losses for these exposures with a maturity of 12 months.

In assessing the existence of a significant increase in the credit risk for the financial asset portfolio, an increase of more than two notches is considered for a significant increase in the credit risk, in accordance with the information published by the international rating agency Moody's.

**Stage 2 – Financial assets with significant increase in credit risk since initial recognition**

Whenever the existence of a significant increase in the counterparty's credit risk is determined, the exposure is classified as Stage 2.

For these exposures, the Group measures the impairment losses over the respective residual maturity.

**Stage 3 - Financial assets in default**

This stage includes all financial instruments for which events of default have been verified for more than 90 days.

Impairment losses for debt securities, investments and cash and cash equivalents in other credit institutions are calculated based on the credit risk parameters (probability of default and loss given default) provided by the international rating agency Moody's.

For the purposes of calculating impairment losses, the Group also considers risk mitigation through the fair value of financial collateral and mortgage collateral.

**2.5 Operations with repurchase or resale agreement**

Securities sold under repurchase agreements (repos) at a fixed price or at a price equal to the sale price plus interest over the term of the transaction are not derecognized from the balance sheet and are revalued in accordance with the accounting policy of the category to which they belong. The corresponding liability is accounted for under Deposits from customers or Deposits from other credit institutions, as appropriate. The difference between the sale price and the repurchase price is treated as interest and

is accrued over the life of the agreement using the effective rate method and recorded under Net interest income.

Securities purchased under resale agreements (reverse repos) at a fixed price or at a price equal to the purchase price plus interest over the term of the transaction, are not recognized in the balance sheet, and the purchase price is recorded under Loans and advances to customers or Other loans and advances to credit institutions, as appropriate. The difference between the purchase price and the resale price is treated as interest and is accrued over the life of the agreement using the effective interest rate method under Net interest income. The amounts receivable are collateralized by the associated securities.

2.6 Derivative financial instruments

The Group can carry out derivative financial instrument operations, within the scope of its activity, to manage its own positions based on expectations of market developments or to meet the needs of its customers.

All derivative instruments are recorded on the trade date at fair value and changes in fair value are recognized in the income statement unless they qualify as cash flow hedges or net investments in foreign operating units. Derivatives are also recorded in off-balance sheet accounts at their reference value (notional value).

Derivative financial instruments are classified as hedging (provided that all designation conditions are met) or trading instruments, depending on their purpose.

Hedging derivatives

The Group had no hedging derivatives at the date of the first adoption of IFRS 9, however it took the decision to continue to apply as a policy, the accounting treatment of IAS 39 as permitted by IFRS 9.

The Group designates derivatives and other financial instruments to hedge interest rate and foreign exchange risks, resulting from its business. Derivatives that do not qualify for hedge accounting are recorded as trading instruments.

Hedging derivatives are recorded at fair value and the gains or losses resulting from their remeasurement are recognized in accordance with the hedge accounting model adopted.

A hedging relationship exists when:

- at the beginning of the relationship there is formal documentation of the hedge;
- the hedge is expected to be highly effective;
- the effectiveness of the hedge can be reliably measured;

- the hedge is assessed on an ongoing basis and effectively determined to be highly effective over the financial reporting period; and
- in relation to the hedging of an anticipated transaction, the transaction is highly probable and presents an exposure to changes in cash flows that could ultimately affect profit or loss.

When a derivative financial instrument is used to hedge foreign exchange changes arising from monetary assets or liabilities, no hedge accounting model is applied. Any gain or loss associated with the derivative is recognized in profit or loss for the period, as are the changes in the foreign exchange risk of the underlying monetary elements.

i. Fair value hedges

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement, together with changes in the fair value of the asset, liability or group of assets and liabilities to be hedged in respect of the risk covered. If the hedging relationship no longer meets the requirements of hedge accounting, the derivative financial instrument is transferred to the trading category and the hedge accounting is subsequently discontinued (the adjustment made to the book value of a hedging instrument, for which the effective interest rate method is used, is amortized through profit or loss for the period until its maturity and recognized in Net interest income).

If the hedged asset or liability corresponds to a fixed-income instrument, the accumulated gains or losses in respect of changes in the interest rate risk associated with the hedging item until the date the hedging is discontinued, are amortized through profit or loss over the remaining period of the hedged item.

## ii. Cash flow hedges

Changes in the fair value of derivatives, which qualify as cash flow hedges, are recognized in equity - cash flow reserves - for the effective part of the hedging relationships. Changes in the fair value of the ineffective portion of hedging relationships are recognized in the income statement when they occur.

The amounts accumulated in equity are reclassified to the income statement in the periods when the hedged item affects results.

When the hedging instrument is derecognized or when the hedging relationship no longer meets the hedge accounting requirements or is revoked, the hedging relationship is discontinued prospectively. Accordingly, changes in fair value accumulated in equity until the date the hedging is discontinued can be:

- deferred for the remaining period of the hedged instrument; and
- recognized immediately in profit or loss for the period if the hedged instrument has been extinguished.

In the case of the discontinuation of a hedging relationship of a future transaction, the changes in fair value of the derivative recorded in equity remains there until the future transaction is recognized in the income statement. When the transaction is no longer expected to occur, the accumulated gains or losses recorded in equity are immediately recognized in the income statement.

As at 30 June 2024 and 31 December 2023, the Group had no hedging derivatives.

## Derivatives held for trading

Derivatives that are not considered in an accounting hedging relationship are considered as other financial instruments at fair value through profit or loss. When the fair value of the instruments is positive, they are presented under assets, when their fair value is negative, they are classified under liabilities, in both cases under financial assets or liabilities at fair value through profit or loss.

## Embedded derivatives

There is an embedded derivative when a part of the financial instrument traded by the Group trades contains a derivative and a non-derivative component. This component of the derivative is identified as an “embedded derivative”, while the remainder of the contract is described as a “host contract”.

Derivatives embedded in financial instruments are separately accounted for whenever:

- the risks and rewards of the derivative are not related to those of the main instrument (host contract);
- a separate instrument with the same terms meets the definition of a derivative; and
- the hybrid instrument (as a whole) is not initially recognized at fair value through profit or loss.

Embedded derivatives are presented under the captions of financial assets or liabilities at fair value through profit or loss, being recorded at fair value with the changes being reflected in profit or loss. As at 30 June 2024, the Group did not hold any embedded derivatives disclosed in its financial statements.

## 2.7 Equity instruments

A financial instrument is classified as an equity instrument when it meets the definition of equity from the issuer’s perspective, i.e., there is no contractual obligation for its settlement to be made by delivering cash or another financial asset to a third party, regardless of its legal form, evidencing a residual interest in the assets of the issuing entity after deducting all of its liabilities.

Transaction costs directly attributable to the issue of equity instruments are recorded against equity, as a deduction from the amount of the issue. The amounts paid and received for purchases and sales of equity instruments are recorded in equity, net of transaction costs.

Income from equity instruments (dividends) is recognized when the right to receive it is established and are deducted to equity.

2.8 Intangible assets and other tangible assets

Intangible assets are only recognized when: i) they are identifiable; ii) it is probable that future economic benefits will flow from the asset and iii) the cost of the asset can be reliably measured.

The acquisition cost of intangible assets comprises: i) the purchase price, including costs with intellectual rights and fees and after deducting any discounts and ii) any cost directly attributable to the preparation of the asset for its intended use.

After the initial accounting, the Group measures its intangible assets according to the cost model.

Intangible assets, which correspond mainly to IT software, are recorded at acquisition cost, and are amortized on a straight-line basis over a three-year period.

**Intangible assets and other tangible assets** are recorded at acquisition cost less accrued amortization and impairment losses.

The cost includes expenditure that is directly attributable to the acquisition of the goods.

The acquisition cost of property, plant and equipment comprises the purchase price of the asset, expenses directly attributable to its acquisition and costs incurred in preparing the asset to be ready for its intended use. Financial costs incurred with loans obtained for the construction of qual **Intangible assets and other tangible assets** ifying tangible fixed assets are recognized as part of the construction cost of the asset.

Land is not depreciated.

Depreciation is calculated on a straight-line basis, according to the useful life estimated by the Group, which corresponds to the following years of useful life:

|   | Years of useful life |
|---|----------------------|
| Real Estate for own use (Buildings)         | 50                   |
| Improvements in leased buildings            | 10                   |
| Equipment:                                  |                      |
| Furniture and material                      | 10                   |
| IT equipment                                | 3                    |
| Indoor facilities                           | 10                   |
| Transport equipment                         | 3 and 5              |
| Machines and tools                          | 6 and 7              |
| Automatic data processing system (Software) | 3                    |

As mentioned in Note 2.18, this caption includes right-of-use assets arising from lease agreements.

2.9 Non-current assets held for sale

Non-current assets are classified as non-current assets held for sale when their book value is intended to be realized mainly through a sale transaction rather than through their continued use in the Group's activities.

The value of assets received as payment in kind is initially recorded at the lower of the fair value net of selling costs and the book value of the loan at the date the payment in kind was made.

When the outstanding amount of the loan operation is greater than its book value (net of provisions), the difference must be recognized as income for the period, up to the value determined upon valuation of the assets. When the valuation of the assets is lower than the book value of the loan operation, the difference must be recognized as a cost for the period.

Assets recorded under this caption are not amortized and are valued at the lower of book value and fair value. The fair value of these assets is determined based on periodic valuations performed by independent valuers. Whenever the value resulting from these valuations (net of costs to sell) is lower than the book value, impairment losses are recorded under Impairment of other assets, net of reversals and recoveries.

In addition, as these are assets whose fair value level in the IFRS 13 hierarchy corresponds mainly to level 3, given the subjectivity of some assumptions used in the valuations and the fact that there are external indications with alternative values, the Group carries out internal analyses on the assumptions used, which may imply additional adjustments to their fair value.

## 2.10 Impairment of non-financial assets

When there are signs that an asset may be impaired, IAS 36 requires that its recoverable amount is estimated, and an impairment loss shall be recognized whenever the net book value of an asset exceeds its recoverable amount. Impairment losses are recognized in the income statement and are reversed in subsequent reporting periods when the reasons that led to their initial recognition cease. For this purpose, the new depreciated amount shall not exceed the book value that would be accounted, had no impairment losses been allocated to the asset, considering its depreciation.

The recoverable amount is determined as the higher of its fair value less costs to sell and its value in use, which is calculated based on the present value of the estimated future cash flows expected to be obtained from the continued use of the asset and its disposal at the end of its useful life.

On the date of derecognition of a non-financial asset, the gain or loss calculated as the difference between the fair value less

costs to sell and the net book value is recognized in the income statement under Net gains/(losses) on sale of other assets.

## 2.11 Cash and cash equivalents

For the purposes of the cash flow statement, Cash and cash equivalents comprise balances with less than three months' maturity from the balance sheet date, including Cash and deposits at central banks and Deposits at other credit institutions (Notes 4 and 5), and do not include impairment losses.

## 2.12 Dividends

Dividends (income from equity instruments) are recognized in the income statement when the right to receive them is attributed. Dividends are recorded under Net gains/(losses) on financial operations, Net gains/(losses) on other financial instruments at fair value through profit or loss or other income, depending on the classification of the underlying instrument.

## 2.13 Commissions

Income from services and commissions is recognized as revenue from customer agreements to the extent that the performance obligations are satisfied:

- when they are obtained as the services are rendered, their recognition in profit or loss is made in the period to which they relate; and

- when they result from the rendering of services, their recognition is made when that service is completed.

When they are an integral part of the effective interest rate of a financial instrument, the income resulting from services and commissions are recorded in net interest income.

## 2.14 Employee benefits

### Short-term benefits

The Group grants variable remuneration to its employees and directors as a result of their performance (performance bonus). The Executive Committee of the Board of Directors is responsible for establishing the respective allocation criteria for each employee, and the Remuneration Committee is responsible for establishing the criteria at director level. The variable remuneration paid to employees and directors is recorded against profit or loss in the period to which they relate, although payable in the following year (Note 24).

In November 2022, Order No. 3923/22 ((Official Gazette) No. 123 of Series II) published the Addendum to the BFA Pension Fund and the New Pension Plan. The new Defined Contribution Pension Plan defines a mixed contribution system between the Associate (BFA) and the Employees and sets the Associate's rate at 7.5% on the pensionable salary, also setting a variable employee contribution of between 2.5% and 10% on the pensionable salary.

For defined-contribution plans, the liabilities related to the benefit attributable to the Group's employees are recognized as an expense for the period when due (Note 24).

Long-term benefit

This type of long-term benefit is recognized when the Group has a legal or constructive obligation to pay its employees long-term benefits.

The Group grants variable remuneration to directors and 40% of this amount is paid over a 3-year period plus remuneration. In this respect, the remuneration is associated with the interest rate of Angolan treasury bonds, traded on the secondary market in the same currency and maturity as the deferral. The deferred charges are recorded under Interest and similar expense and the principal is recorded under Staff costs, against Other assets.

Termination benefits

This type of benefit is recognized when the Group terminates the employment contract before the employee reaches normal retirement date, or when an employee accepts the termination of employment in exchange for such benefit. The Group recognizes a liability for termination benefits on the earliest of the following dates: when the Group is no longer able to withdraw the offer of benefits or when the

Group recognizes the costs of a restructuring, within the scope of the recognition of restructuring provisions. Benefits due more than 12 months after the end of the reporting period are discounted to their present value.

2.15 Income tax and other taxes

The total income tax recorded in the income statement includes current and deferred taxes.

Current tax

Current tax is calculated based on the taxable income for the period, which differs from the accounting income due to adjustments to the tax base resulting from expenses or income not relevant for tax purposes, or which will only be considered in future periods according to the applicable tax laws (Corporate Tax Code).

Deferred tax

Deferred tax corresponds to the impact on tax recoverable/payable in future periods resulting from deductible or taxable temporary differences between the balance sheet value of assets and liabilities and their tax base, used to determine taxable income. Deferred taxes are calculated based on the tax rate in force or substantially in force at the financial reporting date, and which is estimated to be

applicable on the date of realization of deferred tax assets or on the date of payment of deferred tax liabilities.

Deferred tax liabilities are normally recorded for all taxable temporary differences, whereas deferred tax assets are only recognized up to the amount by which it is probable that future taxable income will exist, to allow for the use of the corresponding deductible temporary differences or tax losses carried forward. Additionally, deferred tax assets are not recorded in cases where their recoverability may be questionable due to other situations, including issues of interpretation of the tax legislation in force.

As at 30 June 2024 and for the year ended 31 December 2023, the Group has not recorded any deferred tax assets or liabilities in its financial statements.

Industrial Tax

As at 30 June 2024, the Group is subject to a Corporate Tax under the terms of the General Tax System. The taxation of its income is carried out under the terms of Law No. 26/20, of July 20 (which revoked Law No. 19/14, of October 22) and, currently, the applicable tax rate is 35%.

The income from public debt securities, resulting from Treasury Bonds and Treasury Bills issued by the Angolan State, whose issue is regulated

by the Framework Law of Direct Public Debt (Law No. 16/02, of December 5) and by Regulatory Decrees No. 51/03 and 52/03, of July 8, as well as the other income obtained by the Group subject to Capital Gains Tax (IAC), are exempt from Corporate Tax, in accordance with the provisions of Article 47(1)(b) of the Corporate Tax Code. This article expressly states that in order to determine the taxable amount, income or gains subject to IAC must be deducted from the net profit calculated under the terms of the previous articles.

Moreover, this law enshrined, among other changes, the eligibility for tax purposes of favorable and unfavorable exchange rate variations as accepted income and costs for tax purposes, respectively. Likewise, provisions/impairment on secured loans are no longer accepted as a cost, except for the part not covered.

In addition, the Corporate Tax is subject to provisional assessment in a single installment to be made by the end of August, calculated by applying a rate of 2% on the result derived from financial intermediation operations, ascertained in the first six months of the previous tax year, excluding income subject to capital gains tax (taxpayers who have presented losses in the previous year are exempt from the provisional assessment).

Tax returns are subject to review and correction by tax authorities for 5 (five) years, which may result in possible amendments to the taxable income for the years 2019 to 2023.

The recording of the tax impacts of the transactions carried out by the Group corresponds to management's understanding of the tax treatment applicable under the legislation issued. In situations where the tax interpretation is questioned by the Tax Authorities (AGT), Management reassesses the probability (above or below 50%) that the adopted tax treatment will be accepted, and consequently determines the most likely or expected amount of tax assets or liabilities to be recorded.

**Capital Gains Tax (IAC)**

The new IAC Code, approved by Presidential Legislative Decree No. 2/2014, of 20 October, came into force on 19 November 2014.

The IAC is generally levied on income from the Group's financial investments. The rate varies between 5% (in the case of interest received on debt securities which are admitted to trading on a regulated market and which have a maturity of three years or more) and 15%.

Notwithstanding the above, with respect to income from public debt securities, according to the understanding of the AGT and the Banco Nacional de Angola addressed to the Angolan Banks Association (in Portuguese, Associação Angolana de Bancos) (letter from the Banco Nacional de Angola dated 26 September 2013), only income arising from securities issued on or after 1 January 2013 are subject to this tax.

This income from Treasury Bonds and Treasury Bills, issued by the Angolan State after 1 January 2013, is subject to IAC at the rate of 10% (5% in the case of debt securities admitted to trading on a regulated market and which have a maturity of three years or more).

On 1 August 2013, the automation process to withhold tax was initiated, by the BNA, in respect of IAC, in accordance with the provisions of Presidential Legislative Decree No. 5/11, of 31 December.

IAC is generally levied on the income from the securities identified above and is withheld by the Group. For these reasons, the Group considers that the conditions to consider IAC as an income tax under IFRS are fulfilled.

**Value Added Tax (VAT)**

Law No. 7/19 introduced VAT, which has been in force since 1 October 2019, repealing the Consumption Tax Regulation (IC) and introducing relevant amendments to the Stamp Duty Code (IS).

Under the terms of the VAT Code approved by Law No. 7/19 and the amendments introduced by Law No. 17/19 of 13 August they are subject to this tax: (i) the transfer of goods and services carried out within national territory, for consideration, by a taxable person acting as such; and (ii) the import of goods.

Nevertheless, the VAT Code provides for the exemption of certain transactions, including the exemption applied to financial intermediation transactions, including those described in Annex III to this Code, except those which give rise to the payment of a specific and predetermined fee or consideration for their performance. This exemption does not entitle the taxable person to deduct the VAT incurred on the acquisition of goods and services connected with exempt transactions.

It should be noted that the VAT rate in force in Angola, applicable to transactions subject and not exempt from VAT, is 14%. Additionally, and in accordance with Article 21(2) of the VAT Code, commercial banks must withhold 50% of the tax included in the invoice or equivalent document issued by the taxpayer at the time of transfer of goods or rendering of services (except for the transfers of goods or services listed as excluded from this withholding tax). In this regard, the withholding of this tax must be made in the periodic VAT return for the month in which this tax becomes chargeable under the terms of Article 21(3) of the VAT Code (i.e., upon receipt of the respective invoice or equivalent document by the entities subject to the withholding VAT system).

However, Instruction No. 000003/DNP/DSIVA/AGT/2020, issued by the Angolan tax authorities, has clarified that transfers of goods to any withholding entities whose payment is made by debit in the account, with the exception of the State, are exempt from withhold. Examples of these situations are transfers of goods within the scope of banking and financial operations in which the Institutions

debit the customer's account, namely: (i) the transfer of leased assets to the respective lessee when the stipulated purchase option is exercised, as well as (ii) the sale of point-of-sale (POS) systems as part of the institutions' provision of payment card acceptance services to their customers.

Under the terms of Article 10(1) of the VAT Code, for the purposes of this tax, and as a general rule, the rendering of services takes place within the national territory when the purchaser has domicile, head office or fixed establishment therein for which the services are acquired. In this context, Article 29(2) of the VAT Code, in conjunction with Article 2(1)(d) of the same tax compendium, provides for a reverse charge mechanism, whereby “whenever the purchaser is a taxable person, the tax is payable by that purchaser, in respect of services rendered within national territory, under Article 10 of the VAT Code, where the service provider is a non-resident taxable person and does not have a fixed establishment in national territory”, i.e., the purchaser, a VAT taxpayer in Angola, must (self)assess the Angolan VAT due on the rendering of services in Angola, when these are rendered by non-resident suppliers.

Moreover, considering the Group is a taxable person that carries out transactions which grant the right to deduct (i.e., transactions subject to VAT) and transactions which do not grant the right to deduct (i.e., transactions which are exempt from this tax under the aforementioned terms), the VAT incurred by the Group on its purchases of goods and services is only partially deductible using the pro rata method.

Nevertheless, the Group, as a taxable person subject to the general VAT system, may, under the terms of Article 27(2) of the VAT Code, adopt the actual allocation method regarding the VAT incurred on goods for sale. This method of deduction consists of the possibility of deducting all the tax incurred in the acquisition of goods in transactions which give rise to a right to deduct but excludes the possibility of deducting the tax incurred in transactions which do not give rise to this right, under the terms of Articles 22 and 24 of the VAT Code. The goods whose tax may be deducted according to the actual use method are subject to prior authorization by the Tax Authorities. Additionally, Instruction No. 000003/DNP/DSIVA/AGT/2020, referred to below, established that credit institutions may adopt the actual allocation method to deduct the VAT incurred on the acquisition of goods and services “exclusively used” to carry out:

- I. Financial lease operations;
- II. Financial operations carried out by institutions without head office or permanent establishment in national territory (“correspondent banks”) for Angolan institutions;
- III. Operations covered by the provisions of Article 6(3) of the VAT Code, namely the re-invoicing of goods and/or services acquired by the institutions in their own name, but on behalf of third parties, to whom the respective goods and/or services are re-invoiced, with a view to obtaining a refund (cost recovery).

For the purposes of VAT deduction according to the mentioned method, credit institutions must prepare a letter addressed to the VAT Services Department (in Portuguese, Direcção dos Serviços

do IVA), requesting the amendment of the statement on the commencement of operations, as well as the respective compliance with the obligations foreseen in the VAT Code regarding the accounting record of the operations, in order to allow the control of the operations whose tax was deducted according to the actual allocation method.

Moreover, the Group is also required to comply with the invoicing rules under the Legal Regime of Invoices and Equivalent Documents (in Portuguese, *Regime Jurídico das Facturas e Documentos Equivalentes* (RJFDE)), in force since April 2019. Within this scope, the economic agents with a turnover equal or superior to Kwanzas equivalent to USD 250 thousand must issue the invoices or equivalent documents through a certified invoicing system.

Property Tax

In accordance with the provisions of Law No. 20/20, published on July 9, which approved the new Property Tax Code and revoked the previous law, the Group withholds Property Tax at a rate of 15% (considering that the taxable amount of these properties corresponds only to 60% of the value of the rents received during the year, since the applicable tax rate is 25%), on the payment or delivery of rents on rented property, with the exception of land for construction, for which Property Tax will be due at a rate of 0.6% of the asset value.

Property Tax will be due on non-rented property in accordance with the following ranges:

- A rate of 0.1% on the asset value, applicable to real estate with an asset value below AOA 5,000,000;
- A fixed value of AOA 5,000 for properties with an asset value above AOA 5,000,000 and below AOA 6,000,000;
- A rate of 0.5% on the asset value exceeding AOA 5,000,000, applicable to real estate with an asset value above AOA 6,000,000.

In the transfer with or without consideration of property, the taxable amount corresponds to the asset value as stated in the land registry at the date of transfer, the value determined by evaluation, in the case of an omitted building, or the declared value, whichever is greater. The transfer of real estate assets is subject to property tax at the rate of 2%, the charge and liability for settlement of which should fall on the Group whenever it acts as purchaser.

Other taxes

The Group is also subject to indirect taxes, namely customs duties, stamp duty, employment income tax, as well as other taxes, namely the Special Contribution on Foreign Exchange Transactions, which, in accordance with Law No. 15/23 of 29 December which came into force on 1 January 2024, is applicable to all transfers made with a national registered office or domicile, within the scope

of contracts for the provision of services, technical assistance, consultancy and management, capital operations and unilateral transfers.

2.16 Provisions and contingent assets and liabilities

Provisions

A provision is set up when there is a present obligation (legal or constructive) as a result of a past event for which the future outflow of resources is probable and can be reliably measured. The provision amount corresponds to the best estimate of the amount to be disbursed to settle the liability, at the balance sheet date. Provisions are measured at the present value of the estimated costs to settle the obligation using a pre-tax interest rate, which reflects the market value, for the discount period and for the risk of the provision in question.

If the future expenditure of resources is not likely, it is a contingent liability, and is subject to the respective disclosure, in accordance with the requirements of IAS 37 – Provisions, contingent liabilities and contingent assets.

Provisions related to legal proceedings, opposing the Group to third parties, are constituted in accordance with internal risk assessments carried out by the Board of Directors, with the support and advice of its legal advisors.

Provisions for loan commitments and financial guarantees provided are measured according to the impairment model implemented as described in Note 2.4.11.

Provisions are reviewed at each balance sheet date and adjusted to reflect the best estimate and are reversed against profit or loss in the proportion of the payments that are not probable.

Provisions are derecognized through their use for the obligations for which they were initially recognized or for the cases that the situations were no longer observed.

Contingent Assets

Contingent assets are not recognized in the financial statements, being disclosed when it is probable that there will be a future economic inflow of resources.

Contingent Liabilities

Contingent liabilities are not recognized in the financial statements but are covered by IAS 37 and disclosed whenever the possibility of an outflow of resources involving economic benefits is not remote. The Group records a contingent liability when:

- i) it is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not entirely within the Group's control; or,

- ii) it is a present obligation that arises from past events, but is not recognized because:
  - a) it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or,
  - b) the amount of the obligation cannot be measured with sufficient reliability.

Identified contingent liabilities are subject to disclosure unless the possibility of an outflow of resources embodying economic benefits is remote.

2.17 Financial and performance guarantees

Financial guarantees

Financial guarantees are contracts that require the issuer to make payments in order to compensate the holder for losses incurred, as a result of breaches of the contractual terms of debt instruments, namely the payment of the respective principal and/or interest.

Financial guarantees issued are initially recognized at their fair value. Subsequently, these guarantees are measured at the higher (i) of the fair value initially recognized and (ii) the amount of any obligation arising from the guarantee contract, measured at the balance sheet date. Any change in the amount of the obligation associated with financial guarantees issued is recognized in the income statement.

Financial guarantees issued by the Group usually have a defined maturity and a periodic fee charged in advance, which varies according to the counterparty risk, amount, and performance of the contract. On this basis, the fair value of the guarantees, on the date of their initial recognition, is approximately equivalent to the value of the initial commission received, considering that the agreed conditions are market conditions. Thus, the amount recognized on the contracting date equals the amount of the initial commission received, which is recognized in the income statement during the period to which it relates. Subsequent commissions are recognized in the income statement, in the period to which it relates.

Performance guarantees

Performance guarantees are contracts that result in one party being compensated if it fails to perform its contractual obligation. Performance guarantees are initially recognized at fair value, which is normally stated by the amount of commissions received over the life of contract. Upon breach of contract, the Group has the right to revert the guarantee, with the amounts being recognized in Loans and advances to customers, following the transfer of the loss compensation to the guarantee beneficiary.

## 2.18 Leases

IFRS 16 sets out requirements regarding the scope, classification/ recognition and measurement of leases:

- from the lessor's perspective, leases continue to be classified as finance leases or operating leases;
- from the lessee's perspective, the standard defines a single accounting model for lease agreements that results in the recognition of a right-of-use asset and a lease liability for all lease agreements except for leases with a period of less than 12 months or for leases of low value assets in which cases the lessee may opt for the recognition exemption provided for in IFRS 16, and, in that case, should recognize the lease payments associated with those contracts as External supplies and services.

The Group has opted not to apply this standard to short-term lease agreements of less than or equal to one year and to lease agreements where the underlying asset has low value, and the option of not applying this standard to leases of intangible assets has also been used.

### Definition of a lease

A contract is or contains a lease if it conveys the right to control the use of an identified asset, that is, obtaining substantially all of the economic rewards of its use, and the right to direct the use of that identified asset, for a certain period of time in exchange for consideration.

### Impacts from the lessee's perspective

The Group recognizes for all leases, except for leases with a period of less than 12 months or for leases of low-value assets:

- a right-of-use asset, initially measured at cost, considering the Net Present Value (NPV) of the lease liability, plus payments made (fixed and/or variable) less lease incentives received, penalties for termination (if reasonably certain), as well as any cost estimates to be incurred by the lessee in dismantling and removing the underlying asset and/or restoring the location where it is located. Subsequently, it is measured according to the cost model (subject to depreciation/amortization according to the lease term of each agreement and to impairment tests);
- a lease liability, initially recorded at the present value of the future lease cash flows (NPV), which includes:
  - fixed payments, less leasing incentives receivable;
  - variable lease payments that depend on an index or rate, initially measured using the index or rate at the start date of the agreement;
  - the amounts payable by the lessee as residual value guarantees;
  - the exercise price of a call-option, if the lessee is reasonably certain to exercise that option; and
  - sanction payments for the termination of the lease if the lease term reflects the exercise of a lease termination option by the lessee.

The lease liability is measured at amortized cost using the effective interest rate method.

Since the interest rate implicit in the lease cannot be readily determined (paragraph 26 of IFRS 16), the lease payments are discounted at the lessee's incremental borrowing rate which incorporates the risk-free interest rate curve (swap curve), plus a risk spread of the Group, applied over the weighted average term of each lease agreement. For open-ended contracts, this date is considered to be the end date of the lease. For other open-ended contracts, the period within which the lease will be enforceable is assessed, as well as any economic penalties associated with the lease. When assessing enforceability, the specific clauses of the contracts are considered, as well as the legislation in force regarding Urban Leases.

Subsequently, the lease liability is measured as follows:

- by an increase in its carrying amount to reflect interest thereon;
- by a decrease in its carrying amount to reflect lease payments; and
- the carrying amount is remeasured to reflect any revaluations or changes in the lease, as well as to incorporate the revision of lease payments fixed in substance and the revision of the lease term.

The Group remeasures a lease liability, and calculates the respective adjustment related to the right-of-use asset whenever:

- there is a change in the lease term or in the assessment of a call-option over the underlying asset, in which case the lease liability is remeasured, discounting the revised lease payments and using a revised discount rate;

- there is a change in the amounts payable under a residual value guarantee, or in the future lease payments resulting from the change in an index or rate used to determine those payments, in which case the lease liability is remeasured by discounting the revised lease payments using an unchanged discount rate (unless the change in the lease payments results from a change in variable interest rates, in which case a revised discount rate should be used); and
- a lease agreement is changed, but such lease change is not accounted for as a separate lease, in which case the lease liability is remeasured, discounting the revised lease payments using a revised discount rate.

Right-of-use assets are depreciated from the lease start date until the end of the useful life of the underlying asset, or until the end of the lease term, whichever is earlier. If the lease transfers the ownership of the underlying asset, or if the cost of the right-of-use asset reflects the fact that the Group will exercise a call-option, the right-of-use asset should be depreciated/amortized from the lease start date until the end of the useful life of the underlying asset.

The estimated useful life of the right-of-use assets is determined following the same principles as for Property, plant and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted by certain remeasurements of the lease liability.

Depreciation/amortization begins on the date the lease takes effect.

Accounting for leases from the lessee's perspective in the Group's financial statements is as follows:

In the income statement:

- the interest expense on lease liabilities is recorded under Net interest income;
- the amounts relating to short-term lease agreements and lease agreements for low-value assets are recorded under Other administrative expenses; and
- the cost of depreciation of right-of-use assets is recorded under Depreciation and amortization for the period.

In the balance sheet:

- right-of-use assets recognized under Property, plant and equipment; and
- the value of lease liabilities recorded under Other liabilities.

### Impact from the lessor's perspective

As at 30 June 2024 and 31 December 2023, the Group has no lease agreements in which it is the lessor.

### 2.19 Earnings per share

Basic earnings per share are calculated by dividing the net income attributable to shareholders of the Group by the weighted

average number of ordinary shares outstanding, excluding the average number of own shares held by the Group.

For the diluted earnings per share, the average number of ordinary shares outstanding is adjusted to reflect the effect of all potential ordinary shares treated as dilutive. Contingent or potential issues are treated as dilutive when their conversion into shares decreases earnings per share.

If earnings per share change as a result of an issue with a premium or discount or other event that changes the potential number of ordinary shares, or changes in accounting policies, the calculation of earnings per share for all periods presented is adjusted retrospectively (see Note 18).

### 2.20 Subsequent events

The Group analyzes events that occur after the balance sheet date, i.e., favorable and/or unfavorable events that occur between the balance sheet date and the date on which the financial statements were authorized for issue. In this context, two types of events can be identified:

- those that provide evidence of conditions that existed at the balance sheet date (adjusting events after the balance sheet date); and
- those that are indicative of conditions that arose after the balance sheet date (non-adjusting events after the balance sheet date).

Events occurring after the date of the financial statements that are not considered as adjustable events, if material, are disclosed in the notes to the financial statements.

3. MAIN ESTIMATES AND UNCERTAINTIES ASSOCIATED WITH THE APPLICATION OF THE ACCOUNTING POLICIES

IFRS establish several accounting treatments and require the Board of Directors to make judgments and prepare the necessary estimates to decide which accounting treatment is most appropriate. The main estimates and judgments used in the application of accounting principles by the Group are presented in this Note, with the objective of improving the understanding of how their application affects the Group’s reported results and their disclosure, considering the context of uncertainty resulting from the impact of the devaluation of the functional currency. A broad description of the main accounting policies used by the Group is presented in Note 2 to the financial statements.

Considering that, in many situations, there are alternatives to the accounting treatment adopted by the Board of Directors, the results reported by the Group could be different should a different treatment be chosen. The Board of Directors considers that the choices made are appropriate and that the financial statements give a true and fair view of the Group’s financial position and the result of its operations in all material respects.

3.1 Impairment losses of financial assets at amortized cost and debt instruments at fair value through other comprehensive income

Determining impairment losses for financial instruments involves judgments and estimates regarding the following aspects, among others:

a) Significant increase in credit risk:

Impairment losses correspond to the expected losses in the event of a default over a 12-month time horizon, for Stage 1 assets, and to the expected losses considering the probability of a default event occurring at some point up to the financial instrument’s maturity date, for Stage 2 and 3 assets. An asset is classified as Stage 2 whenever there is a significant increase in the respective credit risk since its initial recognition. In assessing the existence of a significant increase in credit risk, the Group considers reasonable and sustainable qualitative and quantitative information.

b) Definition of groups of assets with common credit risk characteristics:

When expected credit losses are measured on a collective basis, financial instruments are grouped based on common risk characteristics. The Group monitors the adequacy of the credit risk characteristics on a regular basis to assess whether they remain similar. This procedure is necessary to ensure

that, in the event of a change in credit risk characteristics, the asset segmentation is revised. This revision may result in the creation of new portfolios or in the transfer of assets to existing portfolios which better reflect their credit risk characteristics.

c) Probability of default:

The probability of default represents a determining factor in measuring expected credit losses. The probability of default corresponds to an estimate of the probability of default in a given period, which is calculated based on historical data, assumptions, and expectations about future conditions.

d) Loss given default:

Corresponds to an estimate of loss in a default scenario. It is based on the difference between the contractual cash flows and those that the Group expects to receive, either through the cash flows generated by the customer’s business or loan collateral. The calculation of the estimated loss given default is based, among other aspects, on the different recovery scenarios, historical information, the costs involved in the recovery process and the estimated valuation of collaterals associated with loan operations.

This assessment is performed using internal and external information and includes the use of assumptions and judgments in its modeling, the change of which could determine different results.

Consequently, the use of different methodologies or different assumptions or judgments in measuring impairment could lead to different results from those reported and summarized in Notes 6, 8, 9 and 29.

Finally, the Group considers that the impairment determined based on this methodology allows an adequate reflection of the risk associated to its financial assets, considering the rules established by IFRS 9 – Financial Instruments.

3.2 Fair value of derivative financial instruments and other financial assets and liabilities measured at fair value

Fair value is based on market quotations, when available, and, in their absence, on the use of prices of similar recent transactions carried out under market conditions or based on valuation methodologies, using discounted cash flow techniques, applied to the future cash flows considering market conditions, the effect of time, the yield curve and volatility factors. These methodologies may require the use of assumptions or judgments in estimating fair value.

Consequently, the use of different methodologies or different assumptions or judgments in the application of a given model could give rise to different financial results from those reported in Notes 7 and 29.4.

3.3 Provisions

The measurement of provisions considers the principles defined in IAS 37 regarding the best estimate of the expected cost, the most likely outcome of ongoing actions, and considers the risks and uncertainties inherent in the process. Different assumptions and judgments would have an impact on the determination of the amount of the provisions, which are presented in Note 16.

Changes to these assumptions could have a significant impact on the values determined.

4. CASH AND DEPOSITS AT CENTRAL BANKS

As at 30 June 2024 and 31 December 2023, the caption Cash and deposits at Central Banks is detailed as follows:

| Amounts expressed in thousands of Kwanzas             |             |             |
|---|-------------|-------------|
|   | 30/06/2024  | 31/12/2023  |
| Cash  |             |             |
| National currency - banknotes and coins               | 24 725 754  | 21 416 760  |
| Foreign currency - banknotes and coins                |             |             |
| In United States dollar                               | 2 169 842   | 2 746 929   |
| In Euro   | 2 490 021   | 2 179 124   |
| In other currencies                                   | 590 032     | 555 764     |
|   | 29 975 649  | 26 898 577  |
| Deposits at Central Bank                              |             |             |
| Demand deposits at the Banco Nacional de Angola (BNA) |             |             |
| In national currency                                  | 156 095 443 | 153 175 534 |
| In United States dollar                               | 273 916 148 | 199 652 609 |
| In Euro   | 176 482 598 | 176 920 075 |
|   | 606 494 189 | 529 748 218 |
| TOTAL   | 636 469 838 | 556 646 795 |

Demand deposits at the BNA in national and foreign currency aim to comply with the provisions in force regarding the reserve requirement to be maintained and are not remunerated. As at 30 June 2024, the minimum reserve requirements amounted to AOA 140,654,698 thousand in national currency and AOA 300,863,347 thousand in foreign currency (2023: AOA 100,838,260 thousand and AOA 297,515,264 thousand, respectively).

As at 30 June 2024 and 31 December 2023, the reserve requirements are calculated in accordance with the provisions of BNA Instruction No. 04/2023 of 30 March 2023, Directive No. 01/2024 of 30 January 2024, and Directive No. 12/2023 of 28 November 2023, respectively. The currencies for compliance with the minimum reserve requirements in Foreign Currency are the US Dollar, the Euro and the South African Rand, in accordance with Directive 03/DME/2023 of 6 February 2023.

As at 30 June 2024, the tax base for calculating reserve requirements in national currency (NC) and in foreign currency (FC) is every two weeks.

The reserve requirement in national currency is set at 20% for items that comprise the reserve base, in accordance with Directive No. 01/2024 of 30 January, and 20% for the balances of local governments and municipal administrations, to be applied to the average fortnightly balances of the reserve base.

The reserve requirement in foreign currency was set at 22%, to be applied to the average weekly balances of items that comprise the reserve base, as defined in paragraph 2 of Instruction No. 04/2023 of 30 March, and at 100% for the balances of local governments and municipal administrations, to be applied to the daily balances of the accounts.

Directive No. 12/2023 provides that in relation to the reserve requirements in national and foreign currency, the balances of deposit accounts in foreign and national currency, opened at the Banco Nacional de Angola on behalf of each banking credit institution, are eligible. The following assets are eligible for compliance with the reserve requirement in foreign currency:

- The balance of the foreign currency deposit account, opened at the Banco Nacional de Angola, on behalf of each Banking Credit Institution. Deducted from the corresponding 100% (one hundred percent) of deposits on behalf of the Central Government held at the financial institution.

For the fulfillment of the minimum reserve requirements the following are also eligible:

- 80% (eighty percent) of the assets representing the value of loan disbursements in national currency, relating to projects in the agriculture, livestock, forestry and fishing sectors, granted until 14 April 2021, provided that they have a residual maturity equal to or greater than 24 (twenty-four) months;

- Loans defined in accordance with the provisions of Article 8, of Notice no. 10/2020, of 6 April, on Granting Credit to the Real Sector of the Economy, whatever the residual maturity; and
- Loans defined in accordance with the provisions of Article 10 of Notice No. 09/2022, of 6 April on the granting of mortgages, whatever the residual maturity.

5. LOANS AND ADVANCES TO OTHER CREDIT INSTITUTIONS

As at 30 June 2024 and 31 December 2023, the caption Loans and advances to credit institutions is detailed as follows:

| Amounts expressed in thousands of Kwanzas |            |            |
|---|------------|------------|
|   | 30/06/2024 | 31/12/2023 |
| Demand deposits                           | 36 957 647 | 41 635 446 |
| Accumulated impairment losses (Note 16)   | (3 198)    | (4 180)    |
|   | 36 954 449 | 41 631 266 |

The reconciliation of changes in the gross book value and impairment losses per stage of Loans and advances to credit institutions is presented below:

| Amounts expressed in thousands of Kwanzas     |                       |                   |
|---|-----------------------|-------------------|
|   | 30/06/2024<br>Stage 1 |                   |
|   | Gross book value      | Impairment losses |

| Reverse Repos                             | A                   | Angola        | AOA      | 327 001 802   | 327 001 802      | -                         | -                                 | 2 126 424        | 329 128 226      | (260 816)            | 328 867 410    | 10.01%                |
|   |                     |               |          | 1 407 195 939 | 1 285 238 992    | 36 819 919                | 68 030 590                        | 34 900 396       | 1 424 989 897    | (13 048 771)         | 1 411 941 126  |                       |

In the period ended 31 December 2023, the Group sold Angolan sovereign debt securities recognized in the Investment portfolio at amortized cost, which were close to maturity and whose receivable amount corresponded approximately to the sale price. Therefore, as this is an infrequent transaction, the Board of Directors considers that it does not jeopardize the business model established.

This operation led to the recognition of a capital gain of AOA 8,508,936 thousand in 2023.

In 2023, BFA contracted a set of short-term reverse repo operations with the Angolan state, negotiated through BODIVA, which matured in the first quarter of 2024. Given the nature of the operations, the Board of Directors recognizes their classification under Investments at amortized cost. Impairment recognized follows the model already implemented for other similar credit exposures.

The breakdown of investments at amortized cost, by residual maturity, is disclosed in Note 29.2.

The fair value and the detail by fair value hierarchy of the investment portfolio at amortized cost are presented in Note 29.4.

As at 30 June 2024 and 31 December 2023, impairment losses for Treasury Bonds, Treasury Bills, Eurobonds and foreign treasury bonds were calculated based on the credit risk parameters provided by the international rating agency Moody’s.

The credit quality of the investment portfolio at amortized cost is disclosed in Note 29.1.

A reconciliation of changes in the gross book value and impairment losses per stage of investments at amortized cost is presented below:

| Amounts expressed in thousands of Kwanzas                         |               |                   |

| Impairment for loans and advances (Note 16) | (54 750 335)                              | (50 268 076)       |
|   | 629 108 690                               | 550 102 779        |

As at 30 June 2024 and 31 December 2023, Loans and advances to customers earned interest at the following weighted average annual rates:

|                          | 30/06/2024 | 31/12/2023 |
|--------------------------|------------|------------|
| In Kwanzas               | 16.81%     | 16.12%     |
| In United States Dollars | 12.34%     | 12.09%     |
| In Euros                 | 7.00%      | 7.00%      |

As at 30 June 2024 and 31 December 2023, the group of ten largest debtors represents 62.71% and 64.02%, respectively, of the total loan portfolio (excluding guarantees provided and documentary credits).

In the period ended 31 December 2023, loans were written-off in the amount of AOA 9,247,161 thousand (Note 16), in accordance with the criteria defined by the Group.

In the six-month period ended 30 June 2024 and in the period ended 31 December 2023, there were recoveries of loans and interest previously written off or written down from assets, in the amounts of AOA 132,150 thousand and AOA 342,381 thousand (Note 23), respectively.

The loan portfolio, by segment, presents the following structure:

In order to mitigate the credit risk, credit operations have associated guarantees, namely mortgages or pledges. The fair value of these guarantees is determined on the date the loan is granted and is periodically reassessed.

The loan-guarantee ratio of the corporate, construction and real estate development, and residential segments has the following structure:

| Amounts expressed in thousands of Kwanzas |                      |                                 |                  |                  |                  |            | Amounts expressed in thousands of Kwanzas |                      |                                 |                  |                  |                  |            |

The tax authorities may review the Bank’s tax position for a period of five years, and as a result of different interpretations of tax law, potential adjustments to the respective tax/tax losses assessed may arise.

The Group’s Board of Directors believes that any additional settlements, which may result from these reviews, will not be significant for the financial statements.

|  | 117 121 258                  | 3 983 070                             | (6 556 161)                            | (2 573 091)                 | -          | (3 444 213) | 16 723 392                                | -         | 127 827 346                  |

For the six-month period ended 30 June 2024, the Group reversed impairment, on a net basis, in the amount of AOA 489,916 thousand for the portfolio of Impairment of other financial assets – Investments at amortized cost (see Note 8).

In terms of Loan impairment, the Group increased impairment, on a net basis, in the amount of AOA 4,457,666 thousand (see Note 9).

In 2023, the Group wrote off a set of operations, with an impairment amount of AOA 9,247,161.

As at 30 June 2024, the caption Guarantees provided includes the impairment recognized for off-balance sheet captions of documentary credits, guarantees provided and undrawn limits included in the loan portfolio. The Group increased impairment, on a net basis, in the amount of AOA 48,201 thousand (2023: reversal of AOA 243,199 thousand) (see Note 9).

In 2018, the Group created the Social Responsibility Department, which comprises the (i) monitoring of the “BFA Solidário” project and (ii) subsidies units and is responsible for the Group’s social activities until the process of setting up the BFA Foundation is completed.

Since it is the intention of the Group’s Board of Directors that the provision existing as at 30 June 2024 in the amount of AOA 26,639,966 thousand (2023: AOA 26,770,430 thousand) be used as a monetary endowment for the initial assets of the Fundação BFA, it is also its intention that it be alternatively used through the social activity to be developed by the Social Responsibility Directorate until the incorporation of the Fundação BFA is completed. It should be noted that, as mentioned in Note 31, on July 5, 2024, in accordance with a resolution of BFA’s Board of Directors, the Group proceeded with the initial endowment of the BFA Foundation in the amount equivalent to 50%, which amounted to AOA 12,920,014 thousand.

As at 30 June 2024 and 31 December 2023, the caption Provisions of an administrative and commercial nature in the amount of AOA 28,082,987 and AOA 28,274,425, respectively, consists of provisions to cover several contingencies, frauds, ongoing legal proceedings and other liabilities, corresponding to the best estimate of the costs that the Group will bear in the future with these liabilities.

In 2023, the Bank settled the amount of AOA 4,183,789 thousand to deal with tax proceedings.

17. OTHER LIABILITIES AND LEASE LIABILITIES

As at 30 June 2024 and 31 December 2023, this caption is detailed as follows:

The balance of the caption Tax charges payable – withheld on behalf of third parties includes amounts payable to the Tax Authorities in the month following the month to which it relates. The balance of the caption Liabilities of a civil nature corresponds to invoices for services rendered outstanding to the Group’s suppliers.

As at 30 June 2024 and 31 December 2023, the balance of the caption Liabilities of an administrative and marketing nature – Staff – Salaries and wages includes the amounts of holidays and holiday allowances, performance bonus and other staff costs.

On March 28, 2023, by Unanimous Written Resolution No. 3/2023 (and following the postponement of the decision taken at the General Meeting of March 30, 2023), the amount relating to 60% of the variable remuneration for 2022 was settled and 40% (AOA 1,035,229 thousand) of that amount deferred for a 3-year period, to be valued considering the interest rate of Angolan treasury bonds, traded on the secondary market, in the same currency and maturity as the deferral.

On April 1, 2024, the General Meeting decided to settle the amount relating to 60% of the variable remuneration for 2023 and to defer 40% (AOA 1,024,727 thousand) of that amount for a 3-year period, to be valued considering the interest rate of Angolan treasury bonds, traded on the secondary market, in the same currency and maturity as the deferral.

On 30 June 2024, this caption includes the sum of AOA 1,021,543 thousand relating to 40% of the variable remuneration for 2022 and the sum of AOA 1,478,233 thousand relating to the variable remuneration for 2023, plus the remuneration described above.

The caption Premium/Discount – Acquisition of securities in the amount of AOA 13,279,718 and AOA 14,567,530 refer to the amount to be deferred to the gain on day 1, for the acquisition of public debt securities, considering that the fair value calculated by the Group at the time of acquisition does not derive from prices directly observed in the market (the operation was OTC), but based on curves

(level 2), it was concluded that the difference between the fair value of the security acquired and the acquisition price (P&L of day 1) should be accrued over the maturity of the securities and/or recognized in profit or loss at the time of derecognition.

The balance of the caption Other administrative and marketing costs payable – Accrued costs includes the amount of AOA 2,919,075 thousand (2023: AOA 2,858,647 thousand) related to accrued costs with external supplies and services rendered and not yet invoiced by the suppliers. The caption Other administrative and marketing costs payable – IAC accruals – Own portfolio refers to the IAC payable to the BNA on the interest on securities in the own portfolio. As at 30 June 2024 and 31 December 2023, the caption Lease liabilities corresponds to the present value of lease payments to be settled over the lease term, recognized under IFRS 16.

The detail of the lease liabilities by maturity is presented below:

| Amounts expressed in thousands of Kwanzas |                  |                  |

Lease liabilities relate to the lease agreements for branches and offices used by the Group in the course of its business.

18. EQUITY

Share Capital

The Bank was incorporated with a share capital of AOA 1,305,561 thousand (equivalent to Euro 30,188,657 at the exchange rate in force on 30 June 2002), represented by 1,305,561 registered shares of one thousand Kwanzas each, having been subscribed and paid-up by incorporation of all assets and liabilities, including property or real estate rights of any nature, as well as all the rights and obligations of the former BFE Branch.

At the end of the 2004, 2003 and 2002, the Bank increased its share capital by AOA 537,672 thousand, AOA 1,224,333 thousand and AOA 454,430 thousand, respectively, through the incorporation of the special reserve for the maintenance of own funds, in order to maintain the counter value in kwanzas of the initial capital endowment in foreign currency.

By Unanimous Resolution of the General Meeting, of October 4, 2018, it was decided to increase BFA's share capital by incorporating reserves recorded under the caption Other reserves and Retained earnings in the amount of AOA 11,478,004 thousand. This capital increase was carried out within the scope of Notice No. 02/2018 of the Banco Nacional de Angola, which defines that the minimum value of fully paid-up share capital in national currency is AOA 7,500,000 thousand.

On November 26, 2018, there was an increase in share capital which corresponded to an increase in the shareholding of each shareholder in proportion to their respective holdings in the share capital of the Bank at that date, with 13,694,439 shares having been issued with a par value of AOA 1,000. Accordingly, at the end of 31 December 2018, the Bank had a total of 15,000,000 ordinary shares outstanding.

Consequently, as at 31 December 2022, the share capital of the Bank amounts to AOA 15,000,000 thousand, represented by 15,000,000 nominal shares of one thousand kwanzas each, resulting from the aforementioned capital increases.

On March 30, 2023, the General Shareholders' Meeting decided on a share capital increase by incorporating Free Reserves in the amount of AOA 30,000,000 thousand, remaining above the minimum set by the BNA stipulated in BNA Notice No. 17/2022, raising the capital to AOA 45,000,000 thousand.

Following this resolution, Banco de Fomento Angola, S.A., in accordance with the Angolan Commercial Companies Code, registered the change in capital, which was registered after a public deed on August 22, 2023 and registered at the Commercial Registry Office on August 28, 2023. In addition, following a public deed on August 22, 2023 at the Commercial Registry Office, the General Shareholders' Meeting decided to regroup its shares representing its share capital by applying a regrouping ratio of 1:5, with each 5 shares prior to the regrouping corresponding to 1 share after the regrouping, with the regrouping applying to all shares in the same proportion. The Bank regrouped the 45,000,000 shares it had after increasing its capital by incorporating reserves into 9,000,000 shares with a nominal value of 5,000 each.

Consequently, on 30 June 2024 and 31 December 2023, the Bank's share capital increased to AOA 9,000,000 thousand, represented by 9,000,000 registered shares of AOA 5,000 each, as a result of the grouping of the 45,000,000 shares it had after the capital increase.

As at 30 June 2024 and 31 December 2023, the shareholder structure of the Bank is as follows:

|                          | 30/06/2024       |        | 31/12/2023       |        |
|--------------------------|------------------|--------|------------------|--------|
|                          | Number of shares | %      | Number of shares | %      |
| Unitel, S.A.             | 4 671 000        | 51.90% | 4 671 000        | 51.90% |
| Banco BPI, S.A.          | 4 328 370        | 48.09% | 4 328 370        | 48.09% |
| Other BPI Group entities | 630              | 0.01%  | 630              | 0.01%  |
|                          | 9 000 000        | 100%   | 9 000 000        | 100%   |

On 7 October, 2016, Unitel, S.A. (Unitel) entered into an agreement with Banco BPI, S.A. (Banco BPI) for the purchase of 2% of the share capital of BFA, which led to an increase in Unitel’s stake in BFA from 49.9% to 51.9%. On that same date, the new shareholders’ agreement concerning BFA was also signed.

The completion of this operation was dependent on the verification of the following suspensive conditions:

- Authorization from the Banco Nacional de Angola (BNA) for the increase in the qualified shareholding already held by Unitel in BFA and authorization for the capital transactions necessary for the payment to Banco BPI and the transfer to Portugal of the agreed price of Euro 28 million;
- Authorization from the BNA to change the Articles of Association of BFA; and
- Approval of the operation by the General Shareholders’ Meeting of Banco BPI.

On 12 December, 2016, the Banco Nacional de Angola communicated that it did not object to the practice of the following acts:

- i) Partial amendment of BFA’s Articles of Association;

- ii) Increase in Unitel’s qualified shareholding in the share capital of BFA through the acquisition from Banco BPI of 26,111 ordinary shares representative of 2% of share capital;
- iii) Indirect acquisition of the qualified shareholding representative of 48.10% of BFA’s share capital, following the settlement of the general and mandatory initial public offer (IPO) launched by Caixabank for all the shares representative of Banco BPI’s share capital.

The BNA established as a condition that the three operations referred to above are indivisible, i.e., it is assumed that they must occur simultaneously or almost simultaneously or, if it is not possible for any reason to ensure their simultaneity, the operation referred to in (ii) must precede the operations referred to in (i) and (iii).

On 5 January, 2017, pursuant to the share purchase and sale agreement entered into in 2016, the sale by Banco BPI to Unitel of the shareholding representing 2% of the share capital of BFA was completed.

On 26 November, 2018, a share capital increase took place which corresponded to an increase in the shareholding of each shareholder in proportion to their respective shareholdings in the Bank’s share capital at that date, with 13,694,439 shares with a nominal value of AOA 1,000 having been issued. Accordingly, as at 31 December 2018, the Bank had a total of 15,000,000 ordinary shares outstanding.

On 22 August, 2023, the Bank formalized the share capital increase by incorporation of Free Reserves in the amount of AOA 30,000,000 thousand, grouping its shares to the amount of 9,000,000 shares, with a nominal value of AOA 5,000.

Other reserves and Retained earnings

As at 30 June 2024 and 31 December 2023, this caption is detailed as follows:

| Amounts expressed in thousands of Kwanzas           |             |             |
|---|-------------|-------------|
|   | 30/06/2023  | 31/12/2022  |
| Legal reserve, other reserves and retained earnings |             |             |
| Legal reserve                                       | 45 280 450  | 38 444 642  |
| Other reserves and retained earnings                | 395 530 589 | 318 268 666 |
|   | 440 811 039 | 356 713 308 |

Under current legislation, Banks must set aside a legal reserve up to the amount of their capital. To this end, a minimum of 10% of the previous period's net profit is transferred to this reserve each period. This reserve can only be used to cover accumulated losses when the remaining reserves have been exhausted. As a result of the General Shareholders' Meeting resolution on the capital increase, effective on 22 August, 2023, the Bank increased the legal reserve by 15%, as part of the distribution of profits for 2022, by unanimous resolution of the General Shareholders' Meeting held on 30 March, 2023.

As at 30 June 2024, as provided for in Article 165 of the Legal Framework for Financial Institutions, the legal reserve set up by the Bank amounts to its entire share capital, considering that, by resolution of the General Shareholders' Meeting, it was approved, on 1 April, 2024, to increase the legal reserve by the amount of AOA 6,835,808 thousand from the profits achieved in 2023. In addition, on the same day and at the General Shareholders' Meeting, it was also decided to transfer the remaining profit for 2023 (AOA 77,261,923 thousand) to free reserves, resulting in a balance of other reserves, as at 30 June 2024, of AOA 395,530,589 thousand. A further AOA 83,754,806 thousand were distributed to shareholders, as detailed below.

Earnings and dividend per share

In the six-month period ended 30 June 2024 and 31 December 2023, the basic earnings per share and the dividend attributed, relating to the profit of the previous year, were as follows:

| Amounts expressed in thousands of Kwanzas                           |            |             |
|---|------------|-------------|
|   | 30/06/2024 | 31/12/2023  |
| Average number of ordinary shares issued                            | 9 000 000  | 5 153 425   |
| Net profit/(loss) for the period                                    | 90 378 664 | 167 923 953 |
| Dividends distributed in the period relating to the previous period | 83 754 806 | 84 273 132  |
| Basic earnings per share  | 10.042     | 32.585      |
| Diluted earnings per share  | 10.042     | 32.585      |
| Dividend per share attributed during the period                     | 9.306      | 16.353      |

19. NET INTEREST INCOME

In the six-month periods ended 30 June 2024 and 2023, this caption is detailed as follows:

| Amounts expressed in thousands of Kwanzas             |             |             |
|---|-------------|-------------|
| Interest and similar income                           | 30/06/2024  | 30/06/2023  |

| Fees and commissions on guarantees and sureties provided   | 597 826             | 460 756            |
| Fees and commissions on securities                         | 2 074 098           | 1 846 691          |
| Fees and commissions for opening loans                     | 509 836             | 363 641            |
| Fees and commissions on services rendered                  | 223 223             | 293 444            |
| Fees and commissions on early settlements                  | 144 876             | 10                 |
| Fees and commissions on card cancellation/replacement      | 77 804              | 626 279            |
| Fees and commissions on the issuance of checks             | 40 843              | 348 618            |
| Management fee   | 1 297 746           | 460 701            |
| Other fees and commissions                                 | 593 611             | 585 478            |
|  | <b>27 829 075</b>   | <b>15 624 732</b>  |
| Fees and commissions expense                               |                     |                    |
| Fees and commissions on cards                              | (12 197 751)        | (6 164 581)        |
| Fees and commissions on ATMs and TPAs                      | (704 711)           | (495 725)          |
| Fees and commissions on securities                         | (342 919)           | (207 456)          |
| Other fees and commissions                                 | (638 525)           | (296 501)          |
|  | <b>(13 883 906)</b> | <b>(7 164 263)</b> |
| <b>Total</b>   | <b>13 945 169</b>   | <b>8 460 469</b>   |

The variation in the caption Fees and commissions income – Fees and commissions on ATM and POS and in the caption Fees and commissions expense – Fees and commissions on cards, compared to the same period of the previous year, is due to the increase in EMIS prices and its impact on the corresponding prices.

## 21. FOREIGN EXCHANGE GAINS/(LOSSES)

In the six-month periods ended 30 June 2024 and 2023, this caption is detailed as follows:

| Amounts expressed in thousands of Kwanzas   |                   |                   |
|---|-------------------|-------------------|
|   | 30/06/2024        | 30/06/2023        |
| Changes in exchange rates on assets and liabilities denominated in foreign currency | 1 575 364         | 5 374 767         |
| Foreign exchange spot and forward transactions                                      | (2 651 758)       | (701 095)         |
| Foreign currency purchase and sale transactions                                     | 16 474 227        | 6 704 817         |
|   | <b>15 397 833</b> | <b>11 378 489</b> |

The caption Changes in exchange rates on assets and liabilities denominated in foreign currency essentially refers to the foreign exchange gains/(losses) related to the exchange revaluation of the Bank's assets and liabilities in foreign currency on the reporting date.

In the six-month period ended 30 June 2024, the entity recorded an increase in foreign exchange gains/(losses) from foreign currency purchase and sale operations as a result of the pricing effect associated with these transactions.

## 22. GAINS/(LOSSES) ON DISPOSAL OF OTHER ASSETS

In the six-month periods ended 30 June 2024 and 2023, this caption is detailed as follows:

| Amounts expressed in thousands of Kwanzas       |               |               |
|---|---------------|---------------|
|   | 30/06/2024    | 30/06/2023    |
| Net gains/(losses) on sale of assets            |               |               |
| Gains on sale of property, plant and equipment  | 83 341        | 45 918        |
| Losses on sale of property, plant and equipment | (2 143)       | (176)         |
|   | <b>81 198</b> | <b>45 742</b> |

23. OTHER OPERATING INCOME/(EXPENSE)

In the six-month periods ended 30 June 2024 and 2023, this caption is detailed as follows:

| Amounts expressed in thousands of Kwanzas          |             |             |
|--|-------------|-------------|
|  | 30/06/2024  | 30/06/2023  |
| Operating income:                                  |             |             |
| Recovery of administrative and commercial expenses | 3 104 185   | 3 230 260   |
| Gain on expenses charged                           | 26 796      | 1 785 069   |
| Gains on credit recovery                           | 132 150     | 153 186     |
| Other  | 252 168     | 10 158 205  |
|  | 3 515 299   | 15 326 720  |
| Operating expense:                                 |             |             |
| Taxes and fees not levied on income                | (4 951 774) | (4 550 303) |
| Contribution to Deposits Guarantee Fund            | (593 086)   | (3 111 840) |
| Penalties applied by regulatory authorities        | (7 990)     | (42 709)    |
| Other  | (1 199 738) | (25 329)    |
|  | (6 752 588) | (7 730 181) |
|  | (3 237 289) | 7 596 539   |

In the six-month period ended 30 June 2024 and in the period ended 31 December 2023, the caption Taxes and fees not levied on income includes a balance for value added tax in the amount of AOA 4,385,355 thousand and AOA 3,366,352 thousand, respectively.

In the six-month periods ended 30 June 2024 and 2023, the caption Other operating income – Recovery of administrative and commercial expenses refers, essentially, to: (i) the reimbursement of communication and shipping expenses originally borne by the Group, namely in execution of payment order operations and (ii) gains from lease renegotiations.

24. STAFF COSTS

In the six-month periods ended 30 June 2024 and 2023, this caption is detailed as follows:

| Amounts expressed in thousands of Kwanzas  |            |            |
|--|------------|------------|
|  | 30/06/2024 | 30/06/2023 |
| In the six-month periods ended 30 June 2024 and 2023, this caption is detailed as follows: |            |            |

|  | 1 465 023  | 1 514 596  |
|  | 35 485 410 | 31 793 708 |

In 2013, with reference to the last day of the year, the Bank set up the BFA Pension Fund to cover the liabilities with retirement pensions for old age, disability and survival that the Bank granted to its Angolan employees registered with the Social Security, having used the provisions previously set up as an initial contribution to the BFA Pension Fund (defined contribution plan). In accordance with the contract for the set-up of the Fund, BFA will contribute annually with 10% of the salary subject to Angolan Social Security charges, applied on fourteen salaries.

In November 2022, Order No. 3923/22 ((Official Gazette) No. 123 of Series II) published the Addendum to the BFA Pension Fund and the New Pension Plan. The new Pension Plan defines a mixed contribution system between the Associate (BFA) and the Employees and establishes the associate’s rate at 7.5% on the pensionable salary, also defining a variable employee contribution between 2.5% and 10% on the pensionable salary.

In the six-month periods ended 30 June 2024 and 2023, the Bank’s contribution to the BFA Pension Fund amounted to AOA 1,465,023 thousand and AOA 1,514,596 thousand, respectively.

In the six-month period ended 30 June 2024, BFA Pensões – Sociedade Gestora de Fundos de Pensões, S.A. was responsible for managing the BFA Pension Fund. The Bank assumes the role of depositary of the Fund.

25. FORNECIMENTOS E SERVIÇOS DE TERCEIROS

No período de seis meses findo em 30 de Junho de 2024 e 30 de Junho de 2023 esta rubrica apresenta a seguinte composição:

| Amounts expressed in thousands of Kwanzas                |            |            |
|--|------------|------------|
|  | 30/06/2024 | 30/06/2023 |
| Audit, advisory and other specialised technical services | 8 949 906  | 6 182 149  |
| Safety, maintenance and repair                           | 5 186 442  | 3 366 016  |
| Sundry materials   | 1 284 442  | 2 341 612  |
| Publications, advertising and marketing                  | 1 022 119  | 2 042 298  |
| Transport, travel and accommodation                      | 1 759 562  | 1 102 774  |

| Water and energy   | 258 126    | 154 568    |
| Insurance  | 421 209    | 520 724    |
| Rentals  | 415 227    | 105 320    |
| Other external supplies and services                     | 446 330    | 328 511    |
|  | 20 954 518 | 17 658 837 |

26. OFF-BALANCE SHEET DISCLOSURES

These captions are detailed as follows:

| Amounts expressed in thousands of Kwanzas |              |              |
|---|--------------|--------------|
|   | 30/06/2024   | 31/12/2023   |
| Liabilities to third parties:             |              |              |
| Guarantees provided                       | 52 711 922   | 68 560 046   |
| Commitments to third parties              |              |              |
| - Open documentary credits                | 67 708 509   | 42 558 525   |
| - Undrawn limits                          | 33 630 323   | 45 101 700   |
|   | 154 050 754  | 156 220 271  |
| Liabilities for services rendered:        |              |              |
| Services rendered by the Bank             |              |              |
| - Safekeeping of securities               | 907 559 418  | 952 531 732  |
| - Check clearing on foreign banks         | 1 166 852    | 440 513      |
| - Documentary remittances                 | (97 646 815) | (95 157 799) |
|   | 811 079 455  | 857 814 446  |

As at 30 June 2024 and 31 December 2023, the Bank has set up provisions to cover the credit risk assumed on the granting of guarantees, documentary credits and irrevocable credit facilities (Undrawn limits), in the amounts of AOA 452,987 and 479,791 thousand, respectively (Notes 9 and 16).

As at 30 June 2024 and 31 December 2023, the notional amounts of the forwards are recognized under off-balance sheet captions in the amounts of AOA 7,628,967 and AOA 7,703,799 thousand, respectively. (Note 7)

As at 30 June 2024 and 31 December 2023, the caption Safekeeping of securities refers essentially to securities of customers in the custody of the Bank.

27. RELATED PARTIES

- In accordance with IAS 24, the following are considered entities related to the Group:
- the entities that exercise, directly or indirectly, a significant influence over the management and financial policy of the Group – Shareholders;
  - those over which the Group exercises, directly or indirectly, a significant influence over their financial management and policy;
  - key management personnel of the Group, considering for this purpose executive and non-executive members of the Board of Directors and companies in which the members of the Board of Directors have control or joint control;
  - subsidiaries, joint ventures or associates of the shareholder holding control over the Group;
  - key personnel of the shareholder with control over the Group (executive and non-executive members of the Board of Directors); and
  - entities controlled or jointly controlled by key personnel of the shareholder with control over the Group.

In the six-month period ended 30 June 2024 and in the period ended 31 December 2023, the Group’s related parties with which it had balances or transactions are as follows:

| BFA shareholders   |   |

## 29. RISK MANAGEMENT

BFA's activities are exposed to a variety of financial risk factors, including the effects of changes in market prices: foreign exchange risk, credit risk, liquidity risk and cash flow risks associated with interest rate risk, among others.

BFA's risk management is controlled by the Risk Management Department, in accordance with policies approved by the Board of Directors. Accordingly, the Board of Directors has defined, in writing, the main global risk management principles, as well as specific policies for some areas, such as interest rate risk, liquidity risk and credit risk.

The Board of Directors defines the principles for risk management as a whole and policies that cover specific areas, such as exchange risk, interest rate risk, credit risk, the use of derivatives and other non-derivative financial instruments, as well as the investment of excess liquidity.

### Main Risk Categories

**Credit** – Credit risk is the uncertainty of recovery of an investment and its return, due to the debtor's inability (and that of his/her guarantor, if any) to fulfill its financial commitments, thus causing a financial loss to the creditor. Credit risk is reflected in debt securities or other receivables.

**Market** – Market risk reflects the potential loss that can be recorded by a given portfolio as a result of changes in rates (interest and exchange rates) and/or the prices of the different financial instruments that comprise it, considering both the correlations between them and the respective volatilities. Accordingly, Market Risk encompasses interest rate risk, exchange rate and other price risks.

**Liquidity** – Liquidity risk reflects the inability of the Group to meet its liabilities associated with financial liabilities on each maturity date without incurring significant losses as a result of a deterioration in the conditions of access to financing (financing risk) and/or sale of its assets for amounts lower than the amounts usually practiced in the market (market liquidity risk).

**Real Estate** - Real estate risk is the probability of negative impacts on the Group's income or capital level due to fluctuations in the market price of real estate assets.

**Operating** – Operational risk is the potential loss resulting from failures or inadequacies in internal processes, information systems, human behavior or external events.

### 29.1 Credit Risk

Credit risk corresponds to the risk of default by counterparties, with which the Group maintains open positions in financial instruments, as a creditor. In accordance with the BFA's General Credit Regulations, the granting of credit in the Bank is based on the following fundamental principles:

#### Formulation of proposals

Loan operations, or guarantees, subject to the decision of BFA:

- They are adequately characterized in the Technical Data Sheet, containing all the essential and accessory elements necessary for the formalization of the operation;
- Respect the specific product sheet;
- Are accompanied by a duly substantiated credit risk analysis;
- Contain the signatures of the proposing bodies.

#### Credit risk analysis

In the credit risk analysis, the total exposure of the Bank to the customer, or to the group to which the customer belongs, is considered, according to the terms of the legislation applicable at any time. Exposures in respect of the same customer or economic group are classified, having as reference those that represent the greatest risk .

Currently, considering the regulations of the Banco Nacional de Angola:

- For a single customer, all its liabilities vis-à-vis the Bank, in force or potential, already contracted or committed, for financing and guarantees are considered (total exposure of the Bank to the customer);
- For a group of customers, the sum of the liabilities of each customer that comprises the group is considered (total exposure of the Bank to the group); and
- The existence of guarantees with State risk, or with immediate liquidity, has an impact on the calculation of the value of the Global Exposure.

Classification of Risk

The Group classifies loan operations in ascending order of risk, according to the following grades:

- Grade A: Minimum risk
- Grade B: Very low risk
- Grade C: Low risk
- Grade D: Moderate risk
- Grade E: High risk
- Grade F: Very high risk
- Grade G: Maximum risk

The individual classification of the exposure considers the characteristics and risks of the operation and of the borrower, and is initially classified based on the following criteria adopted by the Group:

Grade A: operations that are:

- (i) assumed by the Angolan State, encompassing its central and provincial administrations;
- (ii) assumed by central administrations, central banks of countries, included in group 1 (defined in Instruction No. 1/2015, of January 14, of the Banco Nacional de Angola), international organizations and multilateral development banks;
- (iii) fully guaranteed by cash deposits, or certificates of deposit, constituted or issued by the lending institution, or by institutions in a controlling or group relationship with the lending institution and having their head office in Angola, or a country included in group 1, multilateral development banks and international organizations, provided that the exposure and the deposit or certificate are denominated in the same currency;

- (iv) fully guaranteed by cash deposits or certificates of deposit constituted or issued by the lending institution or by branches of the lending institution, not covered by the preceding paragraph, provided that the exposure and the deposit or certificate are denominated in the same currency;
- (v) fully guaranteed by securities or bonds issued by the Angolan State, or by the Banco Nacional de Angola.

Grade B and others: remaining loans.

The classification of exposures is revised whenever there are signs of impairment in late payments.

Within the scope of the regular review of loan operations, including loan operations overdue, BFA reclassifies overdue loan operations into those that are due, based on an analysis of the economic prospects of collectability, namely considering the existence of guarantees, the borrowers' or guarantors' assets and the existence of operations whose risk BFA equates to State risk, or even when the situation of delay results from the Bank's exclusive responsibility due to a one-off failure in its processes.

## Association of Guarantees

When granting loans to Retail customers or small companies with a maturity of more than 36 months, in the absence of short-term financial investments, BFA requires, as a rule, the provision of a real guarantee on property.

Loan operations are associated with guarantees considered adequate to the risk of the borrower, the nature and term of the operation, which are duly substantiated, in terms of sufficiency and liquidity.

Real guarantees are assessed prior to the loan decision, and these assessments are periodically reviewed. Exceptions to this rule (with decisions being conditional on a subsequent assessment) imply that disbursement will only occur after the Bank has obtained the guarantee assessment.

The main types of collateral for loans and advances to customers are:

- Mortgages on residential properties;
- Encumbrances on Company assets, such as facilities, inventory or accounts receivable;
- Encumbrances on financial instruments, such as debt securities or shares; and
- Encumbrances on term deposits at the institution.

Long-term financing and loans to corporate entities usually have an associated guarantee. On the contrary, revolving credit products do not generally have an associated guarantee.

Collaterals obtained as a guarantee for financial assets, other than loans and advances to customers, always depends on the type of financial instrument. Debt instruments do not normally have an associated guarantee, with the exception of securitized instruments, which have portfolios of financial instruments as collateral. On the other hand, derivative instruments have associated guarantees.

The Bank's policies on collateral obtained as guarantee have not changed significantly during the reporting period, nor have there been any significant changes in the quality of the collateral held by the Bank since the previous period.

The Bank monitors collateral obtained as security for impaired loans and advances to customers as it becomes more likely that the Bank will take ownership of such collateral to mitigate possible credit losses. Loans to impaired customers (stage 3) and the collaterals obtained as guarantee are detailed as follows:

### Exclusions due to incidents

The Bank does not grant loans and advances to customers who have registered material incidents in the last 24 months known to BFA, nor to other companies that are part of a group with customers in that situation. The following are considered material incidents:

- Delays in making payments of principal or interest owed to a credit institution, social security, AGT, court or State Inspectorate for more than 45 days;
- Irregular use of means of payment for which that person or entity is responsible;
- Pending legal actions against that person or entity that have potential adverse effects on their economic or financial position.

Exceptions to these rules have specific decision rules under the Bank's general credit regulation, which are stricter.

### Restructurings

In principle, BFA only formalizes ongoing loan restructuring operations, after assessing the customer's ability to comply with the new plan, if the following criteria are met:

- New guarantees (more liquid and/or more valuable) are presented for the new operation;

- Interest and late payment fees are paid in advance (in the event of a non-performing operation); and
- There is a significant partial settlement of the outstanding principal (performing and/or non-performing).

Exceptionally, and if none of the above assumptions are met, BFA admits formalizing the formal restructuring of Retail customers' debts, if it is verified that in the last 6 months, deposits were made of a minimum amount equal to the installment amount foreseen for the restructured operation.

Loan operations restructured due to the customer's financial difficulties are defined in the General Credit Regulation and comply with the regulator's specific regulations in this matter.

Restructuring operations are classified, for the purpose of increasing risk, and periodically monitored as to compliance with the established plan and are only unclassified when certain conditions of regularity in complying with the plan are met.

The Operations subject to renegotiation are maintained at least at the same risk level in which they were classified in the month immediately prior to the renegotiation. Reclassification to a lower risk level only occurs if there is regular and significant repayment of the operation, payment of interest due and on arrears, or depending on the quality and value of new guarantees presented for the renegotiated operation.

### Monitoring of non-performing loans

Non-performing loans are monitored by the commercial teams, as a rule until it is 60 days overdue, with monitoring being done by a specialized team. After 60 days of default, the management of the relationship is transferred to this specialized team, which has the mission of collaborating in loan recovery actions, being able to take over negotiations and restructuring proposals. This team is responsible for monitoring the processes under its management.

The restructuring negotiations follow the principles mentioned above.

This team is responsible for the management and relationship with the customer, with the aim of recovering the loan, resorting to the enforcement, through the courts, if necessary.

### Impairment

BFA implemented a model to calculate impairment losses of the loan portfolio, in accordance with the requirements set out in IFRS 9.

BFA calculates the impairment losses of the loan portfolio monthly based on the implemented model, with the amount of impairment determined being approved by the Executive Committee of the Board of Directors.

The first application and the respective outcomes of this model were calculated with reference to January 1, 2018. Since that reference date, monthly calculations have been carried out. The half-yearly results are approved by the Board of Directors of the Bank.

Securities and bonds

As at 30 June 2024 and 31 December 2023, BFA's securities portfolio complies with the principle of the high credit quality of its issuers, consisting mainly of securities issued by the Angolan State and by the Banco Nacional de Angola.

As at 30 June 2024 and 31 December 2023, the maximum exposure to credit risk presents the following detail:

|   | Amounts expressed in thousands of Kwanzas |              |                |                  |              |                |
|---|---|--------------|----------------|------------------|--------------|----------------|
|   | 30/06/2024                                |              |                | 31/12/2023       |              |                |
|   | Gross book value                          | Impairment   | Net book value | Gross book value | Impairment   | Net book value |

| Investments at amortized cost (Note 8)  | 1 071 725 224                             | (12 665 394) | 1 059 059 830  | 1 424 989 897    | (13 048 771) | 1 411 941 126  |
| Loans and advances to customers (Note 9)                                      | 683 859 025                               | (54 750 335) | 629 108 690    | 600 370 855      | (50 268 076) | 550 102 779    |
| Other assets (Note 13)  | 21 492 245                                |              | 21 492 245     | 21 456 161       |              | 21 456 161     |
|   | 3 667 917 010                             | (67 926 434) | 3 599 990 576  | 3 595 545 627    | (63 696 151) | 3 531 849 476  |
| Off-balance sheet   |   |              |                |                  |              |                |
| Guarantees provided, open documentary credits and undrawn facilities (Note 9) | 154 050 754                               | (452 987)    | 153 597 767    | 156 220 271      | (479 791)    | 155 740 480    |
| Total   | 3 821 967 764                             | (68 379 421) | 3 753 588 343  | 3 751 765 898    | (64 175 942) | 3 687 589 956  |

For financial assets recognized in the balance sheet, the maximum exposure to credit risk is represented by the book value net of impairment. For off-balance sheet items, the maximum exposure from guarantees is the maximum amount that the Bank would have to pay should the guarantees be forfeited and of loan and other credit-related commitments of an irrevocable nature is the total amount of commitments made.

As at 30 June 2024 and 31 December 2023, the credit quality of financial assets is as follows:

| Amounts expressed in thousands of Kwanzas                         |                  |              |                |            |               |

29.2 Liquidity risk

Liquidity risk corresponds to the risk of the Group presenting difficulties in obtaining the financial resources it needs to meet its financial commitments when they become due. Liquidity risk may consist, for example, in the inability to sell a financial instrument quickly for an amount representative of its fair value, because of its large size, in relation to the volume normally traded, or because of some discontinuity in the market.

Within the scope of the Group's internal policies with respect to exposure to liquidity risk, the respective follow-up and monitoring of the established principles and limits is ensured by the Risk Management Department.

As at 30 June 2024 and 31 December 2023, the total contractual cash flows are detailed as follows:

| Amounts expressed in thousands of Kwanzas                         |                         |                      |                      |                        |                      |                      |                    |                    |                    |                      |

29.3 Market risk

Market risk corresponds to the possible fluctuation of the fair value or future cash flows associated with a financial instrument, due to changes in market prices. Market risk encompasses interest rate risk and exchange rate risk.

Interest rate risk

The interest rate risk corresponds to the risk arising from adverse movements in interest rates resulting in a mismatch in the amount, maturities or interest-fixing dates observed in financial instruments with interest receivable and payable.

As at 30 June 2024 and 31 December 2023, financial instruments by exposure to interest rate risk were as follows:

Currency risk

Currency risk is the fluctuation of the fair value or future cash flows of a financial instrument due to changes in exchange rates.

The securities portfolio of the Bank is divided between securities denominated in national currency and in foreign currency, taking into consideration the overall structure of its balance sheet, in order to avoid incurring, in this manner, currency risk.

As at 30 June 2024 and 31 December 2023, financial instruments by currency are detailed as follows:

| Amounts expressed in thousands of Kwanzas                         |               |                      |             |                                     |                  |               |
|---|---------------|----------------------|-------------|-------------------------------------|------------------|---------------|
|   | 30/06/2024    |                      |             |                                     |                  |               |

29.4 Fair value of financial assets and liabilities

The Bank classified the financial instruments recorded in the balance sheet at fair value in accordance with the hierarchy established in IFRS 13.

Instruments listed in active markets (level 1)

This category includes financial instruments with available quoted prices in official markets and those in which there are entities that usually disclose prices of transactions for these instruments traded in liquid markets.

Priority in the prices used is given to those observed in official markets, in cases where there is more than one official market the option falls on the main market where these financial instruments are traded.

This category includes, among others, the following financial instruments: (i) derivatives traded on an organized market and (ii) listed shares.

Valuation methods with observable market parameters/prices (level 2)

This category includes financial instruments valued through internal models, namely discounted cash flow models, which require judgments that vary according to the complexity of the products being valued and use assumptions similar to those that an unrelated party would use in estimating the fair value of the same financial instrument. The Bank uses as inputs in its models variables provided by the market, such as interest rate curves and credit spreads. It also includes instruments whose valuation is obtained through quotations disclosed by independent entities but whose markets have the lowest liquidity.

This category includes, among others, the following financial instruments: (i) unlisted bonds; and (ii) over-the-counter (OTC) derivatives.

Montantes expressos em milhares de Kwanzas

Valuation methods with non-observable parameters in the market (level 3)

This level includes the valuations determined by the use of internal valuation models or quotations provided by third parties but where the parameters used are not observable in the market. The bases and assumptions used in the calculation of the fair value are in accordance with the principles of IFRS 13.

This category includes, among others, the following financial instruments: (i) debt securities valued using inputs that are not observable in the market; (ii) unquoted shares; (iii) over-the-counter (OTC) market derivatives with quotes provided by third parties.

As at 30 June 2024 and 31 December 2023, the book value of financial instruments is detailed as follows:

| Amounts expressed in thousands of Kwanzas                         |                        |                            |                     |                      |

The fair value of financial instruments should be estimated, whenever possible, using quotations on an active market. A market is considered active, and therefore liquid, when it is accessed by equally knowledgeable counterparties and where transactions are carried out on a regular basis. Almost all the financial instruments of the Bank are not listed on active markets.

In view of the absence of quotations on active markets, the valuation of financial instruments is performed in the following terms:

a) Financial instruments recorded in the balance sheet at fair value:

Treasury Bonds in national currency that are non-readjustable and Treasury Bonds in national currency indexed to the US dollar exchange rate issued by the Angolan State and held by the Bank for trading in the secondary market with other banks are revalued based on a discounted cash-flows model. The discount curve used can be observed directly on BODIVA's daily report, which the Bank considers to be an active market.

Currency forwards are revalued using a discounted cash-flows model. The amounts in foreign currency are updated with an interest rate curve directly observed from Bloomberg and the amounts in national currency are updated with a curve built with interbank money market yields and reference rates (Luibor) observed on the BNA website.

Since they are not listed on a stock exchange and provided that there is observable market data, the equity instruments, with the exception of Visa Incl, are valued by the equity method and the Participation Units by the quotation made available by the fund management company.

b) Financial instruments recorded in the balance sheet at amortized cost:

For financial instruments recorded in the balance sheet at amortized cost, the Bank calculates their fair value using valuation techniques based on the conditions applicable to similar transactions on the reference date of the financial statements, namely the value of the respective discounted cash flows based on the interest rates considered most appropriate, *i.e.*:

- Non-adjustable Treasury Bills and Treasury Bonds in national currency issued by the Angolan State are valued, for disclosure purposes, based on a discounted cash-flows model.
- Treasury Bonds in dollars issued by the Angolan State are valued, for disclosure purposes, based on a discounted cash-flows model. As there are not yet any significant transactions of this instrument in BODIVA, the discount curve is built based on the yields of the last issues of these bonds.

- For loans and advances to customers, the average interest rates charged by the Bank in the six-month period ended 30 June 2024 and in the period ended 31 December 2023, respectively, were used for operations with similar characteristics and net of accumulated impairment losses; and
- Regarding Cash and deposits at central banks, Loans and advances to other credit institutions repayable on demand, Other loans and advances to central banks and credit institutions, Deposits from central banks and Deposits from other credit institutions and Deposits from customers and other loans, as they are essentially short-term investments, the balance sheet value was considered a reasonable approximation of their fair value.

It should be noted that the fair value presented does not correspond to the realization value of these financial instruments in a sale or liquidation scenario and was not calculated for that purpose.

As at 30 June 2024 and 31 December 2023, the fair value of financial instruments recorded in the balance sheet at fair value presents the following detail by valuation methodology:

| Amounts expressed in thousands of Kwanzas                  |   |  |  |            |
|--|---|--|--|------------|

**Cash and deposits at central banks and other demand deposits, Other loans and advances to credit institutions and Deposits from central banks**

These assets and liabilities are very short-term, and therefore the balance sheet value is a reasonable estimate of their fair value.

**Securities at amortized cost**

The fair value of securities recorded at amortized cost is estimated in accordance with the methodologies followed for valuing securities that are recorded at fair value, as described at the beginning of this Note.

**Loans and advances to customers**

The fair value of loans and advances to customers is estimated based on the discounted expected cash flows of principal and interest, considering that the installments are paid on the contractually agreed dates. Discount rates used are the current rates for loans with similar characteristics. For stage 2 loans via the individual analysis model, the fair value considered is the balance sheet value.

For stage 3 loans, for which recovery is via foreclosure of the collateral, the Balance Sheet value was considered.

**Deposits from customers**

The fair value of deposits from customers and other loans is short-term, and therefore the balance sheet value is a reasonable estimate of fair value.

**29.5 Capital management**

As at 30 June 2024 and 31 December 2023, the Bank's capital and the regulatory capital ratio (solvency) are determined in accordance with the applicable regulatory standards, namely with Notice No. 8/2021.

Angolan credit institutions should hold a level of capital compatible with the nature and scale of operations, duly weighted by the risks inherent to the operations, with a minimum regulatory capital ratio of 8%, a minimum Tier 1 (T1) capital ratio of 6% and a minimum Common Equity Tier 1 (CET1) capital ratio of 4.5%.

Regulatory capital ratio comprises:

1. Tier 1 capital – comprises: i) Paid-up share capital; ii) Positive retained earnings from previous periods; iii) Legal, statutory and other reserves arising from non-distributed profits, or set up to increase capital; iv) Net profit of the previous period; v) Provisional net profit of the current period; vi) Equity instruments; and, vii) Share premium.
2. The negative elements of Tier 1 capital – comprise: (i) Own shares in the portfolio, at book value in the balance sheet; (ii) Losses carried forward from previous periods; (iii) Net loss of the previous period; (iv) Provisional net loss of the current period; (v) Intangible assets net of amortization, including goodwill included in the valuation of significant investments of the institution; (vi) Expenses with deferred costs related to pension liabilities; (vii) Deferred tax assets depending on future profitability; (viii) Adjustments on impairment losses on financial instruments in relation to that determined by the Banco Nacional de Angola in the prudential supervision; (ix) Positive revaluation differences arising from the application of the equity method; (x) Actuarial losses not recognized in profit and loss; (xi) The amount of the items that need to be deducted from additional Tier 1 capital items that exceed the Institution's additional Tier 1 capital items; (xii) The exposure value of incomplete transactions; (xiii) The applicable amount of Common Equity Tier 1 instruments of credit institutions held directly, indirectly and synthetically with which the Institution has cross-holdings that the Banco Nacional de Angola considers to have been set up to artificially inflate the Institution's capital; (xiv) The applicable amount of Common Equity Tier 1 instruments of credit institutions held by the Institution directly, indirectly and synthetically where the Institution does not have a significant investment in such entities; (xv) The applicable amount of Common Equity Tier 1 instruments of credit institutions held by the Institution directly, indirectly and synthetically

where the Institution has a significant investment in such entities, excluding underwriting positions held for a period of five (5) business days or less (xvi) Any tax on Common Equity Tier 1 items that is foreseeable at the time it is calculated, except where the Institution appropriately adjusts the amount of Common Equity Tier 1 items to the extent that such tax reduces the amount by which those items may be used to hedge risks or losses.

3. Additional Tier 1 capital – comprises (i) Preference shares; ii) Hybrid and/or convertible instruments; iii) Other instruments whose issue conditions have been previously approved by the Banco Nacional de Angola; and iv) Share premium relating to the items included in the previous sub-paragraphs.

4. The negative elements of additional Tier 1 capital – comprise: i) Additional Tier 1 instruments held directly, indirectly and synthetically, including additional Tier 1 instruments that the Institution may be required to acquire as a result of existing contractual obligations; ii) Additional Tier 1 instruments of credit institutions held directly, indirectly and synthetically, with which the Institution has cross-holdings that the Banco Nacional de Angola considers to have been set up to artificially inflate the Institution's capital; iii) The applicable amount of additional Tier 1 instruments of credit institutions held directly, indirectly and synthetically, where the Institution does not have a significant investment in those credit institutions; (iv) The applicable amount of additional Tier 1 capital instruments of credit institutions held directly, indirectly and synthetically by the Institution, where the institution has a significant investment in such credit institutions, excluding underwriting positions held for a period of five (5) business days or less; (v) The amount of items required to be deducted from Tier 2 capital items in excess of the Institution's Tier 2 capital items; and, (vi) Any tax on additional Tier 1 capital items that is foreseeable at the time it is calculated, except where the Institution appropriately adjusts the amount of additional Tier 1 capital items to the extent that such tax reduces the amount by which those items may be used to hedge risks or losses.

5. Tier 2 capital – comprises: i) Redeemable preference shares; ii) Reserves from the revaluation of real estate for own use; iii) Subordinated debt, in the form of loans or bonds issued, whose issue conditions were previously approved by the Banco Nacional de Angola; iv) Other instruments whose issue conditions were previously approved by the Banco Nacional de Angola; and, v) Share premium relating to the items included in the previous points.

6. The negative elements of Tier 2 capital – comprise: i) Common Equity Tier 2 instruments held directly, indirectly and synthetically, including Tier 2 instruments that the Institution may be required to acquire as a result of existing contractual obligations; ii) Tier 2 instruments of directly, indirectly and synthetically held credit institutions with which the Institution has cross-holdings that the Banco Nacional de Angola considers to have been set up to artificially inflate the Institution's capital; (iii) The applicable amount of Tier 2 instruments of credit institutions held directly, indirectly and synthetically, where the Institution does not have a significant investment in such credit institutions; and, (iv) Tier 2 instruments of credit institutions held directly, indirectly and synthetically by the Institution, where the Institution has a significant investment in such entities, excluding underwriting positions held for a period of five (5) business days or less.

Net profit for the previous period and for the current period referred to in the previous paragraphs can only be considered whenever they are certified by the expert accountant who is a member of the supervisory body or single auditor and by the external auditor.

The table below shows the capital and the solvency ratio of the Bank as at 30 June 2024 and 31 December 2023:

| Amounts expressed in thousands of Kwanzas         |                    |                    |
|---|--------------------|--------------------|
|   | 30/06/2024         | 31/12/2023         |
| <b>Regulatory capital ratio</b>                   |                    |                    |
| Tier I capital                                    | 517 005 711        | 470 142 948        |
| Tier II capital                                   | -                  | -                  |
| <b>Total</b>                                      | <b>517 005 711</b> | <b>470 142 948</b> |
| <b>Regulatory Capital Requirements</b>            |                    |                    |
| Credit risk requirements                          | 54 886 286         | 47 048 554         |
| Market risk requirements                          | 1 807 967          | 1 884 471          |
| Operational risk requirements                     | 39 614 075         | 39 614 075         |
| Excesses of prudential limits for large exposures | 188                | 188                |
| <b>Total</b>                                      | <b>96 308 516</b>  | <b>88 547 288</b>  |
| <b>Regulatory Solvency Ratio</b>                  | <b>42.95%</b>      | <b>42.48%</b>      |

The Bank does not calculate the regulatory capital ratio on a consolidated basis. However, considering (i) that the consolidated entities are neither credit institutions nor financial companies; (ii) that the regulatory capital ratio on an individual basis amounts to 42.95%; and (iii) that the institution with the greatest weight of assets in the Group is BFA itself, we can conclude that the BFA Group's regulatory capital is sufficient.

30. RECENTLY ISSUED ACCOUNTING STANDARDS AND INTERPRETATIONS

Clarification of the requirements for classifying liabilities as current or non-current (amendments to IAS 1 – Presentation of Financial Statements)

On January 23, 2020, the IASB issued an amendment to IAS 1 Presentation of Financial Statements to clarify how to classify debt and other liabilities as current and non-current.

The amendments clarify a criterion in IAS 1 for classifying a liability as non-current: the requirement for an entity to have the right to defer settlement of the liability for at least 12 months after the reporting period.

- The amendments:
- a. specify that an entity's right to defer settlement must exist at the end of the reporting period;
  - b. clarify that the ratios that the company must meet after the balance sheet date (i.e., future ratios) do not affect the classification of a liability on the balance sheet date. However, where non-current liabilities are subject to future ratios, companies must disclose information that enables users to understand the risk that these liabilities may be repaid within 12 months after the balance sheet date; and
  - c. clarify requirements for classifying liabilities an entity will or may settle by issuing its own equity instruments (e.g., convertible debt).

This amendment is effective for periods after January 1, 2024.

The Group has no impact resulting from the adoption of this standard.

Lease liability in a sale and leaseback transaction (amendments to IFRS 16 – Leases)

The IASB issued amendments to IFRS 16 – Leases in September 2022 that introduce a new accounting model for variable payments in a sale and leaseback transaction.

These amendments confirm that:

- On initial recognition, the seller-lessee includes variable lease payments when it measures a lease liability arising from a sale-and-leaseback transaction.
- After initial recognition, the seller-lessee applies the general requirements for subsequent accounting of the lease liability such that it recognizes no gain or loss relating to the right of use it retains.

A seller-lessee may adopt different approaches that satisfy the new requirements on subsequent measurement.

Under IAS 8 – Accounting Policies, Changes in Accounting Estimates and Errors, a seller-lessee will need to apply the amendments retrospectively to sale-and-leaseback transactions entered into or after the date of initial application of IFRS 16. This means that it will need to identify and re-examine sale-and-leaseback transactions entered into since implementation of IFRS 16 in 2019, and potentially restate those that included variable lease payments.

The Group has no impact resulting from the adoption of this standard.

#### **Amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures - Supplier Finance Arrangements**

On 25 May, 2023, the International Accounting Standards Board (IASB) published Supplier Finance Arrangements with amendments to IAS 7 – Statement of Cash Flows and IFRS 7 – Financial Instruments Disclosures.

The amendments address disclosure requirements for supplier finance arrangements – also known as supply chain finance, trade payables finance or reverse factoring arrangements.

The new requirements complement those already included in IFRS standards and include disclosures on:

- Terms and conditions of supplier finance arrangements;
- The amounts of liabilities covered by such agreements, the extent to which suppliers have already received payments from the finance providers and under which caption those liabilities are presented in the balance sheet;
- The ranges of payment due dates; and
- Information on liquidity risk.

The Group has no impact resulting from the adoption of this standard.

#### **Standards, amendments and interpretations issued but not yet effective for the Group:**

##### **Amendments to IAS 21 - The Effects of Changes in Foreign Exchange Rates: Lack of Exchangeability**

On 15 August, 2023, the International Accounting Standards Board (the IASB or Board) issued Lack of Exchangeability (Amendments to IAS 21 – The Effects of Changes in Foreign Exchange Rates) (the amendments).

The amendments clarify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking.

An entity assesses whether a currency is exchangeable into another currency at a measurement date and for a specified purpose. When a currency is not exchangeable, the entity has to estimate a spot exchange rate.

According to the amendments, entities will have to provide new disclosures to help users assess the impact of using an estimated exchange rate on financial statements. These disclosures may include:

- the nature and financial effects of the currency not being exchangeable into the other currency;
- the spot exchange rate(s) used
- the estimation process; and
- the risks to which the entity is exposed because of the currency not being exchangeable into the other currency.

The amendments apply for annual reporting periods beginning on or after 1 January, 2025. Early adoption is permitted.

The Group has not early applied the standard.

### Amendments to the Classification and Measurement of Financial Instruments

On 30 May, 2024, the International Accounting Standards Board (the IASB or the Board) issued amendments to the classification and measurement requirements of IFRS 9 – Financial Instruments.

The changes aim to resolve the diversity in the application of the standard, making the requirements more understandable and consistent.

The amendments:

- Clarificar a classificação de activos financeiros com características ambientais, sociais e de governo corporativo (ESG) e similares, uma vez que estas características em empréstimos podem afetar se os empréstimos são mensurados ao custo amortizado ou ao justo valor. Para resolver qualquer potencial diversidade na aplicação prática, as alterações esclarecem como os fluxos de caixa contratuais dos empréstimos devem ser avaliados.

- Clarify the classification of financial assets with environmental, social and governance (ESG)-linked features and other similar features, since these features in loans can affect whether loans are measured at amortized cost or fair value. In order to resolve any potential diversity in practice, the amendments clarify how to assess the contractual cash flows of loans.
- Clarify the date on which a financial asset or financial liability is derecognized when it is settled through electronic payment systems. There is an accounting policy option that allows the derecognition of a financial liability before delivering the cash on the settlement date, if certain criteria are met.
- Improve the description of the term “non-recourse”. According to the amendments, a financial asset has non-recourse features if the ultimate contractual right to receive cash flows from an entity is limited to the cash flows generated by specified assets. The presence of non-recourse features does not necessarily exclude the financial asset from complying with the SPPI (solely payment of principal and interest) requirement, but the features need to be carefully analyzed.
- Clarify the treatment of contractually linked instruments (CLI). CLI must feature a waterfall payment structure that creates concentration of credit risk by allocating losses disproportionately between different tranches. The underlying pool can include financial instruments not in the scope of IFRS 9 classification and measurement (e.g., lease receivables), but must have cash flows that are equivalent to SPPI criterion.

The IASB has also introduced additional disclosure requirements relating to equity instruments classified at fair value through other comprehensive income (FVOCI) and financial instruments with contingent features, for example features linked to ESG targets.

This amendment is effective for periods after 1 January, 2026. Early adoption is permitted.

The Group has not early applied the standard.

## IFRS 18 Presentation and Disclosure in Financial Statements

On 9 April, 2024, the International Accounting Standards Board (the IASB or Board) issued the new standard, IFRS 18 Presentation and Disclosure in Financial Statements.

The main amendments to this standard are:

- Providing a more structured income statement. Specifically, it introduces a new subtotal “operating profit or loss” and the requirement that all income and expenses be classified into three new separate categories based on an entity's main business activities: Operating, Investing and Financing.
- Requirement for entities to analyze their operating expenses directly on the face of the income statement – either by nature, by function or in combination.
- Requirement for some of the “non-GAAP” measures that the Entity/Group uses to be reported in the financial statements. IFRS 18 defines management-defined performance measure (MPM or non-GAAP Performance Measures) as a subtotal of income and expenses that an Entity uses:
  - in public communications outside financial statements; and
  - to communicate management's view of the financial performance.

IFRS 18 requires entities to disclose information about all its MPMs in a single note to the financial statements. These include: how the measure is calculated; how it provides useful information; and a reconciliation to a value determined in accordance with IFRS.

- Introduction of improved guidelines on how entities group information in financial statements. It provides guidance on whether material information should be included in the primary financial statements or in the notes.

IFRS 18 is effective for annual reporting periods beginning on or after 1 January 2027. The standard is applied retrospectively. Early adoption is permitted.

The Group has not early applied the standard.

## IFRS 19 Presentation and Disclosure in Financial Statements

On 9 May, 2024, the International Accounting Standards Board (the IASB or Board) issued the new standard, IFRS 19 Subsidiaries without Public Accountability: Disclosures, which allows eligible subsidiaries to use IFRS with reduced disclosures. The application of IFRS 19 will reduce the costs of preparing the financial statements of subsidiaries, while maintaining the usefulness of the information for the users of their financial statements.

A subsidiary may elect to apply the new standard in its consolidated, individual or separate financial statements, provided that, at the reporting date:

- it has no public accountability;
- its parent prepares consolidated financial statements which comply with IFRS.

A subsidiary that applies IFRS 19 is required to make an explicit and unreserved statement of compliance with IFRS that IFRS 19 has been adopted.

IFRS 19 is effective for annual reporting periods beginning on or after 1 January 2027. The standard is applied retrospectively. Early adoption is permitted.

The Group has not early applied the standard.

## 31. SUBSEQUENT EVENTS

On 5 July, 2024, in accordance with a resolution of BFA's Board of Directors, the Bank made the initial allocation to the BFA Foundation, in an amount equivalent to 50%, which amounted to AOA 12,920,014 thousand.

### LIMITED REVIEW REPORT ON THE FINANCIAL STATEMENTS

(Free translation from a report originally issued in Portuguese language. In case of doubt the Portuguese version will always prevail)

To the Board of Directors of  
**Banco de Fomento Angola, S.A.**

#### Introduction

We have performed a limited review on the accompanying condensed interim consolidated financial statements of **Banco de Fomento Angola, S.A.** ("Bank"), which comprise the condensed interim consolidated Balance Sheet as at June 30, 2024 (which shows a total of AOA 3,657,686,278 thousand and a total equity of AOA 576,194,651 thousand, including a net profit attributable to the Bank's shareholders of AOA 90,378,664 thousand), as well as the condensed interim consolidated Statement of Income and Other Comprehensive Income, the condensed interim consolidated Statement of Changes in Equity and the condensed interim consolidated Cash Flow Statement for the six-month period ended on that date, and the Notes to the condensed interim consolidated Financial Statements.

#### Responsibilities of the Management

The Management is responsible for the preparation and fair presentation of these condensed interim consolidated financial statements in accordance with IAS 34 – Interim Financial Reporting and for such internal control as the Board deems necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditors' Responsibility

Our responsibility is to express a conclusion on these condensed interim consolidated financial statements. We conducted our review in accordance with ISRE 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity and the Technical Standards of the Angolan Institute of Accountants ("*Normas Técnicas da Ordem dos Contabilistas e Peritos Contabilistas de Angola*").

KPMG Angola – Audit, Tax, Advisory, S.A., an Angolan private limited company and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

KPMG Angola – Audit, Tax, Advisory, S.A.  
Capital Social: 1.200.000 USD / 130.000.000 ANG  
Processo Colectivo Nº 2601/176072

These standards require us to conclude on whether anything has come to our attention that leads us to believe that the financial statements, as a whole, are not prepared, in all material aspects, in accordance with IAS 34 – Interim Financial Reporting.

A limited review of Financial Statements is a work designed to provide reasonable assurance. The procedures we perform consist primarily of inquiries and analytical procedures and the subsequent assessment of the evidence obtained.

The procedures performed on a limited review are substantially reduced than the procedures performed in an audit conducted in accordance with the International Standards on Auditing (ISA). Consequently, we do not express an audit opinion on those financial statements.

#### Conclusion

Based on our limited review, nothing has come to our knowledge that leads us to believe that the accompanying condensed interim consolidated financial statements of **Banco de Fomento Angola, S.A.** as at June 30, 2024, are not prepared, in all material respects, in accordance with IAS 34 – Interim Financial Reporting.

Luanda, September 13, 2024

SUPERVISORY BOARD

OPINION OF THE SUPERVISORY BOARD ON THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS FOR H12024

In compliance with the applicable legal and regulatory provisions, namely pursuant to article 441(g) of the Angolan Companies Act (Law no. 1/04 dated 13th February), as well as pursuant to article 71(2) of the Financial Institutions Legal Framework (Law no. 14/21 dated 19th May), in conjunction with article 15(1)(d) of Notice no. 1/22 dated 28th January (the Financial Institutions Corporate Governance Code ) and article 6(5) of Notice no. 5/19 dated 30th August (the Accounting Standardisation and Harmonisation Process for the Angolan Banking Sector) and with article 8(1) of BFA's Supervisory Board Regulations approved on the 19th December 2023, it is incumbent upon the Supervisory Board to issue an opinion on BFA's Interim Condensed Consolidated Financial Statements as of 30th June 2024, as submitted by the Board of Directors.

It is incumbent upon BFA's Board of Directors the duty of drafting and submitting the Interim Condensed Consolidated Financial Statements as of 30th June 2024.

It is incumbent upon BFA's Supervisory Board the duty of reviewing, analysing and assessing the information contained within the Interim Condensed Consolidated Financial Statements in order to issue a professional and impartial opinion based on its supervisory function.

The Supervisory Board reviewed and analysed the Interim Condensed Consolidated Financial Statements, which comprise the Interim Condensed Consolidated Balance Sheet, the Interim Condensed Consolidated Income Statement and Other Comprehensive Income, the Interim Condensed Consolidated Cash Flow Statement and the Interim Condensed Consolidated Statement of Changes in Equity as of 30th June 2024. These statements demonstrate, for accounting purposes, that the Interim Condensed Consolidated Balance Sheet recorded as follows: Total Assets of AOA 3,657,686,278 thousand, Equity of AOA 576,194,651 thousand, which comprises a consolidated Net Profit of AOA 90,378,664 thousand and Total Liabilities of AOA 3,081,491,627 thousand. On the other hand, the Interim Condensed Consolidated Income Statement and Other Comprehensive

SUPERVISORY BOARD

Income recorded, for accounting purposes, a Net Financial Income of AOA 136,604,561 thousand, an Operating Income of AOA 166,900,420 thousand, a Profit Before Tax from Ongoing Operations of AOA 98,307,422 thousand and a Net Profit of AOA 90,379,210 thousand, all of which recorded for the six-month financial period under review that ended on the 30th of June 2024, in accordance with the Consolidated Financial Statements approved by the Board of Directors.

The Supervisory Board did not identify any situation that was not in accordance with legal regulations, International Financial Reporting Standards (IFRS) and applicable accounting practices. Moreover, the Supervisory Board considers that the financial statements present a true and fair view of the Bank's financial position and the results of its operations in all materially relevant aspects.

The Supervisory Board took note of the External Auditors' Limited Review Report concerning the Interim Condensed Consolidated Financial Statements as of 30th June 2024, which was issued unreservedly, with the auditor stating that "nothing has come to our attention that leads us to conclude that the accompanying interim condensed consolidated financial statements of Banco de Fomento Angola, S.A. as of 30th June 2024 are not prepared, in all material respects, in accordance with IAS 34 – Interim Financial Reporting.”.

Accordingly, the Supervisory Board issues a favourable opinion on the approval of BFA's Interim Condensed Consolidated Financial Statements as of 30th June 2024.
